

# Commonwealth of Pennsylvania

Date: **February 12, 2009**  
Subject: **Telecommunications Managed Services**  
Solicitation Number: **6100004339**  
Opening Date/Time: **March 3, 2009 at 1:00 PM EST**  
Addendum Number: **8**

---

To All Suppliers:

The Commonwealth of Pennsylvania defines a solicitation "Addendum" as an addition to or amendment of the original terms, conditions, specifications, or instructions of a procurement solicitation (e.g., Invitation for Bids or Request for Proposals).

*List any and all changes:*

1. Round 3 questions and answers have been posted.
2. Final Round 1 questions and answers have been posted.
3. The following attachments have been posted:
  - Exhibit Y1 Payphone Rates (Round 1 Questions #180, #181, and #184-187)
  - Exhibit Y2 Payphone Info RFP1 (Round 1 Questions #180, #181 and #184-187)
  - Exhibit Y3 Payphone Info RFP2 (Round 1 Questions #180, #181, and #183-187)
  - Exhibit Z1 ACD COPA Features (Round 3 Question #22)
  - Exhibit Z2 Managed Services December Snapshot (Round 3 Questions #7 and #44)
  - Exhibit Z3 Broadband by City (Round 3 Questions #14)
  - Exhibit Z4 Inbound TollFreeNmbrs (Round 3 Question #20)
4. A document titled "Prevailing Minimum Wages.doc" has been attached. This language is incorporated as section #73 of Appendix A (Terms and Conditions).
5. A revised Supplier Pricing Form spreadsheet has been posted, it is listed as: Exhibit D Service Provider Pricing Forms v3.xls. This is in response to Round 1 Questions 8 and 9.

**For electronic solicitation responses via the SRM portal:**

- Attach this Addendum to your solicitation response. Failure to do so may result in disqualification.
- To attach the Addendum, download the Addendum and save to your computer. Move to "My Notes", use the "Browse" button to find the document you just saved and press "Add" to upload the document.
- Review the Attributes section of your solicitation response to ensure you have responded, as required, to any questions relevant to solicitation addenda issued subsequent to the initial advertisement of the solicitation opportunity.

**For solicitations where a "hard copy" (vs. electronic) response is requested:**

- Attach this Addendum to your solicitation response. Failure to do so may result in disqualification.
- If you have already submitted a response to the original solicitation, you may either submit a new response, or return this Addendum with a statement that your original response remains firm, by the due date to the following address:

PA Department of General Services  
Kay Shaffer

# Commonwealth of Pennsylvania

555 Walnut Street, 6th Floor  
Harrisburg, PA 17101

Except as clarified and amended by this Addendum, the terms, conditions, specifications, and instructions of the solicitation and any previous solicitation addenda, remain as originally written.

Very truly yours,

Name: Kay Shaffer  
Title: Associate Commodity Manager  
Phone: 717-346-3830  
Email: [kashaffer@state.pa.us](mailto:kashaffer@state.pa.us)

63	Exhibit C	1.577	The Offeror shall provide web based access to the VOIP and/or IP telephony platform.	Please clarify the functional deliverable(s) for "the web based features as it relates to VOIP and IP telephony platform."	The Offeror should provide a web-based interface that can be used by the Commonwealth (agency administrators) to make planned or on-the-fly changes to the phones (i.e. changes such as users, locations, features, unified messaging, simultaneous ringing, forwarding, etc.)
110				Does the Commonwealth desire to use the same dial plan with respect to the VoIP solution? What prefixes are currently blocked? Is it necessary to append "9s or "1s" to the dial plan?	The Commonwealth desires to use the same dial plan for the VOIP solution but it is not a requirement. The only prefix that the Commonwealth has the option to block is 900. For the current VOIP deployment, it is not necessary to append "9s" or "1s" to the dial plan.
157		Telecommunications RFP – Exhibit C – Statement of Work	1.479 & Exhibit B 2.0	Exhibit B illustrates a diagram with Business Partner routers. Are Business Partner routing services from the Offeror part of this Request For Proposal? If so, what technologies should be permitted to connect to it (e.g. ATM, Ethernet)?	Business Partner routing services are a part of this RFP. Technologies permitted would be frame relay, ATM, Ethernet, and newly proposed.
158		Telecommunications RFP – Exhibit C – Statement of Work	1.479 & Exhibit B 2.0	Exhibit B illustrates a geographically diverse diagram with Business Partner router configuration. Is a geographically diverse Business Partner routing service from the Offeror part of this Request For Proposal? If so, what technologies should be permitted to connect to it (e.g. ATM, Ethernet)?	A geographically diverse Business Partner routing service is a part of this RFP. Technologies permitted would be frame relay, ATM, Ethernet, and newly proposed.
159		Telecommunications RFP – Exhibit B – Current Environment	2	Exhibit B illustrates a diagram with two core routers. Are core routing services from the Offeror part of this Request For Proposal? If so, what technologies should be permitted to connect to it (e.g. ATM, Ethernet)?	The selected Offeror will be required to use COPANET (the new core) routing services in place of TelCove Core Router routing services. Core Routers as shown in diagram will not be part of the newly proposed network solution as they become the property of Telcove at the end of the existing contract. The Commonwealth expects the Offeror to propose the type of technologies used to deploy core routing services.
166		Telecommunications RFP – Exhibit C – Statement of Work	1.68	Please define specific types of "current terminating equipment and systems" as specified in this requirement.	This does not seem to relate to requirement 1.68.
176		PBX & Key System	Pricing	How are these new systems to be priced (configurations – manufacturers?)	The Commonwealth expects the Offeror to price PBX and Key

					Systems similar to existing sub system configurations. Current configurations and manufacturers can be found here: <a href="http://www.portal.state.pa.us/portal/server.pt?open=512&amp;objID=682&amp;parentname=CommunityPage&amp;parentid=1&amp;mode=2&amp;in_hi_userid=2&amp;cached=true">http://www.portal.state.pa.us/portal/server.pt?open=512&amp;objID=682&amp;parentname=CommunityPage&amp;parentid=1&amp;mode=2&amp;in_hi_userid=2&amp;cached=true</a> . (Please view the DGS contract 5805-55)
180		Payphones	Finances	Would the Commonwealth please provide a detailed pay telephone revenue breakdown, by call type, for recent 12-month period to include coin revenue by LATA (e.g. local, intraLATA, long distance), non-sent paid revenue by LATA (e.g. collect, credit card, bill to 3rd party, etc.) as well as Per Call Compensation.	The Commonwealth has been able to provide a detailed revenue breakdown for payphones by month and number for January through November 2008. Please reference payphone rates and associated attachments: "Exhibit Y1 PayphoneRates.pdf", "Exhibit Y2 PayphoneInfoRFP1.xls" and "Exhibit Y3 PayphoneInfoRFP2.xls".
181		Payphones	Finances	What commission percentage is currently being paid to the Commonwealth? Please describe any differences, if any, paid on coin versus non-sent paid calling by LATA. <ul style="list-style-type: none"> <li>Of the current installed base of payphones, how many are commissioned to the State or Agency versus those payphones which are low revenue and paid for by the State or Agency?</li> <li>Is a MAG currently in place? If so, what is the scope and minimum?</li> </ul>	See response to Question #180.
182		Payphones	Operation	What company is providing the long distance services today?	The long distance carrier varies depending on the location.
183		Payphones	Operation	How many repairs were performed in the most recent 12-month period? Was this higher, lower or about the same as in prior years (relative to the number of phones installed)?	This information can be obtained from the "Exhibit Y3 PayphoneInfoRFP2.xls" spreadsheet under the "trouble tickets" tab.
184		Payphones	Operation	Please provide an inventory by payphone and enclosure equipment type (and version) for each location (e.g. Classic Phone, Protel, APS; Modeez, L31, Walk-Up, Drive-Up, etc.). <ul style="list-style-type: none"> <li>Are the listed TTY units owned by the Commonwealth at the end of the current contract?</li> <li>What types of TTY units are installed?</li> <li>Please provide usage for each TTY for the prior 12-month period.</li> </ul>	See response to Question #180. Please note that the majority of the TTY units are Commonwealth owned.

185		Payphones	Finances	Would the Commonwealth please provide the current call rates charged to users for coin and non-coin calls by LATA?	See response to Question #180.
186		Payphones	Finances	Are there any discount calling options currently available to the user? If so, what plan(s) are in place?	See response to Question #180.
187		Payphones	Operation	Are all payphones currently installed meeting the ADA requirements for access? When was the last ADA survey conducted?	See response to Question #180.
193				In Exhibit C, item 1.179 on page 26 of 83, "The Offeror shall describe how new service requests for a location previously granted control IDS and RPs is processed. What do you mean by "control IDs and RPs"?"	Exhibit C, Section 1.179 is no longer a requirement of this RFP and will not be part of the evaluation process.
195				In Exhibit C, page 13 of 83, 1.65, the requirement states "The Offeror shall include the provision of Layer 3 edge equipment as a managed service offering with provisions for a 3-year technology refresh." Please explain what is being requested for the 3-year technology refresh.	The 3-year technology refresh is not mandatory but should be presented to each contract participant for budget planning purposes. This service offering is only applies to contract participants who purchased Gold, Silver or Bronze with hardware.
202				Can we get a count of PBX ports in each of the systems to be covered? If the system has voicemail can we get a count of the voicemail ports and what type of voicemail is in the system?	Agencies do not have accurate records of PBX ports, voicemail ports and stations. The Commonwealth's policy currently requires the use of Centrex Lines, therefore agencies have been removing PBX's and Key Systems as sites relocate or systems start to fail.
203				Can we get a count of the stations for each of the key systems to be covered? If the system has voicemail can we get a count of the voicemail ports and the type of voicemail in the system?	Agencies do not have accurate records of key systems, PBX ports, voicemail ports and stations. The Commonwealth's policy currently requires the use of Centrex Lines, therefore agencies have been removing PBX's and Key Systems as sites relocate or systems start to fail.
213				Does the Commonwealth have any requirements to support IP video surveillance and associated mass notification services as a part of this solution?	The Commonwealth does not have any specific requirements, but will consider any service offerings.
233		Appendix A		Appendix A, Terms and Conditions, section 1(f)(2)(ii)—What is expected to be covered under this provision? Can we get an explanation?	Section 1(f)(2)(ii) of Appendix A is hereby deleted. The reference to Section 1(f)(2)(ii) in Section 1(f)(2)(iii) of Appendix A is also deleted.

272			1.9	Some upgrades of network or equipment require downtime to implement. Please clarify if the Commonwealth is requesting no downtime whatsoever.	The Commonwealth understands that there will be scheduled downtime and follow the Commonwealth's change management process. However, where redundancy is built-in the Offeror is expected to perform maintenance without downtime.
-----	--	--	-----	---	--

## Round 3 Questions and Answers

1. The Commonwealth has indicated in past Q&A rounds that the Offerer should provide out-of-band and UPS services as a separate service. There are no baselines in Exhibit D for these items. Will the Commonwealth please provide baselines so these offerings can be priced?

The Commonwealth to date has implemented out-of-band and UPS services at a limited number of sites (approx. 50) within the Harrisburg area. The Commonwealth is requesting that the Offeror provide various products that the Commonwealth may consider on a per site as needed basis which includes installation and maintenance. The current out-of-band products used are (47) Port Authority 44 and (3) Port Authority 88 units. The current UPS systems used are Leibert 1.5kVA ModelGXT-2-1500RT120 (28 minute).

2. The answer to Q&A Round 1 Part 2 question 52 is, "Agency firewall solutions managed by the Offeror are subject to the current firewall product standard as described in ITB-SEC011." This appears to conflict with requirements 1.498 and 1.499. Please clarify this answer as it relates to requirements 1.498 and 1.499 which are "not subject to the current Commonwealth firewall product standard."

1.496 and 1.497 specifically address agency firewall solutions that are subject to ITB-SEC011. Per the ITB, the Commonwealth has an agency waiver process, subject to CISO approval, that allows an agency to implement a solution that is in conflict with the ITB. If approved, the agency must have a means to order a fully managed or co-managed agency firewall solution that is in conflict with ITB-SEC011; therefore 1.498 and 1.499 requirements were included in Exhibit C. Keep in mind that other contract participants, not directly connected to the Commonwealth's network and not subject to the ITB, will also benefit by multiple firewall solution offerings.

3. Exhibit A - Background and Objectives, Questions and Answers #125: The following questions pertain to the current Router Management contact that expires in 2011.
  - How soon can the offeror begin transition?
  - Are there any restrictions on the devices or timeframes? If so what are they?

The Offeror may begin transition for router management as it fits into the agreed upon transition plan provided by the Offeror. The only time constraints would be associated with the already existing maintenance agreements and those expiration dates.

4. CoPA has provided the SOW, T&C and 2 amendments to the Verizon MAN Router Contract on the OA web site. Can the rest of the contract be provided? For example, change requests, addendums, etc. Also, the Commonwealth has indicated that address information is not available for many devices. Can the Commonwealth provide a breakdown of devices by size (Large, Medium, Small) / type of service (Gold, Silver, Bronze) within a geographic region?

The Commonwealth has provided all documents that were part of the Router Management Contract.

5. Schedule O - Benchmarking Procedures, Page 3, 4 (b). Benchmarking Process: Could you provide 1 or 2 examples of the services (SOW References) you anticipate benchmarking in the statement below?

“(b) ...and (ii) the portion of the Services subject to the Benchmark Process shall include at least one of, or any combination of, the following categories of Services: (A) [SOW reference], (B) [SOW reference], or (C) [SOW reference] [consider logical groupings of SOWs/Service Areas], or such other Service Areas or Services as may be agreed by the Parties...”

The Commonwealth will develop and finalize the specific service areas to be benchmarked with the selected Offeror, but would expect the potential statement of work references or service areas to be along the lines of “Metro Ethernet Services,” “MPLS Services,” “Inbound Toll-Free Services” and “Managed Security Services”.

6. Questions and Answers, Round 2 Part 2, #85: Per Round 2 (Part 2) Questions and Answers question #85, it is stated that Remedy is not applicable for the CTMS solution yet trouble tickets are a part of CTMS. Additionally, SOW 1.536 requires that the Offeror's Remedy system shall be capable of integrating with all Remedy modules utilized by the Commonwealth.

Can you clarify what the Remedy interface is in CTMS?

The current provider has a “Trouble Ticket” module that interfaces with CTMS. It is a Remedy application that is only accessed by the end users through CTMS. It is not part of the CTMS application.

7. In recent Addenda and Q&A rounds, the Commonwealth modified router and switch management baselines. As a result, the routers and switches have been merged into a category called “devices.” Could the Commonwealth split these into routers and switches again in order for the Offeror to price hardware effectively? We would suggest a four-way breakdown by small/medium/large, bronze/silver/gold, switch/router, and with hardware/without hardware.

Please refer to the Exhibit Z2 “Managed Services December Snapshot.xls” which identifies and quantifies the type of services currently being provided. There are four tabs in the document. One is a legend depicting the department code and associated agency. The other three are identical information sorted in different manner. In some instances a line item may relate to a quantity of one in others it may relate to many. This document in no way is an accurate representation of asset inventories and should not be treated as such. However, it does provide a high level summation of the scale (small/medium/large) and level of service (bronze/silver/gold) for routers and switches.

8. In recent Addenda and Q&A rounds, the Commonwealth modified router and switch management baselines. The latest baselines indicate that approximately 2000 of the devices

are assigned gold service when the original baselines showed approximately 200 devices (routers + switches) for this class.

Will the Commonwealth please confirm these numbers?

The Commonwealth has revised the following exhibit: “Exhibit D Service Provider Pricing Forms v3.xls” The new baselines for “Gold Medium” and “Gold Large” devices with and without hardware have been adjusted.

9. In recent Addenda and Q&A rounds, the Commonwealth modified router and switch management baselines. The latest baselines indicate that approximately 1500 of the devices are classified as “large” devices. According to the definitions tab a “large” device would be a Cisco 6000/7000 series or equivalent device. The original baseline showed approximately 60 devices of this class.

Please confirm that the revised baselines for small/medium/large devices, switches and routers are correct.

The Commonwealth has revised the following exhibit: “Exhibit D Service Provider Pricing Forms v3.xls” The new baselines for “Gold Medium” and “Gold Large” devices with and without hardware have been adjusted.

10. The Commonwealth indicated in a previous Q&A round that the dedicated network managers were to be offered as a separate service; however, this was not added to the pricing sheet. Could the Commonwealth provide a revised pricing sheet or further direction on how it wants this dedicated network manager priced?  
Can the Commonwealth please provide baselines for this?

The Commonwealth has requested that the Offeror complete the worksheet labeled “VIII. Project Rate Card” in the exhibit: “Exhibit D Service Provider Pricing Forms v3.xls” to address this type of service. The Commonwealth cannot provide baseline usage since this type of service is categorized as indefinite demand and indefinite quantity.

11. Round 1 Questions and Answers, #141 and #155: The Commonwealth has asked for a 3-year tech refresh for planning and budgeting purposes. Can the Offeror assume that there can be a 3-year rolling tech refresh that is simply priced once every three years for the proposal? If not, what is the maximum timeframe the Commonwealth would accept for a tech refresh to be accomplished.

Yes, since the inclusion of “managed devices with hardware” is offered as an option, the Commonwealth is seeking a technology refresh quotes for budget and planning purposes only. The Offeror can provide a rolling technology refresh at fixed intervals. 3-year rolling intervals are the maximum.

12. What specific functions are required at the backup NOC?

The Offeror can choose to have both the primary and secondary NOC functioning simultaneously or the secondary available in the event the primary NOC is not available. NOC services must be available 24x7x365.

13. What are alarm circuits? Are they 4 wire private line circuits?

An alarm circuit (also known as a dry pair) is an unconditioned leased pair of telephone wire from a telecommunication provider. The pair does not have a dial-tone or "battery" (continuous electric potential), as opposed to a "wet pair" (a line usually with no dial tone but with battery).

14. The Pricing Schedule currently shows (93) Baseline Units for the Broadband Internet Access line item. Where are these Broadband connections located today geographically?

The Commonwealth has provided a list of broadband connections by city. Please reference the following attachment: Exhibit Z3 "Broadband by City.xls"

15. Please provide a list of all locations to which Toll-Free services are to be delivered, accompanied by the corresponding circuit inventory.

Toll free inbound services must be offered throughout the Commonwealth. Delivery of those services may vary depending on the network routing configuration, but will need to be delivered to all Commonwealth locations. For a list of locations, please reference Exhibit H – Voice Services

16. Is the Offeror expected to provide audioconferencing and videoconferencing services, or just the voice and/or data access to audioconferencing and/or videoconferencing bridges?

The Commonwealth expects the Offeror to provide a solution for access to audio/video conferencing, but will consider other audio/video conferencing solutions.

17. Does the Gold Silver Bronze concept apply to data circuits and voice lines or managed equipment only?

Gold, Silver, and Bronze does not apply to data circuits or voice lines.

18. Amendment 6 of the Telcove agreement states that "If the Commonwealth selects a vendor other than TelCove to provide Enhanced Technology, then any resulting transition away from services provided by TelCove will occur in a ratio of \$4 of off-net revenue (provisioning types 2, 3, 4 & 5) for every \$1 of on-net revenue (provisioning type 1 – fiber). Further, no partial transition to an enhanced technology for any Category 1, non-TelCove non Type, T-1 line shall occur". This seems to define the sequence of the transition and defines that all large sites cannot be transitioned first. In fact it's almost the opposite. Is this the Commonwealth's interpretation of this section of the existing contract?

Amendment 6 of the Telcove Agreement addresses “enhanced technology” and defines the term as “any new commercially available telecommunications technology, including equipment and improved processes, that could reasonably be expected to have a positive impact on the provision of services in terms of increased efficiency, increased quality, or reduced costs.” The relevance of this amendment is dependent on the Offeror’s proposed solution.

19. If an Offeror partners with the current provider of the payphones in the Commonwealth is the Offer still expected to provide a 1-for-1 replacement for all existing coin operated stations and/or card operated stations as stipulated in Exhibit C, Question 1.443?

If the Offeror partners with the current provider, a 1-for-1 replacement may not be required. Offerors should submit proposals based on the requirements stated in Exhibit C, number 1.443.

20. When does the Commonwealth anticipate the inventory of all current toll free numbers to be available and will it include all feature details, attributes, and call narratives?

Exhibit F-3, Centrex and Voice Features provides the feature requirements that need to be available for each inbound toll free number. A list of current inbound toll free numbers is provided in Exhibit Z4 “InboundTollFreeNmbrs.xls”.

21. Does Exhibit C, Section 1.109 refer to NIST SP 800-58? If not, can the Commonwealth supply the correct reference?

Yes, the security considerations and recommendations for Voice Over IP Systems can be referenced in NIST SP 800-58.

22. In the Level 3 pricing catalog it indicates 27 separate pricing components that apply to the current ACD solution. Information in the catalog does not show the average monthly costs associated with the current 1,700 agents. Excluding installation costs, can you provide the average per-agent costs the Commonwealth pays for its current ACD solution? What is the typical feature set the average ACD agent uses?

The average per-agent cost is \$22. The typical feature set the average ACD agent uses is the COPA 2 feature set detailed in Exhibit Z1 “ACD COPA Features.xls”.

23. With the implementation of this Bid, will the individual agencies have the discretion to take PBX, Key, and miscellaneous maintenance coverage? Or, will it be mandatory that they be covered by a comprehensive maintenance agreement under this new contract?

The Commonwealth is not clear on what is meant by “miscellaneous” and “comprehensive” maintenance. The Commonwealth is requesting a fully managed PBX/Key offering. Currently, the agencies are not mandated to purchase maintenance on these systems.

Agencies procure a specific configuration and at their discretion, purchase maintenance/support base on time and materials.

24. Please provide current Local and Toll Usage Statistics for Centrex. This level of detail is resident in the incumbent provider's Class 5 switches. Having accurate usage statistics is crucial to an Offeror's design and costing of a solution. Inasmuch as the incumbent provider has knowledge of the usage details, all bidders need this same information from which to model costing/pricing, in order to avoid giving an unfair competitive advantage to the incumbent.

Because the Commonwealth pays for Centrex services as a monthly charge regardless of usage, these statistics are only held in the switch for a very short time. There would be a significant cost to the Commonwealth to have this reconfigured to produce the local usage statistics. The Commonwealth has already provided the Long Distance usage in Exhibit E, Volumetrics in the Voice Usage Section of the table, Call and Minutes. The usage indicated is all Commonwealth Long Distance, including International calls. Usage specific to International calls was provided previously (Addendum 1, posted on December 1, 2008) in the following attachment: "Exhibit N International Outbound Usage.xls"

25. Exhibit D - Does the Commonwealth Plan to update Exhibit D – Offer Pricing Form to allow for the addition of rate tables for those select services where the Commonwealth has requested this information? Should vendors submit the rate tables as an additional worksheet to Exhibit D?

The Commonwealth will not be updating Exhibit D to allow for the addition of rate tables. Offerors are requested to present their rate tables as an additional sheet(s) with their Cost Submittal proposal.

26. Exhibit D – Offer Pricing Forms: Are vendors permitted to submit 2 separate pricing forms, one for the products and services detailed in the current Exhibit D Pricing Form, and a second pricing form/workbook for an alternative, second offering?

No.

27. What is the specific name and version/release of the ACD call recording software application currently being utilized by COPA?

Autonomy etalk Qfiniti

28. Are there business requirements to do full-time recording for specific calls from COPA's business units which are not part of the ACD solution -specifically, any 911 calls, police dispatch, or legal compliance issues? If yes, what are the specific archival and storage requirements and search parameters for retrieval/playback?

Yes, there are individual agency requirements for full-time recording of specific lines, which are not part of an ACD solution. Recording, archival and storage devices for these

applications are covered under contract 20-01-01 and are not included in this RFP. The Commonwealth does require the ability for all voice services, provided as a result of this RFP, to interface with existing recording, archival and storage devices as they do today. In some cases, simple mercury switches are used to record calls in an off-hook condition. Requirement “Automatic Call Distribution 1.278” is changed to read, “The Offeror shall provide a hosted telephone call reporting service for Commonwealth ACD call centers and CO-based services.”

29. Does COPA require rules based recording or specific call types to be recorded?

Voice recording of calls is not required under this RFP. See explanation under question 28.

30. Are there any requirements for CTI or specific call session events to be tagged/associated with audio call files; i.e. ANI, DNIS, Agent ID/Extension, account number, specific database fields to be associated with call records?

Voice recording of calls is not required under this RFP. See explanation under question 28.

31. Does COPA require screen capture of desktop activities from any of the business units associated with call recording?

Voice recording of calls is not required under this RFP. See explanation under question 28.

32. Does COPA use a dialer (predictive) for outbound call campaigns?

Not all Commonwealth agencies use a dialer (predictive) for outbound call campaigns. An example of one agency that does utilize this service is the Department of Revenue and it is a premise based system.

33. What is the specific name and version/release of the WFM (Work Force Management) software solution currently being utilized by COPA?

Work Force Management (WFM) is part of Telcove's (Level3) Genesys ACD platform.

34. Is forecasting, scheduling, and reporting required from any of the business units who do not log onto the ACD solution for workforce management application requirements in the RFP?

No. WFM is only associated with the ACD functions.

35. Is “Real-Time Adherence” a required module for the WFM requirements?

Yes

36. Is integration to any of COPA's CRM, Legacy systems, ACD/PBX required for scheduling and reporting?

No

37. Exhibit C – SOW Ref ID 1.72 – Could COPA please clarify the requirement to provide GPS reading at the facilities point of entry? What is the application of this requirement and please describe the facilities point of entry?

The Commonwealth is looking for the Offeror to describe its ability and approach to provide a GPS reading for latitude, longitude, and elevation to be taken at the point at the facilities point of entry. The “facilities point of entry” is the closest logical and practical point within the customer domain for the placement of a demarcation point (demarc), which sets the boundary of responsibility between the service provider and the customer.

38. Exhibit C; SOW; 1.543 – Does the Commonwealth envision the jointly-developed DRBCP as a formal document that would chiefly outline the specific response and recovery activities that the Commonwealth would engage in during a disaster? Or, does it envision the plan as a document that chiefly outlines Verizon’s response and recovery activities during a disaster?

The DRBCP would be a document that chiefly outlines the Offeror’s response and recovery activities during a disaster.

39. Exhibit C; SOW; 1.563 – Do the individual Agency Business Continuity Plans (ABCPs) represent a separate DRBCP initiative (resulting in separate documented, agency-specific plans for network data and voice services) apart from the DRBCP described in 1.543, above?

The ABCP is not a part of the DRBCP. The ABCPs represent a separate initiative resulting in separate agency documents that outline the specific response and activities of both the Offeror and the agency during a disaster. The scope of each plan should be limited to network (data and voice) and security services provided by the Offeror.

40. Does the current Centrex rate, in the Level 3 contract, include the SLC (Subscriber Line Charge)?

No. COPA does not pay Subscriber Line Charges (SLC). Service TelCove acquires from Local Exchange Carriers (LEC) is at a wholesale rate.

41. Exhibit B Item 8.1: Regarding the Commonwealth’s response on 1.7.09 to Question 56, a word is missing from the response. Could the Commonwealth clarify what word should come between “will” and “a license” in the response?

The answer to “Exhibit B, Page 11, Item 8.1: Will bidders be allowed to view and/or obtain system documentation for CTMS prior to the start of the transition period? If not, when?” should read:

No. The Commonwealth will receive a license for CTMS at the end of the existing contract in February, 2011, which will allow it to provide documentation. Documentation will not be available until then.

42. Exhibit C, 1.107, DOH Network: What vendor/model IP phone sets are currently employed within the Department of Health voice network?

IP phone sets in use and owned by the Department of Health include: Cisco IP 7960g and Polycom Soundpoint IP 600.

43. Appendix A, Terms and Conditions, section 36(b)(1)(ii) requires the Contractor to be responsible for the “[l]oss or corruption of Commonwealth data including, without limitation, the cost and expense of rectification of the data arising out of a default (including for recovering, reconstructing, reformatting or reloading data)”. Communications carriers cannot accept such responsibility for the following reasons. First, a communications carrier merely transports voice or data communications over its network; it does not have any control or insight into the content of such communications, nor does it back up such data. (Indeed, in many cases, probing the content of communications would violate the privacy of network users or otherwise be unlawful.) Second, it is not possible to accept responsibility to reconstruct data sent by third parties. In both cases there are simply too many factors beyond the control of the Contractor, including illegal conduct by third parties in intentionally attacking the network through the introduction of worms, viruses and other destructive code. In light of the foregoing, will the Commonwealth agree to eliminate this provision from the Terms and Conditions? If so, section 36(b)(1) will read as follows:

(b) Except as provided for in Section 36(b)(1) below, neither Party will be liable for indirect, incidental, special, consequential, exemplary or punitive damages arising out of or relating to the Contract (“Excluded Damages”).

(1) In the case of Commonwealth, the following shall not constitute Excluded Damages:

- (i) Additional costs to maintain the Services arising from a default by Contractor including the cost of work-arounds;
- (ii) Expenditure or charges incurred by Commonwealth and rendered necessary as a result of a default by Contractor; and
- (iii) Any regulatory losses, fines, expenses or other losses suffered by Commonwealth as a result of Contractor’s failure to comply with any law or regulation

These items should be included in the Offeror's response to Part II-5 of the RFP (Objections and Additions to Standard Contract Terms and Conditions).

44. Please identify the quantity breakdown of the Gold, Silver and Bronze "with hardware" levels based upon device type (make & model number) to be used on the pricing baseline tab.

Please refer to the Exhibit Z2 “Managed Services December Snapshot.xls” which identifies and quantifies the type of services currently being provided. This document in no way is an accurate representation of asset inventories and should not be treated as such. However, it does provide a high level summation of the scale (small/medium/large) and level of service (bronze/silver/gold) for routers and switches.

45. The enterprise security solutions are described in exhibit B. This exhibit describes a pretty substantial service. The specific questions relative to Security are in Exhibit C. They are shown below. There is no way to represent this service in the pricing model and ensure that the vendor is providing a similar robust security infrastructure if the costs are spread over other items. Would the Commonwealth consider adding an additional line to the pricing model to ensure the costs associated with Enterprise Security (Tab 3-Monthly Base Charges, Row B122) can be compared across the various responses?

1.448	<i>The Offeror shall describe in detail how the security architecture will be implemented and deployed to address compliance with Commonwealth standards and interoperability requirements.</i>
1.448	<i>The Offeror shall describe how its defense in-depth security approach will be used in the design, implementation, and support of the network and security architecture.</i>

The offeror should use the Section II-2 Technical Solution to describe their proposed approach and solution. The services described in Section II-2 should then be priced in the Exhibit D – Service Provider Pricing Forms. If the Tab III Monthly Base Charges section does not support your proposed pricing approach, include the charges for the enterprise security solution in the Optional Supplemental Solution Pricing Section in Tab III of the Service Provider Pricing Forms.

# REQUEST FOR PROPOSAL

## **Commonwealth of Pennsylvania Office of Administration / Information Technology**

### **Exhibit D – Offeror Pricing Forms**

RFP ISSUE Date

12-Nov-08

Exhibit D REVISION Date

6-Feb-09

**Offeror Instructions**

The Offeror will use the following forms in submitting its financial response and document any relevant notes or clarifications. Formulas have been provided to assist in rolling up the detailed information, however the Offeror is responsible for all information contained within the spreadsheet including all formulas. The Offeror therefore should review the accuracy of the formulas provided. Client explicitly requests that no changes be made to the format of the pricing sheets, and that the Offeror complete their response within the cells provided.

This pricing form represents a seven year agreement where Month 1 - Day 1 is the first calendar day after the contract signing. The 84 month agreement begins on Month 1 - Day 1, and any service delivery that begins after Month 1 - Day 1 will end on the last day of Month 84.

**I. Annual Summary Fees**

This tab is used to summarize the monthly base charges and transition / one time charges on an annual basis. Formulas have been provided to roll forward the detailed information input on the "Transition Charges" and "Monthly Base Charges" tabs.

**II. Transition Charges**

This form is used to detail the charges associated with transitioning the assumable work for each area, as well as the costs associated with the transition of employees and contractors. Offerors should, at a minimum, complete each expense category, and are encouraged to provide additional expense categories where the expense may be material. Please provide a description for any expense lines currently noted as Other (Please Describe).

**III. Monthly Base Charges**

This form is to be used to specify the detailed Monthly Base Charges to the client, excluding any consideration of ARCs or RRCs, for providing the Resource Baselines for the agreement term.

**SUPPLEMENTAL SOLUTION**

The Offeror is encouraged to propose costing for a supplemental approach to meeting the Commonwealth's requirements. This section of the form is to be used in conjunction with the Monthly Base Charge section to price a complete solution to the Commonwealth. This area should be used to catalogue new resource units the Offeror would propose to use in delivering the services. An example would include WAN services that would be in addition to, or replace Frame Relay.

**IV. ARC\_RRC**

The Offeror must specify the Additional Resource Unit Charges (ARCs) and Reduced Resource Unit Credits (RRCs), which are expected to be equal, for the resource types specified. The Offeror must also supply any applicable deadband range as a percentage that applies both above and below the resource baseline volumes for which ARC/RRC rates would not be charged.

**V. Baselines**

This sheet is provided to communicate the resource baselines (units of consumption) that the Offeror is expected to provide in service delivery on a monthly basis. Please refer to the Frame Relay and ATM Circuit Inventory, Exhibit G, for a complete inventory of all current Commonwealth circuits.

**VI. Offeror Assumed Baselines**

The Offeror is to complete this sheet to communicate the monthly resource baselines that will be included in their service delivery model, which is reflected in the Monthly Base Charges.

**Offeror Instructions****VII. Baseline Delta**

This sheet is used to calculate the delta between the Commonwealth's Baselines and the Offeror Assumed Baselines.

This sheet will automatically calculate based on inputs in the Offeror Assumed Baselines tab and the Offeror should not add any information to complete.

**VIII. Project Rate Card**

The Service Offeror is requested to use this form to provide professional hourly billable rates for FTEs requested by the client to perform additional project work. The Offeror should identify the FTE types, different skill sets by type and the various rates associated with them. The skills sets identified should be clearly linked with the rates listed in this sheet.

**IX. Termination & Unamortized Assets**

The Offeror must use this sheet to document charges related to termination for convenience. The charges are to be broken into three types, Termination Charges, Unamortized Assets, and Wind Down charges. Unamortized Assets represent significant investment made on behalf of delivering the service to the Commonwealth whose expense is recovered through the Monthly Base Charges. Wind Down charges are to represent a cap to which charges will not exceed. Wind Down charges are expected to be paid to the Offeror as incurred.

**X. Pricing Notes**

The Offeror should use this tab to document all notes that are relative to pricing. Please be as detailed as possible regarding how action/note will impact pricing.

**XI. Definitions**

Tab contains definitions for all resource units.

Please use the following section to depict summary charges from any alternative and/or supplemental solution the Offeror is proposing. All monthly base charges for any alternative and/or supplemental solution (by resource unit or other component) must be linked to the below table. Total Charges line within this form must include any charges related to a proposed alternative and/or supplemental solution. If this section is left blank, Commonwealth will assume Offeror is proposing a solution based on the existing model ONLY.

<b>Optional Supplemental Solution</b>	<b>Year 1</b>	<b>Year 2</b>	<b>Year 3</b>	<b>Year 4</b>	<b>Year 5</b>	<b>Year 6</b>	<b>Year 7</b>	<b>Total</b>

**OPTIONAL SUPPLEMENTAL SOLUTION**

The Commonwealth of Pennsylvania welcomes offerors to suggest a supplemental solution to the current service delivery model.

Any supplemental solution should be depicted in the space below, utilizing the resource units defined in this form in addition to other resource units or components as defined by the offerer.

Any component or resource unit introduced as part of an supplemental solution should be clearly defined within the Notes tab of this form.

The provider must indicate when the resource units of the existing model will be eliminated utilizing the section above.

Please utilize the following format to demonstrate pricing for any supplemental solution. Please note, summary pricing for any supplemental solution must be linked to the Annual Summary Fees tab.

**Please note: All providers are required to complete the pricing form. The suggestion of a supplemental solution is optional but if a provider pursues this option, the entire pricing form for the supplemental solution must be complete.**

**Pricing Model Notes**

Commonwealth of Pennsylvania  
Telecommunications Managed Services - Resource Unit Definitions

Pricing Elements	Definition
<b>Transport / Point to Point</b>	
Metro P2P Ethernet 1000Mbps	MetroEthernet circuit of a specific size (as detailed in the Transport/Ethernet section of the Base Charges tab) authorized for use by the Commonwealth. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service. Rate tables should be included with Cost Proposal.
Metro P2P Ethernet 500Mbps	MetroEthernet circuit of a specific size (as detailed in the Transport/Ethernet section of the Base Charges tab) authorized for use by the Commonwealth. Circuit terminates within the same metropolitan area. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service. Rate tables should be included with Cost Proposal.
Metro P2P Ethernet 200Mbps	MetroEthernet circuit of a specific size (as detailed in the Transport/Ethernet section of the Base Charges tab) authorized for use by the Commonwealth. Circuit terminates within the same metropolitan area. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service. Rate tables should be included with Cost Proposal.
Metro P2P Ethernet 100Mbps	MetroEthernet circuit of a specific size (as detailed in the Transport/Ethernet section of the Base Charges tab) authorized for use by the Commonwealth. Circuit terminates within the same metropolitan area. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service. Rate tables should be included with Cost Proposal.
Metro P2P Ethernet 50Mbps	MetroEthernet circuit of a specific size (as detailed in the Transport/Ethernet section of the Base Charges tab) authorized for use by the Commonwealth. Circuit terminates within the same metropolitan area. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service. Rate tables should be included with Cost Proposal.
Metro P2P Ethernet 6Mbps	MetroEthernet circuit of a specific size (as detailed in the Transport/Ethernet section of the Base Charges tab) authorized for use by the Commonwealth. Circuit terminates within the same metropolitan area. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service. Rate tables should be included with Cost Proposal.
Inter-city P2P Ethernet 500Mbps	MetroEthernet circuit of a specific size (as detailed in the Transport/Ethernet section of the Base Charges tab) authorized for use by the Commonwealth. Circuit terminates in two different metropolitan areas. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service. Rate tables should be included with Cost Proposal.
Inter-city P2P Ethernet 200Mbps	MetroEthernet circuit of a specific size (as detailed in the Transport/Ethernet section of the Base Charges tab) authorized for use by the Commonwealth. Circuit terminates in two different metropolitan areas. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service. Rate tables should be included with Cost Proposal.
Inter-city P2P Ethernet 100Mbps	MetroEthernet circuit of a specific size (as detailed in the Transport/Ethernet section of the Base Charges tab) authorized for use by the Commonwealth. Circuit terminates in two different metropolitan areas. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service. Rate tables should be included with Cost Proposal.

Commonwealth of Pennsylvania  
Telecommunications Managed Services - Resource Unit Definitions

Inter-city P2P Ethernet 50Mbps	MetroEthernet circuit of a specific size (as detailed in the Transport/Ethernet section of the Base Charges tab) authorized for use by the Commonwealth. Circuit terminates in two different metropolitan areas. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service. Rate tables should be included with Cost Proposal.
Point to Point - 1.5Mbps (intra-LATA)	Point-to-point circuit of a specific size (as detailed in the Transport/Point-to-point section of the Base Charges tab) authorized for use by the Commonwealth. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service.
Point to Point - 1.5Mbps (inter-LATA)	Point-to-point circuit of a specific size (as detailed in the Transport/Point-to-point section of the Base Charges tab) authorized for use by the Commonwealth. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service.
Point to Point - 45Mbps	Point-to-point circuit of a specific size (as detailed in the Transport/Point-to-point section of the Base Charges tab) authorized for use by the Commonwealth. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits and any backup circuits and associated usage, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service.
Alarm circuit	An unconditioned (i.e. dry-pair) leased pair of wiring for use with a Commonwealth operated alarm service.
<b>Transport / Frame Relay and ATM</b>	
Frame Relay	<b>Exhibit G contains a complete listing of current Commonwealth of Pennsylvania Frame Relay circuits. Offerors should utilize this inventory to calculate the monthly base charges for Frame Relay circuits. Please note, installation charges for Frame Relay circuits should be separated from the monthly base charges and depicted in the Transition Charges tab. RATE TABLES MUST BE SUBMITTED ALONG WITH THIS COMPLETE FORM.</b>
ATM	<b>Exhibit G contains a complete listing of current Commonwealth of Pennsylvania ATM circuits. Offerors should utilize this inventory to calculate the monthly base charges for ATM circuits. Please note, installation charges for ATM circuits should be separated from the monthly base charges and depicted in the Transition Charges tab. RATE TABLES MUST BE SUBMITTED ALONG WITH THIS COMPLETE FORM.</b>
<b>Transport / Internet</b>	
Broadband Internet Access	Consists of one Internet access account using broadband (e.g., DSL or cable modem) to connect to the Internet. Charges include all software, transport systems, and any equipment required to terminate the circuit.
Enterprise Internet Services	Includes the sum of the averages in Mbps of Inbound and Outbound for all general Internet traffic, FTP services, NTP service, External DNS services.
<b>Transport / ISDN</b>	
Data BRI	ISDN circuit authorized for use by the Commonwealth. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service.
Video BRI	ISDN circuit authorized for use by the Commonwealth. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service.
Video PRI	ISDN circuit authorized for use by the Commonwealth. Charges consist of the transport systems supporting the service including any equipment required to terminate the circuits, but shall exclude (a) any redundant circuits; and (b) the support and management and premise-based equipment and software supporting the service.
<b>Transport / Voice Service</b>	
Voice - Domestic Outbound: Off-Off per min. (Intrastate)	Please provide pricing for all service elements required to provide voice/data connectivity. Include in your pricing all material costs required for complete functionality (e.g., patch panels, cross-connect cable, cross-connect jacks).
Voice - Domestic Outbound: Off-On per min. (Intrastate)	A minute of usage for each of the services listed in the Transport - Voice Services category of Resource Units. Rate tables should be included with Cost Proposal.
Voice - Domestic Outbound: On-Off per min. (Intrastate)	A minute of usage for each of the services listed in the Transport - Voice Services category of Resource Units. Rate tables should be included with Cost Proposal.

Voice - Directory Assistance Calls	Includes all hardware, software and services required to process requests for Directory Assistance from the Commonwealth.
Voice - Directory Listing	Includes all services required to provide a Directory Listing authorized for use by the Commonwealth.
<b>Managed WAN Devices (Routers/Switches)</b>	
	A managed router or switch that includes fault monitoring, configuration management and performance management. Receives Gold service levels as defined in Schedule F-1 Service Level Matrix. Includes the system hardware and software. Includes standard reports and custom reports. Examples include Cisco 2000 (and below) Series routers, Cisco 2000 Series switches.
Gold Small Devices	
	A managed router or switch that includes fault monitoring, configuration management and performance management. Receives Gold service levels as defined in Schedule F-1 Service Level Matrix. Includes the system hardware and software. Examples include Cisco 3000 Series routers, Cisco 3000/4000 Series switches.
Gold Medium Devices	
	A managed router or switch that includes fault monitoring, configuration management and performance management. Receives Gold service levels as defined in Schedule F-1 Service Level Matrix. Includes the system hardware and software. Includes standard reports and custom reports. Examples include Cisco 7000 Series routers, Cisco 6000 Series switches.
Gold Large Devices	
	A managed router or switch that includes fault monitoring and configuration management. Receives Silver service levels as defined in Schedule F-1 Service Level Matrix. Includes the system hardware and software. Includes standard reports. Includes standard reports and custom reports. Examples include Cisco 2000 (and below) Series routers, Cisco 2000 Series switches.
Silver Small Devices	
	A managed router or switch that includes fault monitoring and configuration management. Receives Silver service levels as defined in Schedule F-1 Service Level Matrix. Includes the system hardware and software. Includes standard reports. Examples include Cisco 3000 Series routers, Cisco 3000/4000 Series switches.
Silver Medium Devices	
	A managed router or switch that includes fault monitoring and configuration management. Receives Silver service levels as defined in Schedule F-1 Service Level Matrix. Includes the system hardware and software. Includes standard reports. Examples include Cisco 3000 Series routers, Cisco 3000/4000 Series switches.
Silver Large Devices	
	A managed router or switch that includes fault monitoring. Receives Bronze service levels as defined in Schedule F-1 Service Level Matrix. Includes the system hardware and software. Includes standard reports. Examples include Cisco 2000 (and below) Series routers, Cisco 2000 Series switches.
Bronze Small Devices

MAC Managed WAN	Any activity related to a single original service request for the move, add, or change to the equipment and related software. One LAN MAC event could include one or more visits to the applicable work location. Must be initiated and authorized by a Commonwealth customer.
<b>Voice Systems</b>	<b>Voice and Video Support Services</b>
Voice Port Non-ISDN	An active Centrex, PBX, or key system port on a telephone switch that a non-ISDN phone can connect to and is authorized for use by the Commonwealth.
Voice Port ISDN	An active Centrex, PBX, or key system port on a telephone switch that an ISDN phone can connect to and is authorized for use by the Commonwealth.
Voice Mailbox - Basic	A voicemail box with Basic services that is authorized for use by the Commonwealth.
Voice Mailbox - Enhanced	A voicemail box with Enhanced services that is authorized for use by the Commonwealth.
Voice MAC	Any activity related to a single service request for the move, add, or change to the voice equipment and related software.
Auto Attendant Port - Basic	Auto Attendant with Menu Only option.
Auto Attendant Port - Enhanced	Auto Attendant with forms mailbox, transcriber mailbox or main menu options
VOIP Phone and Unified Mailbox	An active VOIP phone with voicemail services that is authorized for use by the Commonwealth.
PBX	Includes maintenance services for the system hardware and software. Exhibit F-6 lists the current PBX systems. Does not include PBX administration or management.
Key Systems	Includes maintenance services for the system hardware and software. Exhibit F-6 lists the current Key Systems. Does not include PBX administration or management.
ACD Call Centers	Includes all system hardware and software, maintenance and support. Includes queue slots, menu vectors, announcements, supervisor modules and reporting capabilities. Please refer to the Statement of Work for required activities. Exhibit J lists the current ACD Call Center information.
<b>Security Services</b>	<b>Please refer to the Statement of Work for required activities.</b>
IDS/IPS	Includes the maintenance, management and support of the platform operating system and security application required to detect and prevent malicious activity on the Commonwealth network. Excludes the system hardware and software.

Commonwealth of Pennsylvania  
Telecommunications Managed Services - Resource Unit Definitions

Proxy Servers	Includes the maintenance, management and support of the platform operating system and security application required to provide proxy services. Excludes the system hardware and software.
Remote VPN Subscriber	Consists of the services and necessary VPN software or hardware required to securely provide access to the Commonwealth network for authorized users from remote locations.
Email Scanning	Consists of the services and necessary software or hardware required to scan Commonwealth email prior to delivery to the Commonwealth email servers.
Co-managed Firewall - Small	Includes the maintenance, management and support of the platform operating system and security application required to provide perimeter security. Excludes the system hardware and software and rule base management.
Co-managed Firewall - Large	Includes the maintenance, management and support of the platform operating system and security application required to provide perimeter security. Excludes the system hardware and software and rule base management.
Fully managed small firewall	Includes the maintenance, management and support of the platform operating system and security application required to provide perimeter security. Includes rule base management. Excludes the system hardware and software.
Fully managed large firewall	Includes the maintenance, management and support of the platform operating system and security application required to provide perimeter security. Includes rule base management. Excludes the system hardware and software.
IDS/IPS - with hardware	Includes the maintenance, management and support of the platform operating system and security application required to detect and prevent malicious activity on the Commonwealth network. Includes the system hardware and software.
Proxy servers - with hardware	Includes the maintenance, management and support of the platform operating system and security application required to provide proxy services. Includes the system hardware and software.
Co-managed small firewall - with hardware	Includes the maintenance, management and support of the platform operating system and security application required to provide perimeter security. Includes the system hardware and software. Excludes the rule base management.
Co-managed large firewall - with hardware	Includes the maintenance, management and support of the platform operating system and security application required to provide perimeter security. Includes the system hardware and software. Excludes the rule base management.
Fully managed small firewall - with hardware	Includes the maintenance, management and support of the platform operating system and security application required to provide perimeter security. Includes the system hardware and software and rule base management.
Fully managed large firewall - with hardware	Includes the maintenance, management and support of the platform operating system and security application required to provide perimeter security. Includes the system hardware and software and rule base management.
<b>ISS Support</b>	
ADM Services for Commonwealth ISS application and infrastructure	The Commonwealth of Pennsylvania envisions this support as a monthly recurring charge. Please refer to the Statement of Work for the required activities and Exhibit F-1 for the list of current system hardware and software.
<b>COPANET Support</b>	
COPANET Support	The Commonwealth of Pennsylvania envisions this support as a monthly recurring charge. Please refer to the Statement of Work and Exhibit B - Current Environment for the required activities and infrastructure.
<b>Premise Wiring</b>	
Cable Installation (First 100 Ft.)	Please provide pricing for all service elements required to provide voice/data connectivity. Include in your pricing all material costs required for complete functionality (e.g., patch panels, cross-connect cable, cross-connect jacks). Rate tables should be included with Cost Proposal.
Cable Installation (per additional 100 Ft.)	Please provide pricing for all service elements required to provide voice/data connectivity. Include in your pricing all material costs required for complete functionality (e.g., patch panels, cross-connect cable, cross-connect jacks). Rate tables should be included with Cost Proposal.
<b>Payphones</b>	
Payphones	Includes all equipment, maintenance, services and support. Please refer to the Statement of Work for required activities.
Payphones with TTY Devices	Includes all equipment, maintenance, services and support. Please refer to the Statement of Work for required activities. TTY devices are telecommunications devices for the deaf.

**Cost Data \* - 5-E Financial**  
**Contractor's Coin/Card Public Telephone Charges**

**Type: Independent Local and Intralata Toll Calling -- Public Telephones Rates submitted:**

MCI Response: The following rates are the standard Local/IntraLATA rates that Network PTS, MCI's Subcontractor providing the requested Coin/Card Public Telephone service, charges in Pennsylvania for 0+0-/00- calls. Network PTS can charge up to these rates and is willing to match LEC tariffed rates or anything in-between. The Commonwealth may choose the rates that Network PTS will charge in the Independent LEC areas. These rates are not connected in any way to the Discounted Operator Services that the Contractor is offering (see section 1.5-A.2. Other Features).

Rate Per Minute	\$0.45	
Collect -- Automated	\$3.45	
Billed to Third Party -- Automated	\$N/A	
Calling Card Automated	\$1.75	
Credit Card Automated	\$1.75	
Collect Operator Assist	\$3.45	
Billed to Third-Party -- Operator Assist	\$5.50	
Person-to-Person Operator Assist	\$9.95	
Calling Card -- Operator Assist	\$3.45	
Credit Card -- Operator Assist	\$3.45	
Operator Dialed	\$ _____	This is the same as Operator Assisted
		Operator Assisted Collect \$3.45
		Operator Assisted Calling Card \$3.45
		Operator Assisted Bank Card \$3.45
		Operator Assisted Third Party \$5.50
Directory Assistance	\$0.45	
Per Call Compensation	\$0.60	<u>for the Pay Station Service Charge</u>

**Type: Interstate Calling -- Public Telephones**

MCI Response: Listed below are the proposed Network PTS Interstate Calling -- Public Telephone Rates. With regard to the requested Percent Value of the gross value of a call, MCI submits that the Per Call Compensation is a fixed \$.60 per cal..

Rate Per Minute	\$1.15	
Collect -- Automated	\$5.99	
Billed to Third Party -- Automated	\$N/A	
Calling Card Automated	\$4.99	
Credit Card Automated	\$4.99	
Collect Operator Assist	\$7.50	
Billed to Third-Party -- Operator Assist	\$12.50	
Person-to-Person Operator Assist	\$12.50	
Calling Card -- Operator Assist	\$7.50	
Credit Card -- Operator Assist	\$7.50	
Operator Dialed	\$ _____	This is the same as Operator Assisted
		Operator Assisted Collect \$7.50
		Operator Assisted Calling Card \$7.50
		Operator Assisted Bank Card \$7.50
		Operator Assisted Third Party \$12.50
Directory Assistance	\$7.50	
Per-Call Compensation	\$0.60	<u>for the Pay Station Service Charge</u>

% of gross value of call (for example: \$ \_\_\_ call would be and additional \$ \_\_\_ charge) (pass through to the federal government -- no commission paid on USP fee)

Attachment 13-B -- Section 1  
Commission Data \*  
5-E Financial

Having carefully read this Request for Proposal and associated instructions and addend, the undersigning representing the Contractor, hereby agrees to provide public coin/card telephone service to the Commonwealth in accordance with its response and to pay commissions to the Commonwealth as specified below.

Contractor's should complete the following form by inserting a commission percentage and calculating the annual dollar commission in column one (1) and in column two (2) Contractor's estimated of gross revenue for comparison purposes only.

**MCI Response:** MCI has read, understands and will provide the public coin/card telephone service to the Commonwealth in accordance with its response to RFP requirements and per payphone one-time installation charges and monthly recurring charges as listed in Attachment 13-A of this Cost Section.

With regard to MCI's calculation of commissions paid to the Commonwealth on collected Public Coin/Card revenue, MCI submits that the direct cost to provide the requested Public Coin/Card Telephone Service outweighs the Agency paid per phone charge and end user revenue that will be collected by MCI. As a result, no commissions have been offered for payment by MCI to the Commonwealth or any using Agency.

Finally, with regard to the requested MCI provided calculated revenue to be provided in Column 2 below, MCI utilized the Commonwealth provided revenues and as such has restated these revenues.

<u>System A</u>	<u>Column 1:</u>	<u>Column 2:</u>
Local and IntraLata calls from coin/card telephones:		
2004 Annual Local Gross Billed Revenue	<u>\$127,188.62</u>	<u>\$127,188.62</u>
2004 Annual IntraLata Gross Billed Revenue	<u>\$72,584.14</u>	<u>\$72,584.14</u>
Commission Percentage:		0%
Annual Dollar Commission:		<u>\$0.00</u>
<u>InterLata calls from coin/card telephones:</u>		
2004 Annual Gross Billed Revenue	<u>\$232,563.92</u>	<u>\$232,563.92</u>
Commission Percentage:		<u>0%</u>
Annual Dollar Commission:		<u>\$0.00</u>

Signature: \_\_\_\_\_

**Cost Data \* - 5-E Financial**  
**Contractor's Coin/Card Public Telephone Charges**

Charges for coin/card public payphone if Contractor will not install a commission based coin/card payphone because either, the existing or potential low revenues. If an agency still requires coin/card public payphone services the Contractor would charge the agency for providing the services as indicated below:

**MCI Response:** MCI has proposed the following one-time installation and monthly recurring charges.

The following listed installation charges will apply to all new payphone installations and will be billed directly to each applicable using Agency. Installation charges by payphone type and enclosure have been provided below with description of each. These charges will apply to any and all MCI installed payphones, including any existing Agency payphones as listed in the RFP as amended, that will be required to be installed by MCI to allow MCI to continue to provide payphone services to the existing using Agencies. The only payphones that will be exempt from the below listed installation charges will be the existing 289 PTS installed payphones, provided by PTS under its subcontract agreement with Verizon under the existing Commonwealth payphone contract today, that may remain installed following contract award.

The monthly recurring per payphone charges listed below will apply to ALL payphones inclusive of any and all existing Agency installed payphones and new payphone installations. MCI will bill each using Agency directly on a monthly basis for the applicable monthly recurring per payphone charges.

Installation cost to install a coin/card public payphone  
 (If no change put \$0.00)

### 73. PREVAILING MINIMUM WAGES

Where applicable, the Contractor is subject to and shall comply with the provisions, duties, obligations, remedies and penalties of the Pennsylvania Prevailing Wage Act, 43 P.S. Sections 165-1 through 165-17 and its regulations 34 Pa. Code §§ 9.101 through 9.112, which are incorporated herein by reference as if fully set forth herein. The Contractor shall pay no less than the wage rates including contributions for employee benefits as determined by the Secretary of Labor and Industry (hereinafter referred to in this paragraph as "Secretary") for each craft or classification of all workers needed to perform this contract during the term hereof for the county in which the work is to be performed. In compliance with said Pennsylvania Prevailing Wage Act, the Prevailing Minimum Wage Predetermination, as approved by the Secretary, is attached hereto and made a part hereof.

- a. The provisions of this paragraph shall apply to all work covered by the Prevailing Wage Act which will be performed on the contract by the Contractor and all subcontractors. The Contractor shall insert in each of its subcontracts all of these required contract provisions and stipulations contained in this paragraph and such other stipulations as may be required.
- b. No worker may be employed on the public work except in accordance with the classifications set forth in the decisions of the Secretary. In the event that additional or different classifications are necessary, the procedure set forth in section 8 of the Act (43 P.S. § 165-8) and § 9.107 of the Act's Regulations (relating to petition for review of rates and hearings) shall be followed.
- c. Workers employed or working on the public work shall be paid unconditionally, regardless of whether any contractual relationship exists or the nature of a contractually relationship which may be alleged to exist between a contractor, subcontractor and workers, at least once a week without deduction or rebate, on any account, either directly or indirectly, except authorized deductions, the full amounts due at the time of payment, computed at the rates applicable to the time worked in the appropriate classification. Nothing in the contract, the Prevailing Wage Act or its Regulations prohibits the payment of more than the general prevailing minimum wage rates as determined by the Secretary to any worker or public work.
- d. The Contractor and each subcontractor shall post for the entire period of construction the wage determination decisions of the Secretary, including the effective date of changes thereof, in a prominent and easily accessible place or places at the site of the work and at the place or places used by them to pay workmen their wages. The posted notice of wage rates shall contain the following information:
  - (1) The name of project.
  - (2) The name of public body of which it is being constructed.
  - (3) The crafts and classifications of workmen listed in the Secretary's general prevailing minimum wage rate determination for the particular project.
  - (4) The general prevailing minimum wage rates determined for each craft and classification and the effective date of changes.

- (5) A statement advising workers that if they have been paid less than the general prevailing minimum wage rate for their job classification or that the Contractor or subcontractor are not complying with the act or the regulations in any manner whatsoever, the worker may file a protest in writing with the Secretary of Labor and Industry within 3 months of the date of the occurrence, objecting to the payment to a Contractor to the extent of the amount due or to become due to them as wages for work performed on the public work project.. A worker paid less than the rate specified in the contract shall have a civil right of action for the difference between the wage paid and the wages stipulated in the contract, which right of action must be exercised within 6 months from the occurrence of the event creating the right.
- e. The Contractor and subcontractors shall keep an accurate record showing the name, craft or classification, number of hours worked per day, and the actual hourly rate of wage paid including employee benefits, to each worker employed by the Contractor or subcontractor in connection with the public work. The record shall include deductions from each worker. The record shall be preserved for 2 years from the date of payment and shall be open at reasonable hours to the inspection of the public body awarding the contract and to the Secretary or the Secretary's authorized representatives.
  - f. Apprentices shall be limited to numbers in accordance with a bona fide apprenticeship program registered with and approved by the Pennsylvania Apprenticeship and Training Council and only apprentices whose training and employment are in full compliance with The Apprenticeship and Training Act (43 P.S. §§ 90.1 – 90.10), approved July 14, 1961 and the regulations issued thereto shall be employed on the public work project. A worker using the tools of a craft who does not qualify as an apprentice within the provisions of this subsection shall be paid the rate predetermined for journeymen in that particular craft or classification.
  - g. Wages shall be paid without deductions except authorized deductions. Employers not parties to a contract requiring contributions for employee benefits which the Secretary of Labor & Industry has determined to be included in the general prevailing minimum wage rate shall pay the monetary equivalent thereof directly to the workers.
  - h. Payment of compensation to workers for work performed on public work on a lump sum basis, or a piece work system, or a price certain for the completion of a certain amount of work, or the production of a certain result shall be deemed a violation of the Act, regardless of the average hourly earnings resulting therefrom.
  - i. Each Contractor and each subcontractor shall file a statement each week and a final statement at the conclusion of the work on the contract with the contracting agency, under oath, and in form satisfactory to the Secretary, certifying that workers have been paid wages in strict conformity with the provisions of paragraph. If wages remain unpaid, to the Contractor or subcontractor shall set forth the amount of wages due and owing to each worker respectively. A copy of the form entitled "Contractor's or

Subcontractor's Weekly Payroll Certification for Public Works Projects" is attached hereto.

- j. Before final payment is made, a final wage certification must be submitted by all contractors and subcontractors.
