STATE FOREST TRACT NO. 007

CONTRACT NO.
M-110007-16

OIL AND GAS LEASE FOR STATE FOREST LANDS

THIS AGREEMENT made and entered into on this 20th day of January 2010 (the "Effective Date"), by and between the COMMONWEALTH OF PENNSYLVANIA (the "Commonwealth"), acting through the **DEPARTMENT OF CONSERVATION AND NATURAL RESOURCES**, hereinafter designated "Department" or "Lessor" and **SENECA RESOURCES CORPORATION**, with its principal place of business at 1201 Louisiana Street, Suite 400, Houston, TX 77002, and authorized to do business within the Commonwealth of Pennsylvania (the "Lessee").

WITNESSETH:

WHEREAS, Lessor is authorized pursuant to the Section 302(a)(6) of the Conservation and Natural Resources Act 18 of 1995 ("CNRA") Act of June 28, 1995, P.L. 89, No. 18 (71 P.S. §§1349.302(a)(6)), to lease State Forest lands for oil and gas development when such disposition is deemed by Department to be in the best interest of the Commonwealth; and

WHEREAS, Department has made a determination that the leasing of oil and gas rights in the premises hereinafter described will be in the best interests of the Commonwealth and has authorized leasing of the same; and

WHEREAS, the proposed leasing of said lands was duly advertised as required by law and on the completion of a competitive, sealed bid submission received by Department on or before January 12, 2010, and with bids submitted pursuant to such advertising, Lessee herein was found to be the highest responsible bidder.

NOW THEREFORE, in consideration of the foregoing and the mutual promises contained herein, and intending to be legally bound, the parties agree as follows:

1. LEASE TERM

1.01 Department hereby leases to Lessee all that certain tract of land known as **TRACT NO. 007** containing approximately **10,493 acres**, as approximately shown on the map in **Exhibit "A"** and more particularly described in **Exhibit "B"**, both of which are attached hereto and made a part hereof, and referred to hereinafter as the "leased premises," for the sole purposes of (1) exploring, drilling, operating, producing, and removing of oil, gas and liquid hydrocarbons; and (2) at locations approved by the Department, laying pipelines and constructing roads, tanks, towers, stations, and structures thereon to produce, save, take care of, and transport extracted products.

1.02 This lease shall remain in force for a term of ten (10) years from the Effective Date, subject to the conditions hereinafter set forth, particularly Section 20 (First Well) providing for the drilling of the first well within the first five (5) years of the Effective Date of the lease, and shall continue from year-to-year thereafter so long as oil or gas is produced in paying quantities from the leased premises in accordance with the terms of this lease or as long as Lessee demonstrates to the Department's satisfaction bona fide attempts to secure or restore the production of oil or gas by conducting drilling, or reworking operations on the leased premises.

2. LEASE RECORDING AND PUBLIC NOTICE

2.01 Within ninety (90) days following the receipt by Lessee of a fully executed copy of this lease, Lessee shall both record the lease in the county or counties in which the leased premises lie, and also provide a copy of the recorded lease to the Department which clearly shows the recorded reference data. Thereafter, Department shall publish at least the following information in the *Pennsylvania Bulletin*:

- (a) Subject of this lease;
- (b) General location of the leased premises;
- (c) Names of Department and Lessee; and
- (d) Recording reference data for this lease.

3. RENTAL

3.01 Lessee shall pay to Department a bonus rental payment of **FOUR THOUSAND SIX HUNDRED TWENTY FIVE DOLLARS (\$4,625)** per acre for the leased premises for the first year, which equates to a total payment of **FORTY EIGHT MILLION FIVE HUNDRED THIRTY THOUSAND ONE HUNDRED TWENTY FIVE DOLLARS (\$48,530,125.00)**, no later than **5:00 p.m. EST, Friday, March 12, 2010**.

3.02 Lessee shall pay to Department rental for the leased premises for the second, third and fourth year of the lease in the amount of TWENTY DOLLARS (\$20.00) per acre each year, payable no later than the anniversary of the Effective Date of this lease. For the fifth year and all subsequent years thereafter, Lessee shall pay to Department THIRTY-FIVE DOLLARS (\$35.00) per acre each year, payable on the anniversary of the Effective Date of this lease.

3.03 The drilling of each well in the leased premises shall reduce the rental set out in the preceding paragraph by the amount of rental on the number of acres attributable to each well as provided in Section 21 (Subsequent Wells), which reduction shall become effective on the next rental date, provided the well is producing in paying quantities. If such wells are drilled on a unit created by a spacing order issued by the Department of Environmental Protection Bureau of Oil and Gas Management, or on a unit created by a voluntary unitization agreement entered into with the approval of Department, a well drilled on such unit shall reduce the rental above set out by the amount of rental attributable to the acreage contained in the portion of the leased premises included in such unit.

3.04 If during a rental year a well capable of producing natural gas on the leased premises is shut-in, suspended, or otherwise not produced and the natural gas is not used or marketed therefrom,

Lessee shall pay Department a rental payment for each such well at the full rental rate per acre for the "acreage attributable to the well", as referred to in Section 21 (Subsequent Wells) of the lease.

4. GAS ROYALTY

4.01 Lessee shall operate each well with a discrete well meter at the well site, which will measure all the gas produced from that well. Lessee shall ensure that all meters are maintained according to industry standards.

4.02 Lessee shall pay to Department, as royalty, THIRTY-FIVE CENTS (\$0.35) per thousand cubic feet (Mcf) or EIGHTEEN PERCENT (18%) of the market value, whichever is higher, for all marketable natural gas, marketable casinghead gas, or other marketable gaseous substances produced and sold or utilized by Lessee at the wellhead from each gas well drilled on the leased premises; the amount to be paid to Department shall be the royalty rate (either \$0.35/Mcf or 18% of the market value; whichever is higher) multiplied by the fractional interest held by Department and shall be payable monthly at the market price received for natural gas at the sales meter at the time of delivery.

4.03 Department may, at its option, however, demand that Lessee deliver to the credit of Department, as royalty, free of cost, in the pipeline to which Lessee may connect its wells, the equal 18% part of all marketable gas and other marketable gaseous substances produced and saved from the leased premises; the amount to be delivered to Department will be the EIGHTEEN PERCENT (18%) part of the gas produced multiplied by the fractional interest held by Department in the oil and gas rights. Lessee shall calculate and deliver a gas balancing statement on a quarterly basis to the Department in order to ensure that the Department receives its EIGHTEEN PERCENT (18%) share of the marketable gas production. Adjustments for overage or underage delivery of the Department's EIGHTEEN PERCENT (18%) royalty share shall be made by reducing or increasing future delivery gas volumes to the Department's account.

5. OIL ROYALTY

5.01 Lessee shall pay to Department, as royalty, EIGHTEEN PERCENT (18%) of the field price per barrel (42 U.S. Gallons) at 60° F, produced and saved from the leased premises for all oil, condensate and other liquid hydrocarbons of like grade and gravity which prevails in that area on the day such oil and other products are run into the pipeline or into storage tanks; the amount to be paid to Department will be the EIGHTEEN PERCENT (18%) royalty multiplied by the fractional interest held by Department.

5.02 Department may, at its option, however, demand that Lessee deliver to the credit of Department, as royalty, free of cost, in the pipeline to which Lessee may connect its wells, the equal EIGHTEEN PERCENT (18%) part of all oil, condensate and liquid hydrocarbons produced and saved from the leased premises; the amount to be delivered to Department will be the EIGHTEEN PERCENT (18%) part of the oil produced multiplied by the fractional interest held by Department.

5.03 If oil, condensate, and other liquid hydrocarbons, each in paying quantities, should be developed from the same well, then the oil and the condensate, and other liquid hydrocarbons shall be saved.

5.04 Lessee shall provide tanks or other appropriate storage for accurately measuring any crude oil produced from the lease. Lessee shall gauge, measure, sample, and test all petroleum and petroleum products in accordance with API Standard 2500, "Measuring, sampling, and testing crude oil," Second Edition, March 1961, or as subsequently amended by the same authority. Observed gravity at the observed temperature shall be corrected to (API) gravity and volume at sixty degrees Fahrenheit (60° F) as per the American Society for Testing Materials and the Institute of Petroleum, "ASTM-IP petroleum measurement tables" (ASTM designation No. 1250; IP designation 200).

6. PAYMENTS

6.01 Lessee shall be held responsible for the payment of all rentals and royalties. **Payments shall be mailed to:**

Commonwealth of Pennsylvania
Department of Conservation and Natural Resources
Bureau of Forestry - Minerals Section
P.O. Box 8552
Harrisburg, PA 17105-8552

All checks shall be made payable to the Commonwealth of Pennsylvania. Payments of royalties shall be made monthly within ninety (90) days after each monthly sales period.

6.02 Lessee shall submit statements by individual wells of the production and sales of oil, gas, other hydrocarbon products, and other products within ninety (90) days after each monthly sales period.

6.03 When Lessee has failed to make any payment due under this lease for thirty (30) days, Lessee shall pay an additional twelve percent (12%) annual interest on the overdue amount calculated from the time payment was due. Payment of such interest shall not waive Lessee's duty to make timely payments under this lease or limit Department's remedies for Lessee's failure to pay on time.

7. GAS MEASUREMENT

7.01 The volume of gas produced, saved, and marketed shall be measured according to American Gas Association (AGA) standards, Boyle's Law for the measurement of gas under varying pressures, and on the following:

- (a) The unit of volume for the purpose of measurement shall be one (1) cubic foot of gas at a temperature of sixty degrees Fahrenheit (60° F) and an absolute pressure of 14.73 pounds per square inch.
- (b) The average absolute atmospheric pressure shall be assumed to be 14.4 pounds to the square inch, regardless of actual elevation or location of Point of Delivery above sea level or variations in such atmospheric pressure from time to time.

- (c) The temperature of the gas passing the meters shall be determined by the continuous use of a recording thermometer installed in a manner that properly records the temperature of the gas flowing through the meters. The arithmetic average of the temperature recorded each 24-hour day shall be used in computing gas volumes. If a recording thermometer is not installed, or if installed and not operating properly, an average flowing temperature of sixty degrees Fahrenheit (60° F) shall be used in computing gas volume.
- (d) The specific gravity of the gas shall be determined by tests made by the use of an Edwards or Acme gravity balance, annually, or at such intervals as are found necessary in practice. Specific gravity so determined shall be used in computing gas volumes.
- (e) The deviation of the natural gas from Boyle's Law shall be determined by tests annually or at such other shorter intervals as are found necessary in practice. The apparatus and the method to be used in testing shall be in accordance with recommendations of the Natural Bureau of Standards of the Department of Commerce, or Report No. 3 of the Gas Measurement Committee of the American Gas Association, or any amendments thereof, or any other mutually agreed upon method. The results of such tests shall be used in computing the volume of gas delivered hereunder.
- (f) Gas compositional analyses by chromatograph or other approved methods shall be completed as necessary or upon written request and within a timeframe specified by the Department, for the determination of gas composition, specific gravity and BTU content. A copy of the results of all such analyses, whether completed at the specific request of the Department or not, shall be provided by the Lessee to the Department for its records within ninety (90) days of the date of the test.
- (g) The following factors used in the calculation of produced gas volumes shall be clearly specified on the meter statements:

- Basic orifice factor (F_b)
- Reynolds number factor (F_r)
- Expansion factor (Y)
- Pressure base factor (F_{pb})
- Temperature base factor (F_{tb})
- Flowing Temperature factor (F_{tf})
- Specific gravity factor (F_g)
- Supercompressibility factor (F_{pv})

8. AUDITS

8.01 Lessee shall furnish to Department, at its request, the meter charts covering the production of each well on the leased premises. Department may keep such charts for examination for a period not to exceed one-hundred and twenty (120) days. Lessee shall furnish or secure for Department promptly any statements furnished to Lessee by any person or corporation to whom Lessee delivers for sale or transport any oil, gas, or other products produced from the leased premises.

8.02 Lessee further authorizes and directs any person, association, company, partnership, corporation, or other entity to whom it sells or furnishes oil, gas, or liquid hydrocarbons produced from any well covered by this lease to disclose and exhibit accounts and other instruments to representatives of Department at Department's request having to do with the transactions involving payment to Lessee, its heirs, administrators, executors, successors, and assigns for oil, gas, or liquid hydrocarbons from wells covered by this lease.

8.03 Lessee further grants to Department or Department's designated representative the right, at any time, to examine, audit, or inspect books, records, and accounts of Lessee pertinent to the purpose of verifying the accuracy of the reports and statements furnished to Department, and for checking the amount of payments due under the terms of this lease. Lessee agrees to provide every aid or facility to enable such audit to be made by Department. If such audit should disclose any gross error (i.e., deficiency of equal to or greater than 3% of reported volume) or fraud by Lessee in payment of royalties, then Lessee shall pay the cost and expense of the audit together with the deficiency. However, in case of fraud by Lessee, such payments shall not preclude Department in its discretion from terminating this lease upon delivery to Lessee of written notice of Department's intention.

9. INTERPRETATION

9.01 In case of ambiguity, the lease shall always be construed in favor of Lessor and against Lessee.

10. LIMITATION ON WARRANTY

10.01 The Commonwealth is considered to be the owner of the oil and gas rights under the leased premises but makes no warranty as to the presence of oil and gas, nor as to its ownership thereof. In the event of a determination by compromise or by a final judgment of a court of competent jurisdiction that the Commonwealth does not have title to all or part of the oil and gas rights on the lands hereby leased, the Lessee shall pay the Department royalties thereafter accruing in proportion to the Commonwealth's ownership. Any sums of money previously paid pursuant to the terms of the lease shall not be reimbursable to Lessee, except as hereinafter provided in this paragraph. In the event of an adverse claim affecting title to all or a portion of the oil and gas rights under the leased premises, notice of such claim will be given to Department which may, with the approval of the Attorney General, enter into an escrow arrangement for future royalties accruing to such disputed portion under terms and conditions proper to safeguard the rights and interests of the Commonwealth. In the event an adverse claimant files suit against the Commonwealth or against Lessee claiming title to all or a portion of the oil and gas rights under the leased premises, or if the Lessee, after receiving notice of an adverse claim, institutes litigation in a court of competent jurisdiction to secure an adjudication of the validity of the claim, the royalties accruing to the litigated portion shall be placed in an escrow account until such time as the ownership of the disputed interest shall be determined by a court of competent jurisdiction. The royalties placed in escrow shall be refunded at the direction of the court in an amount proportionate to the outstanding title if it is finally determined by compromise or by a court of competent jurisdiction that all or part of such rights are not owned by the Commonwealth.

10.02 This proportionate reduction clause shall not apply to and shall not reduce the bonus payments or rents payable under this lease.

11. LAWS, RULES AND REGULATIONS

11.01 Nothing in this Lease shall in any way be so construed as to impair the powers, privileges or duties of the Commonwealth, or its representatives, in the execution of the laws of the Commonwealth or the applicable rules and regulations promulgated thereunder, now in force or hereafter enacted or adopted.

11.02 The Lessee is solely responsible for obtaining any and all local, State or Federal permits or other approvals necessary for and associated with any of the operations related to this lease, and shall be held liable by the Commonwealth, any agency of the Commonwealth, or any other local or Federal authority for the violation or non-compliance of any relevant laws, rules, and regulations.

11.03 Lessee shall strictly adhere to all rules, regulations and requirements governing the withdrawal and use of surface and ground waters as administered by the Department of Environmental Protection, the Susquehanna River Basin Commission, the Delaware River Basin Commission, or any other river basin commission, agency or authority having designated jurisdiction of the waters of the Commonwealth. In addition, Lessee shall obtain written authorization from the District Forester prior to using surface waters located on State Forest lands as a take point for fracing or any other well drilling or well development operations. Department reserves the right to deny any such request(s) without cause.

11.04 This lease does not constitute an estate or interest in submerged lands pursuant to Section 15 of the Dam Safety and Encroachment Act, act of November 26, 1978, P.L. 1375, No. 325, as amended, 32 P.S. § 693.15.

12. INDEMNITY AND HOLD HARMLESS

12.01 Lessee shall, at all times hereinafter, indemnify and hold harmless Department from and against all detriment, damage, loss claims, demands, suits, expenses, or other claims of any kind whatsoever which Department may sustain, suffer, or be subject to directly or indirectly by reason of the location, obstruction, presence, maintenance, renewal, or removal of the operations permitted by this lease or resulting therefrom.

12.02 In no case shall Department waive its right to assert a defense of sovereign immunity to any claim for damages, pursuant to the authority contained in the JARA Continuation Act of 1980, Act of October 5, 1980, Public Law 693, No. 142, as amended, or any other legal authority established in the Commonwealth which permits use by the Commonwealth of a sovereign immunity defense.

13. LIABILITY

13.01 Lessee shall be alone liable and responsible for any pollution or other damage to any portion of the environment in or adjacent to the leased premises which occurs as a result or consequence of Lessee's occupation and use of the leased premises, regardless of whether or not such pollution or

damage is due to negligence or to the inherent nature of Lessee's operations, unless an independent intervening cause is found to be the sole proximate cause of the pollution or damage. In any action for civil damages brought under this section, a presumption shall exist that, but for Lessee's occupation and use of the leased premises, the pollution or other damage would not have occurred; Lessee shall have the burden of presenting evidence to rebut this presumption. Any action for civil damages on account of such pollution brought by Department against Lessee shall not bar Department from bringing other actions under the Clean Streams Law or other pertinent laws, rules, or regulations of the Commonwealth.

13.02 Department shall not be liable to Lessee for any time during which the leased premises cannot be used.

14. ASSIGNMENTS

14.01 Lessee shall not use, or allow to be used, the leased premises for any purpose other than those specifically authorized by this lease and shall not assign or sublet the leased premises in whole or in part at any time or from time to time without the prior written consent of Department. Lessee shall make application to obtain such consent in writing accompanied by a plat to Department describing the land to be assigned and the interest therein if less than the whole, together with the interest retained by assignor. Assignee shall agree in writing to be bound by all of the terms and provisions of the lease and shall furnish a surety or performance bond satisfactory to Department. Upon Department's consent to the assignment and assignee's assumption of all liability under this lease arising or accruing subsequent to the date of such assignment as to the part or parts so assigned, Lessee shall be released from all such liability; and assignee shall be deemed to have assumed and be responsible for the covenants, conditions, and obligations of this lease as to the part or parts assigned. In the event that a portion only of the leased premises is assigned, the default of any of the covenants, conditions, or obligations of this lease by one of the holders of a portion of the leased premises created by an assignment will not affect the interests of a party not in default.

14.02 In the event that the Lessee enters into a "Farmout Agreement" with a third party for the purpose of allowing a "Farmer" to explore, develop, or produce oil and/or gas from the leased premises, or any portion thereof, Lessee shall be liable for enforcing all the provisions of this lease, including the posting of the required plugging sureties for each and every well drilled and operated by the Farmer. Although the Department recognizes a right of the Lessee to farmout its leased premises or portions thereof from time-to-time, Department will hold the Lessee solely responsible for the enforcement of all the provisions of this lease.

15. RELATED AGREEMENTS

15.01 Upon request by the Department, Lessee shall furnish a copy of all agreements made, contracts entered into, and all letters or other memoranda made by or provided to the Lessee which in any way concern the development, operation, or sale of products related to this lease.

16. FINANCIAL SECURITY

16.01 BONUS PAYMENT SECURITY - Lessee shall provide the Department with an irrevocable letter of credit in a form acceptable to Department in the amount of ten percent (10%) of the total bonus rental payment due under Section 3.01 of this lease. The Department shall consider security consistent with this requirement provided to the Department by Lessee at the time Lessee submits its bonus bid to satisfy this requirement upon the Effective Date of the Lease.

16.02 PERFORMANCE SECURITY – Not later than March 12, 2010 Lessee shall provide Department with financial security in a form acceptable to Department (*i.e.*, surety bond, irrevocable letter of credit with evergreen provisions, bank certificate of deposit, *etc.*) for the principal sum of **TWENTY-FIVE THOUSAND DOLLARS (\$25,000.00)** conditioned on the faithful performance by Lessee of the covenants of this lease. The performance security shall be further conditioned that, in the event Lessee shall fail to remove its equipment and machinery or properly abandon all wells within one (1) year from the termination of this lease, Commonwealth can execute upon the performance security provided to pay for cost of removal of the equipment and machinery and proper abandonment of the well or wells. In addition, the performance security shall be conditioned in favor of the Commonwealth for all damages that may arise as a result of fires, accidents, pollution, or any other causes brought about by Lessee or Lessee’s agents occupying the leased premises and in the use of all State Forest roads off the leased premises.

16.03 WELL PLUGGING SECURITY - Additionally, prior to acquiring any existing well on the leased premises, or upon the Lessee’s decision to keep a newly drilled well, Lessee shall provide Department with financial security in a form acceptable to Department (*i.e.*, surety bond, irrevocable letter of credit with evergreen provisions, bank certificate of deposit, *etc.*) in an amount equal to or exceeding the reasonably expected estimated total cost of plugging the well one (1) year after its completion as a producer or shut-in well. This well plugging security shall remain in effect until the plugging and abandonment of the well has been completed in compliance with applicable state law and the well site has been restored and re-vegetated to the satisfaction of District Forester. The minimum well plugging security coverage per well acceptable to Department as of the date of this agreement is as follows and shall be based on the well’s measured depth (MD), regardless of its true vertical depth (TVD):

<u>Measured Depth (MD)</u>	<u>Minimum Surety Amount</u>
Less than 5000’	\$ 10,000
5000’ to 8500’	\$ 30,000
8500’ to 10,000’	\$ 50,000
10,000’ and Deeper	\$100,000

16.04 Every five (5) years during the term of this lease, and effective on the anniversary of the Effective Date of this lease, new financial security amounts may be instituted at the option of Department by notice in writing from Department to Lessee at least six (6) months prior to the anniversary date. Such new security amounts shall equal the original security amounts set forth in paragraphs 16.02 and 16.03 herein adjusted for inflation so that the security amounts will adequately cover the expected lease

obligation costs prevailing at the time of adjustment. The new adjusted security amounts will be rounded off to the nearest ONE THOUSAND DOLLARS (\$1,000.00) and will be computed by multiplying the original security amounts set forth herein by a ratio derived from the Producers Price Index for All Commodities using a base of 1982 = 100, compiled and issued monthly by the U.S. Department of Labor's Bureau of Labor Statistics, as follows:

The numerator of the ratio shall be the index number for the item "All Commodities" for the month appearing in the issue of the index most recently preceding the anniversary when the security adjustment is made.

The denominator of the ratio shall be the index number for the item "All Commodities" for the month of **September 2009**. The parties agree that such index number is **174.6**.

If the base period of such index should change to other than 1982 = 100, the aforementioned numerator shall be adjusted by the usual method of linkage of base periods to the end that the ratio shall accomplish its purpose; namely, to adjust the dollar amount of the security or securities for changes in the price level between the date of this agreement and the date when the adjustment is made.

In the event such monthly index should be discontinued, or a new or revised one substituted therefore by the Bureau of Labor Statistics or other agencies of the United States of America, such new or revised or other similar index shall be used for the purpose of computations as described in this paragraph, using such conversion factors or other devices which may be generally recognized or adopted in connection with requirements based on this index.

17. COMPREHENSIVE AND POLLUTION LIABILITY INSURANCE

17.01 Lessee shall, at its sole expense, provide and maintain in full force and effect during the term of this lease general comprehensive liability insurance in an amount not less than TWO HUNDRED FIFTY THOUSAND DOLLARS (\$250,000) for each occurrence and ONE MILLION DOLLARS (\$1,000,000) aggregate, which shall cover Lessee and Department for damage claims including, but not limited to, personal injury, accidental death, and property loss that may arise from operations conducted under this lease or any occurrence on or about the leased premises whether such operations are by Lessee or anyone directly, or indirectly, employed by Lessee. Department shall be named as additional insured as their interests may appear on Lessee's liability insurance. Lessee shall also maintain equivalent insurance coverage for the operation of its motor vehicles.

17.02 Lessee shall, at its sole expense, provide and maintain in full force and effect during the term of this lease such pollution liability insurance as shall protect the Commonwealth, the Lessee and its contractors, if any, from claims of environmental impairment and pollution that may arise during the execution of this lease. The amount of pollution liability insurance shall not be less than \$1,000,000.00 per occurrence and \$2,000,000.00 in the aggregate. Department shall be named as additional insured as their interests may appear on Lessee's liability insurance.

17.03 Lessee or its insurer shall be liable to Department for any damage done to Commonwealth property as the result of Lessee's operations.

17.04 Lessee shall provide Department with a certificate of insurance for its comprehensive general liability insurance and pollution liability insurance demonstrating the above coverage prior to beginning its operations on the leased premises.

17.05 Lessee shall advise Department of the cancellation of any insurance policy or surety bond required by this lease immediately upon receipt of notice by Lessee of the cancellation and in no event later than the effective date of the cancellation.

17.06 Lessee shall provide Department, upon Department's request, proof of current insurance policy in full force and effect as described in Section 17.01.

18. DEEP WELL CONTROL INSURANCE AND SAFETY

18.01 Prior to the beginning of well-drilling operations on a true vertical depth (TVD) well of 10,000 feet or deeper, Lessee shall acquire well-drilling insurance coverage in an amount estimated to be sufficient as specified below to cover control of well, seepage and leakage, pollution, cleanup and contamination, unlimited redrilling and/or reworking expenses, and equipment in Lessee's care, custody and/or control. This insurance coverage shall be continuously maintained until the cessation of any well-drilling operations, well-reworking operations, well-completion operations and well-to-pipeline-hookup operations. Lessee shall have Department listed as an additional insured on its well-drilling insurance policy.

18.02 Lessee shall obtain well-drilling insurance in the amount of at least TWENTY MILLION DOLLARS (\$20,000,000.00) for wells drilled into the Trenton-Black River formation unless Department waives or modifies this amount in writing upon Lessee's request.

18.03 Lessee shall provide a complete copy of the Well Control Insurance Policy to Department and shall not commence well drilling operations until Department has given its written acceptance of the Well Control Insurance Policy. Lessee shall not seek to terminate the well-drilling insurance coverage without prior written approval of Department.

18.04 At a minimum, the Lessee-Assured shall ensure that the Well Control Insurance Policy complies with and includes the following provisions, or provide alternate provisions which are acceptable to the Department:

- (1) A minimum of a 10,000 psi double ram and a 5,000 psi annular blowout preventer and a fully operational remote closing device should be used for the well operation and tested successfully at least every thirty (30) days.
- (2) No well should be drilled ahead unless the "leak off" pressure determined by the most recent casing shoe test or formation integrity test (as measured by mud weight equivalent in pounds per gallon) exceeds the hydrostatic pressure extended by the actual mud weight in use by at least 0.5 pounds per gallon.

- (3) No wells should be drilled with an open hole section of length greater than 8,000 feet.
- (4) When the Assured is the Operator of a producing or shut-in well insured hereunder, the Assured should not allow casing pressure which exceeds seventy-five percent (75%) of the rated burst pressure for a continuous period of greater than three (3) months.
- (5) When the Assured is the Operator of the well insured hereunder, the Assured should conduct a reasonable review of the drilling and/or workover contractor's personnel and equipment, to ensure that:
 - (a) The contractor's equipment is of adequate size capacity and pressure rating to perform all anticipated operations;
 - (b) The contractor has crews with a reasonable level of experience and maintains at least one employee with well-control certification on location at all times; and
 - (c) The contractor's tubulars, choke manifold and other pressure-rated equipment are tested satisfactorily prior to commencement of operations.

19. OPERATIONS, PROTECTION AND CONSERVATION

19.01 Lessee shall carry on all operations under this lease with all due diligence and in a good and workmanlike manner, in accordance with the best and most up-to-date oil and gas field practices.

19.02 Lessee is responsible for conducting its operations in such a manner so as not to interfere with the rights of other grantees, licensees, or lessees of the Commonwealth, or any other third parties who may have an interest in the State Forest lands located in the vicinity of the area covered by this lease, including areas of ingress and egress.

19.03 Before any earthmoving activities take place, Lessee shall prepare a soil erosion and sedimentation control plan as required by Department of Environmental Protection or applicable County Conservation District office. A copy of the plan shall be forwarded to the District Forester upon request.

19.04 Lessee shall construct a fence around all potentially dangerous surface structures or equipment to prevent public access, including any fencing deemed necessary by the District Forester to protect the public. All equipment which is unguarded and unfenced shall be posted with hazard warning signs.

19.05 Lessee shall conduct all operations in compliance with the following:

(a) STIPULATIONS FOR PROTECTION AND CONSERVATION OF STATE FOREST LANDS set forth in **Exhibit "C"**, attached hereto and made a part hereof;

(b) INVASIVE PLANTS AND REVEGETATION GUIDELINES FOR STATE FOREST LANDS set forth in **Exhibit "D"**, attached hereto and made a part hereof.

(c) OIL AND GAS LEASE ACCESS ROAD SPECIFICATIONS FOR STATE FOREST LANDS, identified as **Exhibit "E"**, attached hereto and made a part hereof.

20. FIRST WELL

20.01 Lessee shall commence a well ("First Well") on the leased premises, or on unitized acreage containing a portion of the leased premises, within five (5) years from the Effective Date of this lease and shall proceed with due diligence to complete the First Well. In the event the First Well is not commenced within the five (5) year period, this lease shall automatically terminate in its entirety, unless the Department, in its sole discretion, provides Lessee with written notice of an extension of the period to commence the First Well at least thirty (30) days prior to the fifth anniversary date of this lease. An extension shall be granted only when the Department considers it to be in the best interests of the Commonwealth.

20.02 The rental rate provision of the lease shall not be affected by such extension of the 5-year first-well deadline. Additionally, the granting of an extension shall in no way affect the anniversary dates of this lease, or the rights and responsibilities of Department and Lessee associated therewith.

21. SUBSEQUENT WELLS

21.01 If the First Well drilled by Lessee, or any subsequent well, is productive of oil and/or gas, and the well is expected to return the investment and operating costs on that well during the anticipated productive life of the well to its economic limit, then Lessee shall drill an additional well on the leased premises or on a unit containing a portion of the leased premises, but not necessarily on the portion of the leased premises contained within the unit, if such a well would be drilled by an ordinary prudent operator acting under the same or similar circumstances. If Lessee concludes an additional well is not justified, then Lessee shall submit to Department the information upon which its conclusion is based. If upon review of such information, Department determines that an additional well should be drilled, then Lessee shall have the option of drilling an additional well within two (2) years from Department's determination or releasing all of the acreage covered by the lease except for the following:

- (a) forty (40) acres around each well from which oil is produced as the principal product;
- (b) three-hundred twenty (320) acres around each well completed above the top of the Onondaga Formation from which gas is being produced as the principal product;
- (c) six-hundred forty (640) acres around each well completed below the top of the Onondaga Formation from which gas is being produced as the principal product; or
- (d) that amount of leased acreage actually contained within an established unit, whichever is less.

21.02 Lessee shall not be required under this provision to drill more wells than required or allowed under any spacing order, rule, or regulation of the Department of Environmental Protection Bureau of Oil and Gas Management, or in the absence of any such order, more than one well for each well completion depth horizon described in Section 21.01 above.

21.03 The amount of acreage around the subsurface location where oil and gas enters the well bore, commonly referred to as the "take point", included in a spacing unit ordered by the Department of Environmental Protection Bureau of Oil and Gas Management, or in the absence of any such order, the well completion depth horizons described in Section 21.01 above, shall be referred to elsewhere in the lease as "acreage attributable to a well," which comprises acreage directly above the subsurface "take point."

22. DEVELOPMENT AND WELL SPACING

22.01 Lessee agrees to drill such wells as a reasonably prudent operator would drill under the same or similar circumstances and after discovery of oil or gas on the leased premises, to develop and produce from the described leased premises efficiently, economically, without waste, and to the best advantage of Department.

22.02 Lessee is limited to FORTY (40) well pad locations, or a total disturbance of two-hundred (200) acres, whichever shall occur first, on the leased premises. For the purpose of this lease, centralized impoundments will be treated as a "well pad location". Lessee shall have the option to drill vertical or horizontal well(s), or a combination thereof, from a single well pad location. Multiple wells drilled on the same well pad location may target different depths and horizons.

22.03 Upon written request by Lessee, Department may waive or modify, in writing, the number of well pad locations specified in Section 22.02 above if, in Department's judgment, such a waiver or modification is justified and in its best interests.

23. DRILLING RESTRICTIONS

23.01 Under Department's multiple use policy, the leased premises is continuously used for recreation, conservation and other purposes, and many other Department-authorized activities may be in progress on the lands. Hence, Lessee shall conduct its operations so as to minimize interference with the other Department authorized activities on these State Forest lands and shall comply with the following restrictions.

No drilling or well site clearing is permitted within:

- (a) 200 feet of any building;
- (b) 200 feet of any stream or body of water;
- (c) 300 feet of any stream or other body of water designated by the Department of Environmental Protection's Environmental Quality Board as being Exceptional Value Waters;
- (d) 300 feet of any picnic area or sheltered area which has been so designated by Department;
- (e) 300 feet of any trail, road, existing right-of-way or defining line of any scenic viewshed or municipal watershed;

- (f) 300 feet of any area of historic value, tree plantation, designated overlook, designated vista or fire tower site;
- (g) 300 feet of the boundary line of the leased premises;
- (h) 600 feet of the boundary line of State Park lands or of designated Wild and Natural Areas on State Forest lands; or
- (i) In addition the following specific restrictions for this lease shall also apply:

At the time of the issuance of this lease agreement, the Department has identified certain *Non-Development Areas* and *Areas of Special Consideration* on the leased premises as shown on **Exhibit "H"** and described as follows:

(i) No surface disturbance or development of any nature shall be allowed with the 6,665 acres more or less delineated as Non-Development Areas and shown on Exhibit "H"

(ii) Tract 007 contains approximately 8,913 acres more or less of special ecological features as shown on Exhibit "H". Lessee is required to carefully coordinate and pre-plan all exploration and development activities within these areas with District Forester and Ecological Services to prevent the unnecessary destruction of species, habitat, or a combination thereof. Additionally, due to the changing nature of the Department's environmental databases, such as the Pennsylvania Natural Heritage Program (PNHP), Lessee should check with District Forester before any construction project is initiated to avoid potential conflicts as these areas are subject to change without notice. Monitoring, mitigation, and/or avoidance measures may be required including, but not limited to, seasonal avoidance buffers or habitat enhancement measures.

(iii) Tract 007 contains approximately 3,190 acres more or less of high value standing timber as shown on Exhibit "H". Lessee is required to carefully coordinate and pre-plan all exploration and development activities within these areas with District Forester to prevent unnecessary harvesting of high value timber wherever possible.

(iv) Tract 007 contains approximately 1,283 acres more or less of scenic viewshed as shown on Exhibit "H". Lessee is required to carefully coordinate and pre-plan all exploration and development activities within these areas with District Forester to prevent unnecessary disruption of scenic viewshed wherever possible.

*** Due to the overlapping nature of certain features, the above-expressed acreage may be greater than the total tract acreage ***

Additionally, due to the changing nature of the Department's databases, such as the Pennsylvania Natural Heritage Program (PNHP), Lessee should check with the District Forester before any construction project is initiated to avoid potential conflicts.

23.02 Upon written request by Lessee, Department may provide written waiver or modification of any portion of the above restrictions if, in Department's judgment, such a waiver or modification is justified and in its best interests.

23.03 No drilling or production activity, including but not limited to well drilling and construction, pipeline construction, compressor station placement and construction, or road construction shall be permitted on the surface of any State Park, State Forest Wild Area, or State Forest Natural Area and no waiver of this provision may be granted.

24. DRILLING OPERATIONS

24.01 Lessee shall submit to Department and to District Forester for their approval as to location, a plat showing the location of each well before drilling is commenced, and no well shall be commenced until a permit has been issued by Department of Environmental Protection Bureau of Oil and Gas Management.

24.02 A legible sign listing the name and address of the well operator, the permit number, the farm name, and well number shall be placed in a conspicuous place near where the access road enters the well location. In addition, a legible sign listing the name of the operator and well number shall be attached or painted on the pumping unit, wellhead or meter box of each well.

24.03 Except where Lessee intentionally drills a deviated well to a bottomhole location not vertically beneath the well site, Lessee shall drill a straight hole to the best of its ability. The maximum point at which a well penetrates a producing formation shall not vary unreasonably from the vertical drawn from the center of the hole at the surface. Minor deviations will be permitted for short distances to straighten the hole, to sidetrack junk, or to correct other mechanical difficulties.

24.04 Lessee shall run a device for measuring deviation from the vertical periodically during the drilling of the well and at the total depth, if requested by Department.

24.05 After the completion of an intentionally deviated well, a complete angular deviation and directional survey of the well obtained by an approved well surveying company and certified as to correctness shall be furnished to Department.

24.06 Lessee shall maintain, at all times, the casing control equipment in such condition that will effectively control any oil, gas, or water encountered during operations in a well being drilled, tested, completed, or reconditioned. All drilling wells which are shallower than ten-thousand (10,000) feet shall be equipped with working blowout control equipment tested to twice normal hydrostatic pressure for the depth drilled, and tested to at least ten-thousand (10,000) psia for wells deeper than ten-thousand (10,000) feet that will completely close off the open hole and that will completely close off around any equipment being employed in the well and will be equipped with a bleed-off valve of the proper size and working pressure. If the blowout preventer is hydraulically operated, adequate pressure shall, at all times, be available for efficient operations. Blowout control equipment must be capable, in case of an emergency, to shut in the well at a point at least fifty (50) feet from the wellhead. For wells being serviced, blowout protection equipment shall be of sufficient capacity to control pressures and flow rates measured in the wells being serviced.

24.07 All wells shall be equipped with casing heads of rated working pressure not less than twenty-eight percent (28%) greater than the maximum rock pressure anticipated or rated to withstand test

pressure exceeding by ten percent (10%) the maximum well treatment or stimulation pressure anticipated, whichever is highest, with adequate connections and valves available to permit pumping mud-laden fluid between any two strings of casing at the surface. Reconditioning shall be required on any well showing pressure on the casing head, or leaking oil or gas between the producing string or next larger size casing string when such pressure or leakages assume hazardous proportions or indicate the existence of underground waste. No casing shall be perforated until adequate control equipment has been installed and is in good working order. Such control equipment shall consist of a Master Valve and Lubricator, or their equivalent. The entire equipment shall be in good working order and condition at all times.

24.08 Lessee shall test control equipment daily, to the extent possible, without causing premature removal of drill pipe from the hole while drilling, and record the results of such tests daily.

24.09 Whenever an inspection shows that the casing or control equipment at a well is not adequate, Department may prescribe remedial measures which shall be complied with before any further drilling.

24.10 Drilling mud or salt water of sufficient weight to prevent oil, gas, or water blowouts, or flows to the surface, shall be mixed and ready to use in wells prior to drilling any reservoir deemed by Department to be capable of flowing liquid or gas to the surface.

24.11 All casing, tubing, and equipment used in the drilling and completion of a well should be in good condition and adequate in strength for the depths to be drilled and the pressures that may be encountered.

24.12 Lessee shall use a casing program which complies with oil and gas statutes, and rules and regulations of the Commonwealth, and which prevents the escape of oil, gas, or water out of one stratum into another, the pollution of fresh water supplies, and blowouts.

24.13 The surface casing shall extend from the surface to a depth below all fresh water zones known to exist in the field and adjacent area to protect them from contamination.

24.14 The production casing shall be of new or reconditioned pipe of a grade and weight designed to withstand the greater of the following pressures to which the casing is planned to be stressed:

- (a) The maximum anticipated rock pressure, at any point in the casing string, shall not stress the casing in yield greater than seventy-five percent (75%) of the A.P.I. specified internal yield pressure of the pipe at minimum yield, as shown in A.P.I. Bulletin 5-C-2, dated April, 1972, or later amendments.
- (b) If the well is to be fractured, the casing shall be designed so that the fracture pressure anticipated, at any point in the casing, does not exceed the A.P.I. specified internal yield pressure of the casing at minimum yield, as shown in A.P.I. Bulletin 5-C-2, or later amendments.

24.15 After cementing and before perforating or drilling-in, the casing shall be tested by pump pressure at the wellhead to a pressure twenty percent (20%) greater than the anticipated maximum

pressure at the wellhead. If, at the end of thirty (30) minutes, pressure shows a drop of fifty (50) pounds per square inch or more, the casing shall be repaired sufficiently to withstand the pressure test described herein. After corrective operation, the casing shall again be tested in the same manner.

24.16 All surface casing and production casing shall be cemented in the ground with good quality cement equaling or exceeding A.P.I. specification in the manner hereinafter described.

24.17 Cementing of all casing strings shall be accomplished by pump and plug or another method approved by Department. Sufficient centralizers shall be attached to the casing to keep it centered in the hole during cementing.

24.18 An attempt shall be made to circulate the cement to the surface in cementing the surface casing. In cementing the surface casing, cement of sufficient quantity shall be used to fill the calculated annular space plus twenty percent (20%) back of the casing shoe to the surface. In the event that the cement cannot be circulated to the surface, due to the presence of fractures or other lost circulation zones, Lessee shall determine, as accurately as possible, the depth of the top of the cement in the annular space behind the surface casing and record it on the well record.

24.19 In wells where cement has not been circulated to the surface, there must be sufficient good quality cement in place in the annular space behind the casing to tightly hold the casing in place so that the escape of oil, gas, or water from one stratum to another, or to the surface, does not occur behind the casing.

24.20 Cement shall be allowed to stand a minimum of twenty-four (24) hours before drilling the plug or initiating tests. The waiting period for cement to harden may be reduced from twenty-four (24) hours upon approval by the Department.

24.21 Lessee, its agents, contractors and subcontractors, and employees of contractors and subcontractors, shall not allow the well to blow open, except in case of an emergency, over twenty-four (24) hours after drilling-in. Lessee will pay Department, at the regular royalty rate, for any gas allowed to escape, except in case of an emergency not caused by Lessee's operations, after this initial twenty-four (24) hour period. Such gas will be estimated by a method approved by Department.

24.22 After an initial open flow test has been taken, all future determinations of open flow potential shall be made by the United States Bureau of Mines, Back-Pressure Method (USBM Monograph 7) or by other methods standard to the industry and approved by Department.

24.23 The determination of the initial open flow of a well, as that phrase is used in this lease, shall be made before any attempts are undertaken to increase the flow of such well through mechanical or chemical stimulation.

24.24 Annually or when requested in writing by Department, Lessee will determine the open flow potential of each producing well as required in Section 24.21 and will also take a twenty-four (24) hour reservoir pressure test and will furnish Department a copy of the results of all such tests. Department may, at the request of Lessee, waive, in writing, all or parts of this requirement if, during any

calendar year, production averages less than sixty (60) Mcf per day and/or the pressure tests show reservoir pressures to be less than one hundred (100) psi.

24.25 Lessee shall, at all times, conduct prudent drilling operations including the setting and cementing of casing in such a manner as will permit the production of oil, gas, and liquid hydrocarbons, without waste and including the taking of all reasonable precaution by the use of proper equipment and drilling practices as will protect persons and property against fires and hazards from blowouts.

24.26 It is agreed that Lessee shall have the privilege of using sufficient water and gas from the leased premises, free of royalty, to run all machinery necessary for drilling thereon only.

24.27 Lessee shall take all safety precautions necessary to prevent the uncontrolled escape of H₂S (hydrogen sulfide) gas from oil and gas wells and facilities.

24.28 In areas where H₂S is known to be present in the formations that are to be drilled, Lessee shall:

- (a) Install adequate emergency shutdown equipment, H₂S gas detection and monitoring equipment, hazardous condition alarms and personnel safety equipment, particularly protective breathing apparatus at all facilities where H₂S gas in concentrations exceeding 100 ppm is anticipated or used.
- (b) Make gas masks and portable H₂S gas detectors readily available for use at all sites, particularly drill sites, where H₂S gas is anticipated or used.
- (c) After H₂S has been initially detected by any device, conduct frequent checks of all areas of poor ventilation with a portable H₂S detector.
- (d) Use special steel pipe and casing which is resistant to H₂S gas stress cracking, in wells and facilities handling the gas in concentrations exceeding 100 ppm.
- (e) Quickly notify and evacuate, if necessary, all persons in the vicinity if dangerous quantities of H₂S gas uncontrollably escape from oil or gas facilities.
- (f) Post warning signs around all well sites or other facilities handling toxic H₂S gas in concentrations exceeding 100 ppm. The warning signs should be visible on all approaches to, and at a safe distance from, all facilities handling the H₂S gas, including warning markers on all pipelines which may be used to transmit the toxic gas.
- (g) Install a fence around any fixed surface facility handling H₂S gas in concentrations exceeding 100 ppm and keep the gate locked.

24.29 During well drilling and production operations, in order to reduce night lighting pollution in designated dark sky areas, Lessee is required to utilize drilling rigs equipped with fully shielded lighting consistent with Occupational Safety & Health Administration (OSHA) regulations.

24.30 Upon written request by Lessee, Department may waive, in writing, any portion of the above drilling requirements if, in the Department's judgment, such a waiver is justified by new technology or knowledge and/or will be in the best interest of the Commonwealth.

25. WELL RECORDS, LOGS AND REPORTS

25.01 Lessee shall keep a daily drilling record which describes the formations penetrated, and the depth and volumes of water, oil, gas, and liquid hydrocarbons found while drilling each well on the leased premises. An accurate well location plat and any other data that are acquired during the drilling and completion operations for each well, including but not limited to those items listed in Section 26.01 (Confidentiality), shall be provided to the Department within ninety (90) days of the data's collection, or upon oral or written request by the Department and within a timeframe specified by the Department. All above-described data shall be submitted in both hard-copy and digital forms. Digital well logs shall be submitted in .LAS format.

25.02 Upon Department's request, samples of all formations penetrated and parts of cores taken, accurately labeled with the API number of the well and depth interval of collection, shall be furnished to Department at Lessee's expense within one (1) year after completion of each well.

25.03 If the Lessee collects rock samples including but not limited to whole rock core, parts of core, and cuttings from any well borehole(s) on the leased premises and no longer plans to retain the samples at its own or contracted storage facility, Lessee must first offer the rock samples to the Department before their disposal or sale. The rock samples shall be accurately labeled with the API number of the well and depth interval of collection. The Department shall make arrangements for the collection and transport of the rock samples at its own expense.

25.04 Upon written request and within a timeframe specified by the Department, Lessee shall provide Department with production and pressure test data, production and pressure decline curves, gas analysis data including BTU value determinations, water and waste disposal records, well stimulation and treatment records, maintenance records and reports, and/or any other data or records for any well(s) which the Department deems necessary to protect its interests.

26. CONFIDENTIALITY

26.01 Records that Lessee provides to the Department may be subject to public disclosure under the Pennsylvania Right-To-Know Law, act of February 14, 2008, P.L. 6, No. 3, 65 P.S. § 67.101 *et seq.* Lessee shall advise Department in writing of any records submitted pursuant to this lease that contain trade secrets or confidential proprietary information. Department shall maintain such records solely for use by the Commonwealth as provided below and shall not disclose such records to any third party unless Lessee consents or Department is directed to do so pursuant to a court order. The Department shall notify Lessee of any request received for such records.

26.02 Department shall maintain the following well-related documents solely for use by the Commonwealth for a period of three years from the date the well is spud unless (1) Lessee does not advise Department that such records contain trade secrets or confidential proprietary information, (2)

Lessee does so advise Department, but nevertheless consents to disclosure of the records, or (3) Department is directed to disclose these records by court order:

- (a) all drill time logs
- (b) all electric well logs
- (c) all nuclear well logs
- (d) all acoustic or sonic well logs
- (e) all caliper or hole diameter measurement logs
- (f) all cement bond or integrity logs
- (g) all mud or geologic well logs
- (h) all dip measurement well logs
- (i) all well flow or production test data
- (j) all well completion data
- (k) all well fracturing and stimulation data
- (l) all well pressure tests or pressure data
- (m) all record of lost circulation zones and caving strata
- (n) all well casing records
- (o) all core analysis, mud log analysis
- (p) all well perforation records
- (q) all lithologic well logs
- (r) all written well history
- (s) all well cutting samples requested by Department
- (t) drill stem tests and charts
- (u) formation water analysis
- (v) and any other geophysical well data not specifically named.

26.03 Department shall maintain the following well related documents solely for use by the Commonwealth unless (1) Lessee does not advise Department that such records contain trade secrets or confidential proprietary information, (2) Lessee does so advise Department, but nevertheless consents to disclosure of the records, or (3) Department is directed to disclose these records by court order:

- (a) all raw preprocessed data on tapes, discs, or other storage devices
- (b) all processed data on tapes, discs, or other storage devices
- (c) all paper or reproducible copies of stacked seismic data presentations
- (d) all paper or reproducible copies of migrated seismic data presentations
- (e) all paper or reproducible copies of relative amplitude seismic data presentations
- (f) all paper or reproducible copies of premigrated stacked seismic data presentations
- (g) all paper or reproducible copies of depth conversion seismic data presentations
- (h) all paper or reproducible copies of amplitude versus offset seismic data presentations
- (i) all paper or reproducible copies of any attribute seismic data presentations
- (j) all post plot shot point and receiver location maps
- (k) all time-depth conversion charts or calculations
- (l) all velocity charts and calculations
- (m) all sonic/acoustic well charts and data calculated from well logs
- (n) all synthetic seismograms

- (o) all seismic models for tuning and velocity variation
- (p) and all other incidental or miscellaneous seismic related data or presentations.

26.04 Department shall maintain the following well related documents solely for use by the Commonwealth for the life of the lease unless (1) Lessee does not advise Department that such records contain trade secrets or confidential proprietary information, (2) Lessee does so advise Department, but nevertheless consents to disclosure of the records, or (3) Department is directed to disclose these records by court order:

- (a) meter charts
- (b) all third party statements related to Commonwealth's royalty volumes and payments
- (c) all internal account statements of Lessee or third party related to Commonwealth's royalty volumes and payments
- (d) all business books of the Lessee or third parties provided to the Commonwealth to substantiate Commonwealth's royalty volumes and payments
- (e) all Lessee and third party contracts related to the Commonwealth's royalty volumes and payments
- (f) all production agreements between Lessee and third parties related to Commonwealth's royalty volumes and payments
- (g) all farmout agreements between Lessee and third parties related to Commonwealth's royalty volumes and payments
- (h) all purchase and sale agreements between Lessee and potential purchaser of the leased premises
- (i) all agreements providing for areas of mutual interest between Lessee and third parties
- (j) and all other business documents and agreements provided to the Commonwealth that Lessee or a third party consider confidential trade secrets.

27. UNITIZATION

27.01 Lessee shall have the right, at any time or times, to pool and consolidate this lease, in whole or in part, or as to any stratum or strata, with lands or leases adjacent to or in the immediate vicinity of this lease, so as to constitute a unit or units for the purpose of entering with the owners and/or lessees into joint operating agreements providing for the joint operation and development of the leased premises, or portions thereof, with adjoining lands to prevent the drilling of an excessive number of wells, or of wells located too close to the boundary of this lease; provided, however, that such agreement and termination thereof shall not become valid unless and until the same shall have been approved in writing by Department; provided further, however, that if such joint operating agreements or unit agreements are entered into pursuant to a valid spacing or integration order, the approval of Department shall not be required.

27.02 Drilling, mining, or reworking operations upon, or production of oil or gas from any part of such unit shall be treated, for all purposes hereunder, as operations upon or production from the leased premises, provided that the Lessee is the owner of the off-lease property.

27.03 Upon production from any part of any such unit, Department shall be entitled to and Lessee shall pay royalties calculated as follows: a fractional part of the production shall be allocated to the portion of this lease included in such unit based on the ratio of the acres from the leased premises included in such unit to the total number of acres included in the unitized area, and Department shall be entitled to the royalties provided for in this lease on such fractional part of such production and no more; provided, that if State or Federal authorities shall prescribe a different method of allocation, the method so prescribed shall prevail.

28. OFFSETS

28.01 Upon the failure of Lessee to enter into a unitization agreement to protect affected acreage of the leased premises from drainage through offset wells, Lessee agrees to offset within sixty (60) days any well drilled on leases not owned by the Commonwealth which is completed within six hundred and sixty (660) feet of the boundary line of the leased premises and from which oil is being produced as the principal product, any well drilled on lands not owned by the Commonwealth which is completed within one-thousand six-hundred and seventeen (1617') feet (i.e., 60 acres) of the boundary line of the lease premises and from which gas is being produced as the principal product, or any well drilled on lands not owned by the Commonwealth which is completed within the radius of the drainage areas set by an order of the Department of Environmental Protection's Bureau of Oil and Gas Management; provided, however, that Lessee may present evidence to Department to show that such offsetting well is unnecessary or economically unsound. Upon review of such evidence, Department may, at its discretion, relieve Lessee of its obligation to drill the offsetting well. However, if Department determines that an offsetting well should be drilled, Lessee will have the option of drilling the well as required, or paying to the Commonwealth compensatory royalty on production from the offset well as if it had been drilled based on the production from the completed well which is to be offset and on the ratio the affected acreage bears to the total acreage which would have been drained by the well, or release all the acreage of the leased premises except:

- (a) forty (40) acres around each well from which oil is being produced as the principal product;
- (b) three hundred twenty (320) acres around each well from which gas is being produced as the principal product; or
- (c) that acreage attributable to a well by an order of the Department of Environmental Protection's Bureau of Oil and Gas Management if the affected acreage falls within an area subject to such a spacing order.

28.02 No well on the leased premises shall be shut in if drainage will occur through any well within the aforeprescribed distances for oil and gas wells on lands not owned by the Commonwealth and, if such draining gas wells are on compression, the offset wells on the leased premises shall be placed on compression, as long as safety and environmental integrity are maintained.

28.03 In cases where the offset drilling obligations of this section conflict with the drilling restriction provisions of Section 23, then the drilling restriction provisions of Section 23 shall take precedence and prevail unless waived in writing by Department.

29. OIL AND GAS PIPELINES

29.01 No large diameter, high-capacity natural gas transmission pipelines shall be constructed on the leased premises. Any proposed pipeline that will exceed twelve inches (12") in diameter shall be pre-approved, in writing, by both the District Forester and the Minerals Section of the Bureau of Forestry.

29.02 Lessee is granted the right to lay any necessary oil or gas gathering pipelines on or under the leased premises; however, a route map for each line shall be submitted, upon request and for approval, to the District Forester as to location prior to the laying of that line. Where Lessee's pipelines cross State Forest land not already leased to Lessee, Lessee must enter into the customary pipeline right-of-way agreement with Department.

29.03 Lessee does hereby agree that it will, at all times during the continuance and delivery of oil, gas, and liquid hydrocarbons to the market, keep, maintain, and repair its pipelines and equipment to the end that there shall be no leaks or waste of oil and gas and liquid hydrocarbons.

30. GAS STORAGE RIGHTS

30.01 No gas storage rights are demised to the Lessee by this lease.

30.02 If the Lessee wishes to develop the leased premises for gas storage, Lessee must first obtain a gas storage lease from the Department.

30.03 If the Lessee does not wish to develop the leased premises for gas storage, but in the Department's opinion the leased premises exhibits characteristics which indicates its potential for a gas storage reservoir, Department will so inform the Lessee in writing prior to the final plugging and abandonment of the wells and removal of the surface support equipment.

30.04 Any well and equipment identified by Department as necessary for the development of a gas storage facility on the leased premises and which is not planned for development by the Lessee shall first be offered to Department or its nominee or assignee in writing, at the then fair market value of the well and attendant equipment, at least one hundred twenty (120) days before Lessee begins abandonment procedures.

31. SEISMIC SURVEYS

31.01 Lessee, its agents, contractors and subcontractors, and employees of contractors and subcontractors shall have the right to conduct seismic surveys over and across the leased premises. Prior to conducting any seismic work, Lessee shall submit for approval to the District Forester, a map showing the proposed location of each and every seismic line. When Lessee's seismic lines cross State Forest lands not already under lease to Lessee, Lessee must obtain a separate seismic survey agreement from Department. The Department can execute upon the performance security required in Section 16 (Financial Security) of this lease for all damages that may arise as a result of Lessee's seismic surveys.

31.02 A final plat will be submitted to Department within ninety (90) days after completion of any seismic survey showing the location, elevation, and depth of shot holes drilled; and indicating which holes contained ground water, at what depth it occurred, and an estimate of the amount of flow.

31.03 During the term of this lease, a copy of all seismic data gathered or obtained from any seismic survey conducted on the leased premises will be made available to Department for review at any time after a period of one (1) year of the date of completion of each individual seismic survey. The Department may examine the information gathered in the seismic survey at the location where such information is normally maintained and worked by the Lessee during regular business hours. The Department hereby agrees that none of the seismic information examined by the Department's staff will be copied or taken from the Lessee's premises without the express written permission of the Lessee.

31.04 Upon termination of this lease, or earlier with approval of the Lessee, the Lessee shall submit to the Department a copy of all seismic data collected by the Lessee or the Lessee's agent which represents the leased premises, including but not limited to those items specified in Section 26.02 above. The submitted data may be in digital form, hard copy form (paper), or in a reproducible form (film or Mylar), and said data will be the "processed" version of the data. The presentation will include the stacked, migrated, and relative amplitude presentations in time as well as depth, if any or all of these presentations are generated from the processing procedures. Special processing, such as amplitude versus offset or any attribute processing, will be supplied in hard copy form only. All hard copies will be in industry standard format, and the digital copy will be presented in the format available or in a format Department requests, as long as it is an industry standard format. The Lessee will not be required to submit interpreted versions of the seismic data.

31.05 If a seismic survey is begun but not completed, any data collected even though incomplete shall be submitted to the Department within thirty (30) days after the seismic effort has been terminated. If the seismic effort is suspended for more than ninety (90) days, all data collected to the date the effort was suspended shall be submitted to the Department.

31.06 A "post plot" map will accompany both the hard copy and digital versions of the data identified in Sections 31.04 and 31.05 above, wherein the shot points are clearly marked on the map in reference to known landmarks or other reference points so that the location of all shot points can be clearly located. If multiple survey lines are completed during one survey, all lines will be shown on the post plot map in their correct relationship to one another with tie points clearly marked on the map as well as the seismic lines. All post plot maps will be provided at no cost to Department.

31.07 A Data Transmittal Listing is required by Department, to accompany the seismic information identified in Sections 31.04 and 31.05 above which shall be transmitted to Department. Department will acknowledge in writing its receipt of the transmitted information.

32. TEST OF WELL ECONOMY

32.01 For purposes of this lease, if a gas well does not produce more than an average of one (1) Mcf/day of natural gas in a calendar year (calculated by dividing its annual production in Mcf by 365 days), it shall be considered uneconomic (*i.e.*, not in paying quantities) to maintain and operate; and

if during the following calendar year gas production from the well also fails to exceed a one (1) Mcf/day average, Lessee shall plug and abandon the well as per Section 33 (Plugging), and restore the wellsite and access road to the satisfaction of District Forester, all no later than six (6) months after the end of the following calendar year.

This provision shall apply to all wells drilled or operated by Lessee on the leased premises, whether the wells are shut-in or producing, unless the Department has informed the Lessee that a well or wells falls under the provisions of Section 30 (Gas Storage Rights).

Department may, at its sole option and in writing, waive all or part of the requirements of this provision to Lessee, if in Department's judgment such a waiver is warranted by economic conditions or other circumstances, and is deemed to be in the best interest of the Commonwealth.

33. PLUGGING

33.01 Lessee shall properly and effectively plug all wells on the leased premises before abandoning, in accordance with the regulations of the Department of Environmental Protection Bureau of Oil and Gas Management and all applicable laws of the Commonwealth.

33.02 For any well drilled under the terms of this lease which shall be plugged, Lessee shall provide a proposed plugging plan to Department, and shall receive written approval of said plan prior to the Lessee filing a notice of intent to plug with the Department of Environmental Protection, Bureau of Oil and Gas Management. In the case of an emergency requiring the well to be plugged, the prerequisite of approval by the Department is waived, and plugging shall be completed as directed by the Department of Environmental Protection, Bureau of Oil and Gas Management.

33.03 In no case shall brush plugging be proposed or be used to plug any wells drilled under the terms of this lease.

33.04 A copy of the Certificate of Well Plugging showing the plugging procedure used and submitted to the Bureau of Oil and Gas Management shall be supplied to the Minerals Section, Bureau of Forestry for each well plugged and abandoned. In addition to the above-mentioned requirement, upon completion and plugging of a well, a permanent marker of concrete or any other marker approved by Department shall be erected over the well. The marker shall extend from ten (10) feet below the surface to at least two (2) feet above the surface. The name of the person, firm, company, or corporation by whom the well was drilled and the number of the well shall be stamped, cast, or otherwise permanently made a part of the marker. The erection of the marker shall in no way interfere with the vent pipe if one is required.

33.05 Failure to comply with the above plugging requirements may result in termination of this lease, in which case the well plugging financial security would be forfeited to fund the proper plugging of the well or wells by Department.

34. DEPARTMENT'S TERMINATION

34.01 If Lessee fails or refuses to pay any rental or royalty due under the terms of this lease or violates or fails to perform any other term or condition of this lease within thirty (30) calendar days after Lessee's receipt of written notification from Department of such refusal, violation or failure, Department shall have the right to terminate the lease.

35. LESSEE'S TERMINATION

35.01 Lessee may, at any time, or from time to time, surrender this lease or any portion thereof if Lessee is not then in default of any obligations under this lease; provided, however, that such surrender must be evidenced by written notice delivered to Department thirty (30) days prior to the effective date thereof, and that Lessee has performed all commitments with which Lessee is charged to the effective date of surrender. Any amount paid as an advance bonus or land rental, previous to the effective date of the surrender, shall be deemed liquidated damages due Department and shall be in no way prorated or subject to claim by Lessee for return to Lessee. The "First Well" provision shall not be regarded or construed as a commitment or obligation under this paragraph.

35.02 In the event that producing wells are to be retained, Lessee shall be entitled to retain that drainage acreage attributable to each well as previously provided under Section 21 (Subsequent Wells). Lessee shall deliver to Department a release or releases in duly recordable form approved by Department. Lessee shall be relieved of all obligations thereafter accruing as to acreage surrendered and any rental thereafter coming due shall be reduced in the same proportion that the acreage covered hereby is reduced; provided, however, that Lessee shall not be relieved of any obligation, including but not limited to the plugging and abandonment of wells, which accrues prior to such surrender even if the result caused by Lessee's performance or failure of performance of an obligation or covenant does not manifest itself until after the date of surrender.

36. FORCE MAJEURE

36.01 In the event that Lessee is prevented from complying in a timely manner with any time limit imposed in this lease solely because of a strike, fire, flood, act of God, or other circumstances beyond Lessee's control and which Lessee, by the exercise of all reasonable diligence, is unable to prevent, then Lessee may petition Department for an extension of time. An increase in the cost of performing the obligations set forth in this lease shall not constitute circumstances beyond Lessee's control. Lessee's financial inability to comply with any of the obligations of this lease shall not be grounds for any extension of time.

36.02 Lessee shall only be entitled to the benefits of this section if it notifies Department within five (5) working days by telephone and within ten (10) working days in writing of the date it becomes aware or reasonably should have become aware of the event impeding performance. The written submission shall include all necessary documentation, as well as a notarized affidavit from an authorized representative of Lessee specifying the reasons for the delay, the expected duration of the delay, and the efforts which have been made and are being made by Lessee to mitigate the effects of the event and to minimize the length of the delay. The initial written submission may be supplanted within ten (10)

working days of its submission. Lessee's failure to comply with the requirements of this paragraph specifically and in a timely fashion shall render this paragraph null and of no effect as to the particular incident involved.

36.03 Department shall decide whether to grant all or part of the extension requested on the basis of all documentation submitted by Lessee and other information available to Department. In any subsequent litigation, Lessee shall have the burden of proving that Department's refusal to grant the requested extension was an abuse of discretion based upon the information then available to it.

37. REMOVAL

37.01 Lessee shall have six (6) months after termination, abandonment, or surrender of the lease, or any part thereof, in which to plug and abandon all wells; remove all buildings, machinery, equipment, structures, unused pipelines, rubbish, and debris resulting from Lessee's operations; to fill and level all pits; and to the extent practicable, to restore the property to the same condition as when received.

38. RIGHTS RESERVED BY DEPARTMENT

38.01 Department reserves the right to use the leased premises in any and all respects not specifically limited by the terms of this lease.

38.02 Department reserves all minerals within the leased premises other than oil, gas and liquid hydrocarbons and shall have the right to lease those mineral rights to third parties insofar as Department is otherwise legally entitled to lease the same, subject to rights granted to Lessee under this lease.

38.03 Department reserves the right to approve, in writing, all plans for the construction upon the leased premises of structures, rigs, machinery, communication facilities, ways and roads, well locations, pipelines and equipment and for drilling of wells. Detailed written plans for any such construction shall be submitted to Department at least thirty (30) days prior to planned commencement of construction on the leased premises unless, upon due cause shown, Department waives the thirty (30) day requirement and allows a shorter, but reasonable, time for review.

38.04 The surface rights of Department shall be considered dominant and the oil and gas leasehold rights of Lessee servient. Any dispute between the parties hereto concerning surface use shall be resolved in favor of the interests of the public.

39. THIRD PARTIES' RIGHTS

39.01 For the purposes of inspection, the people of the Commonwealth shall have the same access to the leased premises, to Lessee's facilities on the leased premises, and to relevant records as Department (representatives of the Bureau of Forestry) has hereunder, provided that such access to Lessee's facilities on the leased premises is limited to non-hazardous areas during normal business hours, upon written approval, when in the accompaniment of a representative of Lessee, and provided further that access to records shall be limited to those records which are non-confidential in nature as defined within the lease agreement, Section 26 (Confidentiality).

40. DISPUTE RESOLUTION

40.01 In the event that Lessee wishes to dispute a decision made by Department, the following procedure shall be used:

- (a) Lessee shall notify the Department in writing of decision in dispute and provide Department with Lessee's position on the issue, along with all appropriate supporting documentation.
- (b) Within ten (10) business days from the date of the Department's receipt of the Lessee's written notice of the dispute, Department shall fix a time and place for a conference with Lessee to discuss the disputed decision.
- (c) The conference shall be held within thirty (30) days of the Department's receipt of the Lessee's written notice of the dispute, unless Department and Lessee agree to an extension of time for the conference.
- (d) At such conference, the Director of the Bureau of Forestry or his/her representative shall represent Department.
- (e) Department may continue the conference if supplemental data, maps or other information are required to evaluate the basis for Lessee's objections, if further review is needed to ascertain whether a mutually agreed upon settlement is consistent with the terms of the lease agreement, or if all parties to the conference agree that a continuance is beneficial to the resolution of the objection.
- (f) Any agreement(s) reached at the conclusion of the conference or follow-up discussions shall be consistent with the provisions of this lease. A record of such agreement(s) shall be documented in writing by the Department, copies of which shall be provided to the Lessee, the appropriate District Forester, and all other parties involved.

40.02 In the event that a party is dissatisfied with the decision(s) made as a result of the dispute resolution conference, it may submit the dispute to an appropriate forum, including a court, for further consideration or review. Any judicial review or court action shall be de novo.

41. CONTRACTOR INTEGRITY PROVISIONS

41.01 Lessee agrees to comply with the CONTRACTOR INTEGRITY PROVISIONS FOR COMMONWEALTH CONTRACTS, attached hereto as **Exhibit "F"**, and made a part hereof.

42. NONDISCRIMINATION CLAUSE

42.01 Lessee agrees to comply with the NONDISCRIMINATION CLAUSE, attached hereto as **Exhibit "G"**, and made a part hereof.

43. HEADINGS

43.01 The paragraph headings herein are for reference only and are not intended to have any legal force or effect.

44. RELEASE

44.01 Lessee shall not be granted a final release from the terms of this lease until all records and reports and other data described above have been provided to the Department, all wells required by the Department to be plugged have been plugged and plugging certificates provided, all other terms of this lease have been met, and the District Forester has met with Lessee's field engineer or other authorized representative on the ground, inspected the premises, and both parties have signed a Statement of Release indicating that any necessary site restoration has been completed. Said release shall not be unreasonably withheld by the Department. In the absence of a two-party signed Statement of Release, the Department shall accept the District Forester's findings based on his/her independent inspection of the leased premises. A copy of the release statement will be provided to the Minerals Section, Bureau of Forestry.

45. BINDING EFFECT

45.01 This lease shall be binding upon and inure to the benefits hereto, and their respective successors and permitted assigns.

[THE REMAINDER OF THIS PAGE IS INTENTIONALLY BLANK.]

IN WITNESS WHEREOF, Department and Lessee have caused this agreement to be duly executed by their proper officers, all hereunto duly authorized, on the date first above written.

OIL AND GAS LEASE FOR STATE FOREST LANDS ATTACHMENT

EXHIBIT "B"

Attached to and made a part of Oil and Gas Lease for State Forest Lands, No. M-110007-16, by and between: **COMMONWEALTH OF PENNSYLVANIA** and **SENECA RESOURCES CORPORATION**

Tract 007

State Tract 007 containing 10,493 acres of Tioga State Forest land consisting of 6 separate parcels Parcel "A" containing 2,252 acres comprising all of the Crandall & Emery, A. C. Bush and George W. Wood Warrants; and parts of the John Lucksiger, Samuel King, Abraham Crandall, Joseph E. Lyon and Isaac A. Crandall Warrants; and, Parcel "B" containing 1,927 acres comprising parts of Warrants 4464, 4465, 4467 and 4468; and, Parcel "C" containing 2,776 acres comprising parts of Warrants 4461, 4462, 4463, 4464 and 4465; and parts of the D. B. R. Dickinson, Isaac Crandall, Abraham C. Crandall and Jonathan Waters Warrants; and, Parcel "D" containing 3,296 acres comprising parts of Warrants 4456, 4458, 4459, 4460, 4461, 4462, and 4463; and part of the Abraham Crandall Warrant; and, Parcel "E" containing 221 acres comprising part of Warrant 4468 and Joseph E. Lyon Warrant; and, Parcel "F" containing 21 acres comprising a part of Warrant 4468, in Chatham, Delmar, Middlebury, and Shippen Townships, Tioga County, Pennsylvania, conveyed to the Commonwealth of Pennsylvania from C. B. Farr by deed dated August 26, 1904; from Wesley J. Root by deed dated January 12, 1954; Angie Bailey by deed dated August 22, 1956; from Ward Bastian by deed dated September 5, 1956; from D. S. Carsaw by deed dated November 20, 1911; from Pennsylvania Joint Lumber and Land Company by deed dated June 1, 1904; from Wesley J. Root by deed dated March 4, 1930; from Hiram Fuller by deed dated September 9, 1948; from E. H. Green, et al, by deed dated February 4, 1921; from H. H. Griswold by deed dated March 15, 1921; from Arthur S. Losinger by deed dated February 15, 1921; from Pennsylvania Joint Lumber and Land Co. by deed dated July 1, 1908; from Charles G. Van Valkenburg by deed dated December 30, 1904; from William D. Burdett and Eileen J. Burdett by deed dated June 22, 2001; and from Thomas H. Darlington by deed dated April 21, 1989, and described as follows:

Parcel "A" (2,252 acres)

Beginning at the northwest corner of the Samuel King Warrant, also being the northeast corner of Warrant 4072, also being a corner point on the Tioga State Forest boundary at the headwaters of Sweet Hollow approximately 22,350 feet west of the junction of State Route 249 and State Route 287 at Middlebury Center, Pennsylvania; thence eastward approximately 16,250 feet along the Tioga State Forest boundary which follows the north lines of the Samuel King, Crandall & Emery, George Wood and

Abraham Crandall Warrants to a corner point on the Tioga State Forest boundary; thence in a general southeasterly direction approximately 1,150 feet south, 2,300 feet east and 2,150 feet south along the Tioga State Forest boundary within the Abraham Crandall Warrant to a point on the east line of the Abraham Crandall Warrant, also being a point on or near the northwest corner of Warrant 1423; thence in a general southwesterly direction approximately 300 feet northwest, 1,600 feet west-southwest, 500 feet southwest, 2,250 feet west, 2,150 feet south, 2,100 feet west, 500 feet northwest, 200 feet west, 975 feet southwest and 800 feet south along the Tioga State Forest boundary which follows along the southern boundary of the Abraham Crandall Warrant and through the John Lucksiger and Joseph E. Lyon Warrants to a point on the south line of the Joseph E. Lyon Warrant, also being a point on the north line of Warrant 4468; thence westward approximately 6,600 feet along the Tioga State Forest boundary which follows the south line of the Joseph E. Lyon Warrant to a corner point on the Tioga State Forest boundary; thence in a general northwesterly direction approximately 2,400 feet north, 2,300 feet west, 325 feet south, 1,550 feet west, 1,675 feet north and 900 feet west along the Tioga State Forest boundary through the Joseph E. Lyon, Samuel King and Isaac Crandall Warrants to a point on the north line of the Isaac Crandall Warrant, also being a corner point on the western boundary of the Samuel King Warrant; thence northward approximately 3,275 feet along the Tioga State Forest boundary which follows the west line of the Samuel King Warrant to the northwest corner of the Samuel King Warrant, the place of the beginning.

Parcel "B" (1,927 acres)

Beginning at the southeast corner of Warrant 4468, also being the northeast corner of Warrant 4467, also being a corner point on the Tioga State Forest boundary approximately 22,000 feet north of the intersection of U. S. Route 6 and State Route 660 at Wellsboro, Pennsylvania; thence in a general southwesterly direction approximately 2,200 feet west, 1,100 feet south-southwest, 250 feet south-southeast, 2,200 feet south, 1,100 feet west, 1,650 feet north, 1,050 feet west, 1,650 feet south, 1,650 feet west, 1,950 feet south and 2,200 feet west-northwest along the Tioga State Forest boundary within Warrant 4467 to a point on the west line of Warrant 4467; thence northward approximately 2,500 feet along the Tioga State Forest boundary which follows the west line of Warrant 4467 to a corner point on the Tioga State Forest boundary on the west line of Warrant 4467, also being a point on the east line of Warrant 4465; thence in a general southwesterly direction approximately 3,300 feet west and 3,375 feet southwest along the Tioga State Forest boundary within Warrant 4465, to a point formed by the intersection of the Tioga State Forest boundary and the centerline of Schoolhouse Hollow Trail; thence in a general northwesterly direction approximately 3,700 feet along the centerline of Schoolhouse Hollow Trail within Warrant 4465 to a point formed by the junction of the centerlines of Schoolhouse Hollow Trail and Matson Road (or Trail); thence in a general northerly direction approximately 7,100 feet along the centerline of Matson Road within Warrants 4465 and 4464 to a point on the Tioga State Forest boundary within Warrant 4464; thence in a general easterly direction approximately 1,350 feet east, 1,550 feet south, 1,475 feet east, 1,525 feet north and 5,150 feet east along the Tioga State Forest boundary within Warrant 4464 to a corner point on the

Tioga State Forest boundary on the east line of Warrant 4464; thence southward approximately 2,950 feet along the Tioga State Forest boundary which follows the east line of Warrant 4464 to the southeast corner of Warrant 4464, also being the southwest corner of Warrant 4468; thence eastward approximately 2,400 feet along the Tioga State Forest boundary which follows the south line of Warrant 4468 to a corner point on the Tioga State Forest boundary; thence in a general northeasterly direction approximately 2,900 feet north, 1,100 feet east, 1,300 feet north, 1,350 feet east-northeast, 1,750 feet south and 3,675 feet east along the Tioga State Forest boundary within Warrant 4468, to a point on the east line of Warrant 4468; thence southward approximately 2,950 feet along the Tioga State Forest boundary which follows the east line of Warrant 4468 to the southeast corner of Warrant 4468, the place of the beginning.

Parcel "C" (2,776 acres)

Beginning at a point formed by the intersection of the Tioga State Forest boundary and the centerline of Canada Run Road (shown as Cranberry Road on the USGS Asaph 7 ½ Minute Topographic Quadrangle Map) in Warrant 4461, also being a point approximately 6,850 feet north 49° east of the junction of Straight Run Road and U. S. Route 6 at Marsh Creek, Pennsylvania; thence in a general north-northwesterly direction approximately 18,000 feet along the centerline of Canada Run Road (shown as the Cranberry and Baldwin Roads on the USGS Asaph 7 ½ Minute Topographic Quadrangle Map) through Warrants 4461, 4462 and 4463 and the Abraham Crandall Warrant to a point on the Tioga State Forest boundary within the Abraham Crandall Warrant; thence in a general southeasterly direction approximately 4,300 feet east, 1,100 feet north, 2,000 feet east, 1,650 feet south, 2,800 feet east, 2,050 feet south, 4,700 feet east, 250 feet south, 5,800 feet west, 2,300 feet south and 550 feet east along the Tioga State Forest boundary within the Abraham Crandall, Jonathan Waters and Isaac Crandall Warrants and Warrant 4464 to a point on the centerline of Matson Road (or Trail) within Warrant 4464; thence in a general southerly direction approximately 7,100 feet along the centerline of Matson Road within Warrants 4464 and 4465 to a point formed by the junction of the centerlines of Matson Road and Schoolhouse Hollow Trail; thence in a general southeasterly direction approximately 3,700 feet along the centerline of Schoolhouse Hollow Trail within Warrant 4465 to a point on the Tioga State Forest boundary; thence in a general southeasterly direction approximately 200 feet southwest and 2,950 feet southeast along the Tioga State Forest boundary within Warrant 4465 and the D. B. Dickinson Warrant to a corner point on the Tioga State Forest boundary situated on the northwest bank of Marsh Creek; thence in a general southwesterly direction approximately 1,300 feet along the Tioga State Forest boundary in the D. B. Dickinson Warrant to a corner point on the Tioga State Forest boundary on the east bank of Schoolhouse Hollow Run; thence in a general westerly direction approximately 2,475 feet northwest, 3,800 feet southwest, 3,800 feet west-southwest, 2,150 feet north and 1,700 feet west through the D. B. Dickinson Warrant and Warrant 4461 to a point formed by the intersection of the Tioga State Forest boundary and the centerline of Canada Run Road, the place of the beginning.

EXCLUDING from the above described premises an interior holding of privately owned land within Warrant 4463 described as follows:

Beginning at a point on the north line of Warrant 4463 situated approximately 3,150 feet east of the northwest corner of Warrant 4463, also being a point on or near a pipeline right-of-way; thence in a clockwise direction around the privately owned lands, approximately 3,950 feet east along the north line of Warrant 4463, 2,250 feet south, 475 feet west, 1,600 feet south, 1,575 feet west, 1,600 feet north, 1,850 feet west and 2,150 feet north along the Tioga State Forest boundary to a point on the north line of Warrant 4463, the place of the beginning.

Parcel "D" (3,296 acres)

Beginning at a point formed by the intersection of the Tioga State Forest boundary and the centerline of Straight Run Road in Warrant 4460; also being a point approximately 5,850 feet north-northwest of the junction of Straight Run Road and U. S. Route 6 at Marsh Creek, Pennsylvania, thence north-northwestward approximately 650 feet along the centerline of Straight Run Road within Warrant 4460 to a point formed by the junction of the centerlines of Straight Run Road and Left Straight Run Trail; thence in a general northwesterly direction approximately 14,600 feet along the centerline of Left Straight Run Trail through Warrants 4460, 4459, 4458, and 4456 to a point on the north line of Warrant 4456; thence eastward approximately 3,550 feet along the north lines of Warrants 4456 and 4458 to a corner point on the northern boundary of Warrant 4458, also being the southeast corner of Warrant 4455; thence northward approximately 2,050 feet along the east line of Warrant 4455, also being part of the northern boundary of Warrant 4458 and the western boundary of the Abraham Crandall Warrant to a corner point on the Tioga State Forest boundary, also being the northwest corner of the Abraham Crandall Warrant; thence in a general easterly direction approximately 3,700 feet east, 1,850 feet north, 1,150 feet east, 1,150 feet south, and 2,850 feet east along the Tioga State Forest boundary (which follows the northern boundary of, and passes into, the Abraham Crandall Warrant) to a point on the centerline of Canada Run Road; thence in a general south-southeasterly direction approximately 18,000 feet along the centerline of Canada Run Road (shown as the Baldwin and Cranberry Roads on the USGS Asaph 7 ½ Minute Topographic Quadrangle Map) past the Baldwin Fire Tower in the Abraham Crandall Warrant and through Warrants 4463, 4462 and 4461 to a point on the Tioga State Forest Boundary; thence in a general westerly direction approximately 1,300 feet west, 2,175 feet south, 725 feet west, 850 feet south, 550 feet west, 3,150 feet north, 2,500 feet west and 2,100 feet north along the Tioga State Forest boundary within Warrant 4461 to a point on the west line of Warrant 4461, also being a point on the east line of Warrant 4460; thence southwestward approximately 2,050 feet along the Tioga State Forest boundary and the centerline of Straight Run Road in Warrant 4460, the place of the beginning.

Parcel "E" (221 acres)

Beginning at a post and stones corner, said corner being within the Wilson Warrant 4468 by lands of the Commonwealth of Pennsylvania and lands herein described; thence through the James Wilson Warrant 4468 by lands aforementioned North 09 degrees 16 minutes 12 seconds East 1694.82 feet to a stones corner, said corner being common to warrant and lands aforementioned and also lands now or formerly of Samuel F. McInroy; thence by lands now or formerly of Samuel F. McInroy and lands herein described crossing Norris Brook, North 08 degrees 50 minutes 38 seconds East 801.90 feet to a point in or along the center line of S.R. 4014, said point being common to lands aforementioned and also by lands now or formerly of John Gleason; thence in or along Norris Brook Road S.R. 4014 by lands now or formerly of John Gleason and lands herein described the following three (3) courses and distances: (1) South 83 degrees 27 minutes 00 seconds East 58.95 feet to a point, (2) South 89 degrees 17 minutes 23 seconds East 63.01 feet to a point, (3) North 75 degrees 01 minute 24 seconds East 383.50 feet to a point in or along the center line of S.R. 4014 being common to lands aforementioned and also lands now or formerly of Elizabeth Root; thence leaving said road by land now or formerly of Elizabeth Root and other lands of Thomas Darlington, South 24 degrees 53 minutes 31 seconds East 136.86 feet to a point in or along the center line of Norris Brook, being common to lands aforementioned; thence down the center line of Norris Brook, through the James Wilson Warrant 4468 and the Joseph E. Lyons Warrant, by other lands of Thomas Darlington, lands now or formerly of Ralph Brown, lands now or formerly of Duane Wetmore, and lands herein described the following eleven (11) courses and distances: (1) North 65 degrees 32 minutes 33 seconds East 47.18 feet to a point, (2) North 86 degrees 36 minutes 06 seconds East 290.57 feet to a point, (3) South 83 degrees 54 minutes 27 seconds East 514.01 feet to a point, (4) South 77 degrees 20 minutes 25 seconds East 450.51 feet to a point, (5) South 80 degrees 56 minutes 01 second East 166.43 feet to a point, (6) South 67 degrees 22 minutes 56 seconds East 276.44 feet to a point, (7) South 86 degrees 24 minutes 50 seconds East 136.06 feet to a point, (8) North 76 degrees 58 minutes 34 seconds East 64.44 feet to a point, (9) South 76 degrees 26 minutes 58 seconds East 285.40 feet to a point, (10) South 74 degrees 42 minutes 46 seconds East 311.55 feet to a point, (11) South 77 degrees 38 minutes 39 seconds East 900.15 feet to a point in or along the center line of Norris Brook, in the East line of the Joseph E. Lyons Warrant, by other lands of Thomas Darlington, lands now or formerly of Arthur Shumway and lands herein described; thence leaving Norris Brook along the East and South lines of the aforementioned Warrant, by lands now or formerly of Arthur Shumway and lands herein described the following two (2) courses and distances: (1) South 31 degrees 58 minutes 32 seconds West 134.42 feet to an iron pin corner, (2) North 80 degrees 23 minutes 22 seconds West 198.04 feet to an iron pin corner in the East line of the James Wilson Warrant 4468; thence along the East line of said Warrant by lands last said, South 10 degrees 34 minutes 33 seconds West 2423.36 feet to a stones corner, said corner being common to lands aforementioned and lands of the Commonwealth of Pennsylvania; thence through the aforementioned Warrant by lands of the Commonwealth of Pennsylvania and lands herein described along the Middlebury and Delmar Township line the following two (2) courses and distances: (1) North 80 degrees 19 minutes 52 seconds West 1983.69 feet to a stones corner, (2) North

80 degrees 18 minutes 30 seconds West 1660.64 feet to a post and stones corner, the place of beginning.

Parcel "F" (21 acres)

Beginning at a point in the centerline of Pennsylvania Legislative Route 58020, said point being where the western boundary line of lands now or formerly of Samuel McInroy and the eastern boundary line of the lot herein conveyed intersects with said centerline; thence South 08° 40' West, a distance of 126.87 feet; thence South 06° 01' 43" West, a distance of 424.67 feet to a stake and stone corner; thence South 07° 26' 36" West, a distance of 1260.34 feet to a post and stone corner, said point being the Southeast corner of the lot herein conveyed; thence North 82° 07' 17" West along Pennsylvania State Forest lands a distance of 348.97 feet to an iron rod corner; thence North 06° 54' East, a distance of 1564.15 feet to a point in the centerline of Pennsylvania Legislative Route 58020; thence continuing North 06° 54' East, a distance of 1001.77 feet to an iron pin corner being the Northwest corner hereof; thence South 82° 58' 47" East along Pennsylvania State Forest lands, a distance of 213.77 feet to an iron pin and stones; thence South 83° 25' 35" East, a distance of 144.10 feet to a stake and stones corner, being the Northeast corner hereof; thence South 06° 51' 55" West along lands now or formerly of Samuel McInroy, a distance of 760.54 feet to a point in the centerline of said Pennsylvania Legislative Route 58020, the place of beginning.

NON-DEVELOPMENT AREAS

No surface disturbance or development of any nature shall be allowed within the 6,665 acres more or less delineated as *Non-Development Areas* and shown on Exhibit "H".

AREAS OF SPECIAL CONSIDERATION

Tract 007 contains approximately 8,913 acres more or less of special ecological features as shown on Exhibit "H". Lessee is required to carefully coordinate and pre-plan all exploration and development activities within these areas with District Forester and Ecological Services to prevent the unnecessary destruction of species, habitat, or a combination thereof. Additionally, due to the changing nature of the Department's environmental databases, such as the Pennsylvania Natural Heritage Program (PNHP), Lessee should check with District Forester before any construction project is initiated to avoid potential conflicts as these areas are subject to change without notice.

Tract 007 contains approximately 3,190 acres more or less of high value standing timber as shown on Exhibit "H". Lessee is required to carefully coordinate and pre-plan all exploration and development activities within these areas with District Forester to prevent unnecessary harvesting of high value timber wherever possible.

Tract 007 contains approximately 1,283 acres more or less of scenic viewshed as shown on Exhibit "H". Lessee is required to carefully coordinate and pre-plan all

exploration and development activities within these areas with District Forester to prevent unnecessary disruption of scenic viewshed wherever possible.

WELL SITES

Forty (40) well pad sites, or a total disturbance of two-hundred (200) acres, whichever shall occur first, will be permitted on Tract 007. For the purpose of this lease, centralized impoundments will be treated as a "well pad site". Well pad site size and location are subject to the terms of the lease agreement and the approval of the District Forester.

**COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF CONSERVATION AND NATURAL RESOURCES**

EXHIBIT "C"

**STIPULATIONS FOR PROTECTION AND CONSERVATION
OF STATE FOREST LANDS**

The lands embraced in this lease are leased by the Commonwealth of Pennsylvania, acting through the Department of Conservation and Natural Resources, hereinafter designated as "Lessor" or "Department." Lessee hereby agrees to the following stipulations:

1. Environmental Quality Control

1.01 Lessee shall take all necessary precautions and measures throughout the entire course of this lease to ensure strict compliance with all applicable Federal, state, and local laws and rules and regulations promulgated thereunder, whenever enacted, including but not limited to the following state statutes: the Air Pollution Control Act, as amended (Act of January 8, 1960, P.L. 2119, 35 P.S. 4001, *et seq.*); the Clean Streams Law, as amended (Act of June 22, 1937, P.L. 1987, 35 P.S. 691.1, *et seq.*); the Solid Waste Management Act, as amended (Act of July 7, 1980, P.L. 380, No. 97, 35 P.S. 6018.101, *et seq.*); the Oil and Gas Act, as amended (Act of December 19, 1984, P.L. 1140, No. 223, 58 P.S. 601.101 *et seq.*); and the Surface Mining Conservation and Reclamation Act, as amended (Act of May 31, 1945, P.L. 1198, 52 P.S. 1396.1 *et seq.*).

Lessee shall strictly adhere to all rules, regulations and requirements governing the withdrawal and use of surface and ground waters as administered by the Department of Environmental Protection, the Susquehanna River Basin Commission, the Delaware River Basin Commission, or any other river basin commission having designated jurisdiction of the waters of the Commonwealth [including, but not limited to the Water Resources Planning Act of 2002 (Act 220), 25 Pa Code Chapter 110; SRBC, 18 CFR Ch. VIII § 806.20 - § 806.25]

1.02 Notwithstanding any provision in this lease, Lessee shall be held liable by the Commonwealth of Pennsylvania, or any agency of the Commonwealth, for the violation of any relevant laws, rules, and regulations.

1.03 Before any surface or subsurface disturbance, Lessee shall acquaint itself with all of the applicable rules and regulations governed by each respective Act.

1.04 Prior to undertaking actual mining, drilling, or quarrying, Lessee shall confirm, in writing, to Lessor that it has reviewed and thoroughly understands the applicable requirements as contained in each of the aforementioned Acts.

1.05 During mining, drilling, or quarrying, Lessee shall comply with all of the current applicable rules and regulations of the foregoing Acts. Where any of the rules and regulations differ concerning abatement of pollution the more stringent rules shall apply.

1.06 Lessee shall, at all times, perform its work in such a manner as to substantially minimize the possibility of polluting the air land or waters of the Commonwealth with any materials harmful to the environment.

1.07 As development of the leased premises progresses and unforeseen circumstances arise that were not evident during the design, emergency pollution control programs shall be put into effect immediately by the Lessee. In such cases further instructions will be issued by Lessor and will be carried out by Lessee.

1.08 The Air Pollution Control Act of the Commonwealth prohibits the burning of any refuse, rubbish, brush, etc. in the designated air basins of the state, except by approval of the Department of Environmental Protection's respective Regional Air Pollution Control Engineer. Other emissions into the atmosphere are not permitted if they are injurious or hazardous to people, animals, or vegetation.

1.09 Lessee shall strictly adhere to all rules and regulations for collection, removal, transportation, and disposal of solid wastes. Littering of the leased premises will not be permitted.

1.10 The discharge of wastes to streams within the Commonwealth will not be permitted unless such discharges meet the standards of the Department of Environmental Protection.

2. Protection of Property and Operations

2.01 Lessee shall not use or allow to be used the State Forest lands for any other purpose than that authorized by this lease. District Forester will be advised when operations begin and end. Any changes in the original plans, which may be necessary subsequent to the beginning of operations, must be approved by District Forester and Lessor.

2.02 Permission to remove overburden must first be obtained from District Forester who will designate the extent of such removal.

2.03 Lessee shall not conduct any mining, quarrying, excavating, drilling, or stripping operations within sight of publicly traveled roads, unless specifically directed to by District Forester.

3. Public Land Use

3.01 Lessee hereby recognizes and admits that the leased premises are dedicated to the purposes set forth in Environmental, Health, Park, Fish and Game Laws, and Rules and Regulations and Department's Forest Resource Plans promulgated thereunder and Lessee agrees to conduct operations with deference to such purposes.

4. Hunting and Fishing

4.01 Employees of Lessee, its agents, contractors and subcontractors, and employees of contractors and subcontractors shall not engage in hunting or fishing upon said land, except as permitted by law.

5. Animals

5.01 Lessee shall prevent access of wildlife to pits or excavations dug for Lessee's operations by erecting and maintaining fences, or by other means approved by Department.

6. Slush Pit

6.01 Each slush pit will consist of two compartments; one to contain fluids from the drilling operations and the second to contain surface runoff from the drilling site. Unless authorized by Department, all slush pits will be located at approximately the same elevation as the drilling site.

Depending on the topography and slope conditions, the slush pit to contain surface runoff may be located below the drilling site and a safe and reasonable distance from the stream to which the effluent will be discharged. The slush pit used to contain drilling fluids, mud, and water, will be lined with plastic so that no escape of these fluids will occur. If said fluids contain oil or other chemical substances which are harmful to the forest environment, Lessee shall transport these fluids from State Forest lands for disposal. All waste materials from each drilling site will be disposed of at an approved disposal site. All pits shall be filled with earth and leveled at Lessee's expense upon completion of each well. However, nothing in this paragraph shall be construed to permit a violation of any laws, rules and regulations of the Commonwealth.

6.02 Before any operations commence, the location, design, construction, and maintenance of any slush pit must be approved by Department. Pollution potential and aesthetics shall be among the factors to be considered by Lessor.

6.03 If drilling operations are conducted with air, gas, or airfoam, Lessee shall also provide sufficient means by which dust and/or foam dispersal are abated, kept to a minimum, and shall not become a nuisance.

7. Siltation

7.01 Lessee agrees to have on site an approved site-specific Erosion and Sedimentation Control Plan in accordance with the Department of Environmental Protection's Rules and Regulations, Title 25, Chapter 102. Lessee realizes that, as a result of its operation, large areas of land which will be cleared to provide for compressor stations, pipeline rights-of-way, and drilling sites, and which will be exposed to the forces of erosion for varying periods of time could create siltation to nearby streams. Lessee agrees, therefore, to regrade such areas immediately and reseed to either temporary or permanent grasses. Any other type of remedial work necessary to prevent erosion on such areas shall be performed by Lessee.

7.02 Lessee shall, upon initial construction of all drilling sites, restore all highwalls and reseed said highwalls and down slope embankment of each drilling site immediately. Department's representative shall be consulted for final design and approval of each drilling site prior to final restoration.

7.03 Lessee's contractors and subcontractors shall not construct earthen dams across any stream to obtain a water supply for its operations unless approved by Department.

7.04 Lessee shall, on pipeline rights-of-way and access roads, construct water bars or similar diversion channels to carry surface runoff away from the rights-of-way and roads to prevent siltation. During construction, if excess siltation is expected, Lessee shall construct a settling basin at the base of the right-of-way or road to impound runoff and allow sediment to settle prior to discharge into nearby streams.

7.05 Lessee shall construct all access roads to all drilling sites along existing pipeline rights-of-way, where applicable, which are built to service the drilling site, provided that a ten percent (10%) grade can be maintained. All road locations and grades must be approved by District Forester as provided hereunder. All roads will be maintained in a passable condition as per Exhibit E (Access Road Specifications) unless modified by District Forester.

7.06 Lessee shall be responsible for the performance of maintenance of all erosion and sedimentation control facilities and devices.

8. Waters

8.01 Without prior approval of Department, Lessee shall not locate any bore or core hole or any part of rig or slush pit within one hundred (100) feet, or more if required by District Forester, of any stream or body of water on State Forest lands, and hereby agrees to prevent the contamination or pollution of springs, brooks, streams, or other waters on these lands in any manner whatsoever.

8.02 Where construction, operation, or maintenance of any of the facilities on or connected with this lease causes damage to the watershed or pollution of the water resources, Lessee agrees to repair such damage and to take such corrective measures to prevent further pollution or damage to the watershed as are deemed necessary by an authorized representative of Department and to pay for any and all damage or destruction of property, fish, and wildlife resulting from operations under this lease.

8.03 The cost of said property, wildlife, or fish destroyed shall be determined by Department, Pennsylvania Game Commission, or Pennsylvania Fish and Boat Commission using recognized procedures to establish the value of damage.

9. Forest Growth

9.01 Lessee shall not cut, injure, destroy, or remove any forest growth, except that which shall be absolutely unavoidable in conducting its operations and shall obtain proper approval of District Forester ninety (90) days before removal is to be commenced. The full ninety (90) days prior notice may be reduced upon the discretion of District Forester.

9.02 Lessee, under the direction of Department, shall dispose of all tree tops, limbs, brush, slash, and any other forest growth not to be sold or utilized by Department or Lessee which have resulted from clearing operations from strip mine sites, well sites, access roads, pipeline rights-of-way, and other construction sites, according to a plan approved by District Forester.

9.03 Lessee shall dispose of all tree stumps and large rocks resulting from its clearing and construction operations using a plan approved by District Forester.

9.04 Lessee shall pay Department for all forest growth cut or injured on State Forest land as a result of Lessee's operations, regardless of the ownership of the oil, gas, mineral, or surface support rights. Even though Department has been paid for the damage by Lessee, the title to all forest growth will still belong to the Commonwealth, except as provided in Paragraph 9.06. Damage is defined as the cutting or injuring of the forest growth by clearing a site so that personnel and equipment can be brought onto the location to establish a base from which Lessee can undertake its operation.

9.05 Prior to the clearing of the forest growth by Lessee, District Forester will mark and/or designate the area from which forest growth will be removed. The value of the forest growth that will be cut or damaged for the clearing of a road, drilling site, or area to be mined, will be determined by Department based upon timber type, size, and market data, or upon replacement value, for young stands or plantations. Lessee shall then be invoiced for the value as determined by Department. Payment to Department of said invoice must be made before any forest growth may be cut or damaged.

9.06 Lessee shall pay for the forest growth damage at two (2) times its value, as determined by Department; the forest growth shall then become Lessee's property, which then must be removed and sold by Lessee as job requirements dictate. Ownership of the forest growth not removed and sold by Lessee under this subsection shall revert to Department six (6) months after invoicing unless modified in writing by District Forester. The minimum forest growth damage charge shall be:

- (a) In those areas with a Forest Community Type determined by the Department to be black cherry (BC), the minimum forest growth damage shall be TEN THOUSAND DOLLARS (\$10,000.00) per acre or as determined above, whichever is greater;
- (b) For all other Forest Community Type areas (i.e., not typed as black cherry by the Department), the minimum forest growth damage shall be FIVE THOUSAND DOLLARS (\$5,000.00) per acre or as determined above, whichever is greater.

9.07 Lessee shall, at direction of District Forester and at its own expense, secure, plant and maintain grasses and/or trees or shrub seedlings and/or game foods on all strip mine sites, well sites, access roads, pipeline rights-of-way and other cleared areas using a plan approved by District Forester. Timing shall be determined by District Forester. Revegetation should be periodically maintained (i.e., liming or fertilizing).

9.08 Lessee shall make full compensation to Department at three (3) times the value of such forest growth cut, injured, destroyed, or removed, to be computed by Department, should additional damage result at any time from the work incident to this lease or the construction, operation, maintenance, or removal of facilities not herein contemplated or specifically mentioned, but which may occur as a result of said work or facilities, or should any forest growth be cut, injured, destroyed or removed prior to payment thereof under Paragraph 9.05 hereof, or due to negligence or unauthorized activities.

10. Fire

10.01 Lessee's employees, agents, contractors, and subcontractors, and employees of contractors and subcontractors shall do everything within their power to prevent or suppress forest fires and shall not allow fires to be set on or adjacent to State Forest lands by Lessee, its agents, contractors and subcontractors, and employees of contractors and subcontractors, except in pursuance to and in accordance with the conditions prescribed in the permission first obtained from District Forester fixing the time, place, and manner of burning. The burning of refuse, brush, slash, debris, or other materials, shall be conducted as approved by District Forester, and shall be so conducted that no living forest growth is damaged or killed.

10.02 Should any fire set by Lessee or any of the persons mentioned above escape in any manner or damage any State Forest land or other property, Lessee shall be liable for all such damages resulting from such escape and for all costs incurred by Department in fighting such fires; and Lessee's officers, agents, and employees in the vicinity, as well as contractors and subcontractors, shall with such assistance as Lessee may have at hand, or be able to summon, render aid in fighting said fire without cost to the Commonwealth.

10.03 Lessee further agrees that during periods of abnormal forest fire danger, District Forester may suspend all or part of the drilling, or other operations on all or part of the State Forest lands until the forest fire danger subsides.

10.04 Lessee, or its employees, shall report promptly all forest fires detected by them to District Forester.

11. Replacement and Repair of Improvements

11.01 Lessee shall replace or repair, as Department may direct, all State Forest signs, markers, corners, fences, other structures, and service utility lines owned or used by Department, which cross or otherwise lie within the State Forest lands destroyed or damaged in any work incident to this lease.

12. Roads, Quarry, and Drilling Sites

12.01 Before drilling sites and access roads are constructed, Lessee shall obtain the District Forester's approval of its plans for such activities. Any roads built at the expense of Lessee in its operations shall not be removed or destroyed and shall become a part of the road system of the State Forest lands, unless otherwise directed by District Forester.

12.02 Lessee recognizes that all roads and trails owned or maintained by Department, which are used in the execution of this lease, were constructed and improved for the use of Department and for the general public having business in and making use of State Forest land. Lessee, therefore, agrees that its operations will not be conducted in such a manner as to prevent, hinder, or obstruct the customary use of such roads and trails by Department or by the public.

12.03 Where roads built by Lessee cross any fence, Lessee shall construct a gate and keep it closed except when the passageway is in use. Lessee shall keep all said roads and trails free at all times from obstruction by logs, brush, or debris resulting from Lessee's operation. District Forester may require Lessee to temporarily discontinue the use of said roads whenever, in his opinion, such action is necessary to prevent their serious damage.

12.04 Upon termination of this lease, Lessee shall repair said roads and trails and leave them in as good condition as at the beginning of this lease of which condition Department shall be the sole judge. In addition, Lessee shall make any repairs to said roads and trails deemed necessary by District Forester to insure adequate and proper drainage, road surface conditions, horizontal alignment, and cross slope.

12.05 Lessee, in its operations, is hereby granted the right to use all State Forest roads, both on or off the leased premises, provided that Lessee agrees to obtain prior written approval from District Forester and to repair any damage to all State Forest roads, on or off the leased premises, when such damage is caused by Lessee's operations; provided, however, if in the opinion of the District Forester in charge, the roads or portions thereof are used by others sufficiently to warrant the apportionment of the maintenance costs, then Lessee may be relieved of the burden of sole maintenance and be required to provide only Lessee's proportionate share as decided by Department through District Forester.

12.06 It is understood that the bond required, under the terms of this lease, shall cover the use and repair of all State Forest roads, bridges and culverts on and off the leased premises utilized by Lessee in conduct of operations under this lease.

12.07 Lessee recognizes the rights and privileges afforded to Grantees by rights-of-way and other agreements executed with Department, prior to this lease, which cross or otherwise lie within the area of this lease; and, therefore, agrees to relocate at Lessee's own expense, all portions adversely affected by work incident to this lease in accordance with the then current rules and orders of the Public Utility Commission of the Commonwealth of Pennsylvania. In the event the Public Utility Commission does not have any jurisdiction, any necessary relocation shall be completed subject to the approval of Grantor.

13. Buildings

13.01 Lessee shall not drill any bore or core hole, carry on operations, make excavations, or otherwise disturb the surface of the lands within two hundred (200) feet of any building. However, if a lesser distance to any building is needed, written approval must be obtained from District Forester.

13.02 Lessee shall consult with District Forester and obtain written approval prior to the construction and erection of any storage facilities, buildings, work sheds, or any other physical structure upon State Forest lands.

14. Appearance

14.01 Lessee shall, at all times, maintain State Forest lands in a neat and presentable manner, removing all rubbish and debris as it accumulates and restoring each individual area or facility within thirty (30) days to as near as possible its original condition as directed by District Forester.

15. Explosives

15.01 Lessee shall not use explosives at any time or in any manner unless approved by District Forester.

16. Restoration and Revegetation

16.01 Restoration and revegetation shall be accomplished in accordance with Lessee's reclamation revegetation plan as approved in advance by District Forester in advance.

17. Water Wells

17.01 Department must approve, in writing, any plan by Lessee, including drilling specifications, for the drilling and development of water wells on state lands.

17.02 A final plat will be submitted within thirty (30) days after completion of each water well showing exact location, elevation, depth of well, lithology penetrated and thickness of discrete lithologic units, depth to water-bearing horizons, estimates of flow rates, results of draw down tests, and results of chemical and bacteriological analyses if such tests are conducted by Lessee.

17.03 Lessee further agrees to supply Department with any other records, driller's logs, memoranda, accounts, reports, cuttings, cores, or other information relative to the drilling, completion, or operation of water wells on the above-described premises. This will include true copies of any electrical or radioactivity surveys made in the wells.

17.04 Lessee shall be familiar with and comply in every respect with the provisions now existing or hereafter enacted of the Water Well Drillers License Act 6 10 of May 29, 1956 (P.L. 1840), providing for the orderly development of the ground water resources of the Commonwealth of Pennsylvania.

17.05 Department reserves the right to use water from wells drilled by Lessee on State Forest land provided such use does not interfere with Lessee's operations.

17.06 Lessee shall contact the District Forester before plugging any water well. Water wells must be plugged from bottom to top with clay, cement, or other impervious materials approved by Department. Any water wells that are of no further use in Lessee's operations, but are deemed viable for Bureau of Forestry uses, may be acquired by Department at its request, at no cost to Department. Lessee, upon relinquishing rights to said water wells, in writing, and upon acceptance of said wells by Department, shall be relieved of any and all plugging responsibility.

18. Pipelines

18.01 Lessee shall refill to contour all ditches or other excavations caused by the construction, operation, and maintenance, or removal of pipelines; construct cross ditches; lime, fertilize, and seed or replant the right-of-way; keep the pipeline and right-of-way in good repair and appearance, and take such other measures as may be deemed necessary by Department to control erosion and sedimentation and to maintain or restore the natural and aesthetic values as directed by Department.

19. Rare and Endangered Species

19.01 The Pennsylvania Natural Diversity Index (PNDI) shall be searched prior to any earth disturbance to determine possible presence of rare and endangered flora and fauna species of concern.

19.02 If in the course of its operations, Lessee encounters any fauna or flora listed on Federal or state registers of threatened or endangered species, or habitat critical to their survival, Lessee shall immediately cease operations and contact the District Forester so that arrangements can be made with Bureau of Forestry specialists to field check the site to make all necessary preparations to protect and preserve the fauna and flora which may be endangered.

20. Historical and Archaeological Sites

20.01 If in the course of its operations, Lessee encounters any historical or archaeological sites, Lessee shall immediately cease operations and contact the District Forester so that arrangements can be made with Pennsylvania Historical and Museum Commission specialists to field check the site to make all necessary preparations to protect and preserve the artifacts which may be endangered.

21. Contacts with State Agencies

21.01 Lessee shall periodically contact the following state agencies or their successors to keep informed on up-to-date information, policies, rules, and regulations applicable to this lease:

EXHIBIT "D"

INVASIVE PLANTS AND REVEGETATION GUIDELINES
FOR STATE FOREST LANDS

1. Pre-construction Inventory and Mapping

1.1 Lessee may elect to perform a pre-construction inventory of invasive plants present on the portion of the leased premises where construction is planned to determine appropriate prevention methods, predict control needs, and assess its level of responsibility for management of invasive species and populations. The inventory objective is to locate established invasive plant species populations.

1.2 If Lessee elects to undertake an inventory as described in Section 1.1, all areas which may be disturbed by the planned construction activity should be inventoried for the plant species listed in *DCNR's Invasive Plants* brochure during the growing season from May through September by a qualified botanist.

1.3 Inventory data should be collected from the entire area of the planned construction on state forest land and any buffer areas that may be appropriate, in grid cells no greater than 150' x 150' in size. The established grid should be digitized into a GIS layer and printed on maps that will be used for field data accumulation. Standard information including date, surveyor name, and grid cell number should always be recorded prior to beginning the actual survey. During the field study the center of each grid cell should be located using GPS, and an inventory created by noting the presence of any invasive plant species or the complete absence of any invasive species within the specified grid cell and a note of the dominant species per plant type (e.g., herbaceous, shrub, tree) should be recorded. For each invasive species occurrence, the cover class within each grid cell should be recorded as trace, low, moderate, or high, according to the *Montana Noxious Weed Survey and Mapping System*. All trace and low occurrence locations should be located by GPS to aid in relocation and treatment. For each invasive species in each grid cell, the average growth stage should be recorded as seedling, bolt, bud, flower, seed set, or mature, according to the *Montana Noxious Weed Survey and Mapping System*.

1.4 If Lessee elects to forego the above described pre-construction survey for invasive species, Lessee shall be responsible for all occurrences of post-construction infestations of invasive species that may be found in the construction area regardless of origin or amount and will be required to perform management and control activity as described in Section 3 below.

2. Prevention

2.1 Where no invasive plants are detected, Lessee should use only PA Department of Agriculture certified seed and weed free soil, dirt, and mulch whenever feasible. If materials certified as weed free cannot readily be obtained, the source of materials being used shall be inspected for invasive plants during the growing season by a qualified botanist and used only if deemed weed-free.

2.2 Mulching with straw rather than hay is recommended to reduce the possibility of introducing invasive species propagules.

2.3 Where heavy infestations of Japanese stiltgrass (*Microstegium vimineum*) are detected during pre-construction surveys, a seed mix of Autumn bentgrass (*Agrostis perrenans*) and deer tongue (*Dichanthelium clandestinum*) should be planted as aggressive competition against the seed-banked invasive Japanese stiltgrass. Seeding specifications will be provided by the District Forester. As an alternative, application of herbicide to large patches of Japanese stiltgrass during the summer with a 2% glyphosate solution in water mixed with surfactant may be utilized at the direction of the District Forester.

2.4 Lessee at its option may, prior to bringing equipment into un-invaded areas or onto state forest land, clean its equipment in an appropriate manner (see <http://www.fs.fed.us/eng/pubs/pdf/05511203.pdf>) to remove plant parts such as rhizomes and seeds that might be carried on tires and the equipment undercarriage, which may help prevent the spread of invasive species onto adjacent lands.

2.5 Pre-treatment of identified invasive species infestations of herbaceous species or species that reproduce prolifically from rhizome/root segments with herbicides prior to construction may be performed at the direction of the District Forester.

3. Management

3.1 Management and control of established invasive plant populations shall be planned on a species by species basis to determine the best method of control. Lessee and its consultant shall submit a "Management and Control Plan" to District Forester no fewer than three (3) months after the conclusion of all construction activity.

3.2 Lessee shall include a post-construction invasive survey report with the same survey parameters as described in Section 1 above, in the Management and Control Plan. The District Forester and Ecological Services Section will assist Lessee in the development of appropriate management methods by species and/or invasive occurrence.

3.3 Post-construction invasive species surveys along access roads shall be limited to areas where gravel was placed or the existing road was widened for Lessee use. After a period of two growing seasons, any new invasive populations will be assumed to be the result of sources other than the Lessee's construction materials and equipment. Control and monitoring of invasive species found along access roads within two growing seasons post-construction will continue until populations are eradicated.

3.4 Lessee and the Bureau of Forestry will coordinate with the other jurisdictional agencies about species of special concern and the potential impacts invasive species management activity may produce.

4. Monitoring

4.1 Lessee shall make provisions to monitor for invasive species within the area(s) disturbed by the construction activity for a period of five (5) years following construction or until invasive species are not observed on-site for two consecutive years, whichever is longer.

4.2 Lessee shall perform an annual survey for the presence of invasive species within the construction area, as described in 4.1 above, following major construction. The annual survey should follow the same methods as the pre-construction survey method described in Section 1. The only exception to the method described in Section 1 is the grid cell boundaries only need to be checked occasionally with the GPS to ensure that monitoring alignment is consistent with the original inventory alignment.

5. Reporting

5.1 The results of all Lessee annual invasive surveys shall be summarized into a report, which shall include the following elements: methods, a summary of invasive species detected, abundance of each species, number of new populations per species, number of eradicated populations by species, and management recommendations for management and control. Report and raw electronic observation data shall be submitted to District Forester and Ecological Services within 60 days following completion of the report. Submission of any electronic data should occur simultaneously with the written report submission. Data recording and management should be consistent year-to-year so data can easily be compared by grid cell number. The Department reserves the right to audit the findings of the Lessee's reports and as a result of any audit, Department may require alternate methods of management and control.

5.2 Department may publish reports, raw data, or articles summarizing invasive species management and monitoring efforts from time to time. Lessee will be consulted prior to publication of any reports or raw data for comment.

6. Revegetation Plan Guidelines

6.1 Lessee shall utilize a native grass and herb mix for cover and stabilization within the disturbed construction areas. The required seed mix will provide for immediate stabilization and reduce the chance of invasive species establishment. Lessee shall provide for a cover crop to be mixed in with the native grass and herb mix. The cover crop will be either oats or barley if the seeding takes place in the spring or wheat or rye if the seeding takes place in the fall. The cover crop seed mix may be applied at the same time as the native grass and herb mix described below. Hydro-seeding of all seed mixes is acceptable. The cover crop should be applied at 30 lbs/acre. The detail components of the native grass and herb mix are listed below:

Native Grass and Herb Mix

20% Little Bluestem PA ecotype (*Andropogon scoparius*)
10% Big Bluestem variety "Niagara" (*Andropogon gerardii*) (genetic origin is NY)
15% Virginia Wild Rye PA ecotype (*Elymus virginicus*)
10% Indiangrass PA ecotype (*Sorghastrum nutans*)
10% Deertongue variety "Tioga" (*Panicum clandestinum*)
5% Swithgrass variety "Shelter" (*panicum virgatum*) (genetic origin is WV)
5% Partridge Pea PA ecotype (*Chamaecrista fasciculata*)
3% Showy Tick Trefoil PA ecotype (*Desmodium canadense*)
5% Ox-eye sunflower PA ecotype (*Heliopsis helianthoides*)
2% Autumn bentgrass PA ecotype (*Agrostis perennans*)
2% Woolgrass PA ecotype (*Scirpus cyperinus*)
3% Soft Rush PA ecotype (*Juncus effuses*)
5% Pennsylvania smartweed PA ecotype (*Polygonum pennsylvanicum*)
5% Common Milkweed PA ecotype (*Asclepias syriaca*)

6.2 The recommended seeding rate for the native grass and herb mix is 15.0 lb/acre. No lime or fertilizer is needed for the Native Grass and Herb Mix. Topsoil should be utilized when possible. Seeding may be accomplished by the broadcast, hydro seeding or drill seeding methods. The Native Grass and Herb mix will be mulched with 1.5 ton/acre of straw mulch.

6.3 The Bureau of Forestry has the right to change the components of the Native Grass and Herb Mix as needed to reflect species that may be more appropriate to the region or habitat that is being altered.

6.4 The use of conifers and shrub plantings for revegetation of well pad sites will be used if determined appropriate by the District Forester. As directed by the District Forester, the disturbed work area will be revegetated with conifers and pockets of shrubs where topography allows. The conifer species include white pine (*Pinus strobus*), Pitch pine (*Pinus rigida*), Virginia Pine (*Pinus virginiana*) (south of route 80) and Red Pine (*Pinus resinosa*) (north of route 80). Pockets of shrubs should be planted

OIL & GAS (6-08)

Exhibit D

approximately every 100 feet. These pockets of shrub plantings will comprise approximately 200 square feet (10' X 20'). Each pocket will be planted with 10 -15 shrubs using seedlings. Seedlings to be planted include any mix of staghorn sumac (*Rhus typhina*), smooth sumac (*Rhus glabra*), red and black chokeberry (*Aronia arbutifolia* and *A. melanocarpa*), New Jersey tea (*Ceanothus americanus*), flowering dogwood (*Cornus florida*), Virginia creeper (*Parthenocissus quinquefolia*), blackberry (*Rubus allegheniensis* or *R. pensilvanicus*), blackgum (*Nyssa sylvatica*), ninebark (*Physocarpus opulifolius*), choke cherry (*Prunus virginiana*), American elderberry (*Sambucus canadensis*), steple bush (*Spiraea latifolia*), highbush blueberry (*Vaccinium corymbosum*), muscle wood (*Carpinus caroliniana*), nanny berry (*Viburnum lentago*), Northern arrowwood (*Viburnum recognitum*), Cockspur hawthorn (*Crataegus crus-galli*) and scrub oak (*Quercus ilicifolia*). These plantings will need to be fenced to protect from damage by browsing herbivores. Fencing will consist of 8' woven wire fence or as determined by District Forester. Posts, fencing, other materials, seedlings and labor will be provided by Lessee. Lessee will also be responsible for fence maintenance. Revegetation with shrubs and fencing will not be required on steep slopes. Conifer planting is applicable on slopes where safe to do so.

6.5 Basking areas and habitat for the Timber Rattlesnake and the Allegheny Woodrat may need to be created in disturbed areas as deemed appropriate by District Forester.

6.6 For timber rattlesnakes, the available rocks will be piled south-facing in the disturbed area. In order to create basking habitat, the rocks should be placed in piles, with large flat rocks laid horizontally. The crevices created will allow the snakes to thermoregulate, or to retreat if threatened. Conifers **should not** be planted near these created basking areas to avoid shading the rocks.

6.7 Additionally, rocks stockpiled during excavation may be piled to create crevices for the Allegheny Woodrat at the direction of District Forester. Some conifers may be planted near the created woodrat habitat, but deciduous, mast-producing trees such as chestnut oak are more desirable.

**COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF CONSERVATION AND NATURAL RESOURCES**

EXHIBIT "E"

**OIL AND GAS LEASE ACCESS ROAD SPECIFICATIONS
FOR STATE FOREST LANDS**

1. Lease Road Definitions and Specifications

- 1.01 Lessee recognizes that all roads owned or maintained by Department, which are used in the execution of this Lease, were constructed and improved for the use of Department and for the general public having business in and making use of State Forest land. Lessee, therefore, agrees that its operations will not be conducted in such a manner as to prevent, hinder, or obstruct the customary use of such roads by Department or by the public.
- 1.02 Roads necessary to develop an oil or gas well site shall be classified as lease access roads. These roads are for primary access to oil or gas well sites.
- 1.03 Lessee shall not construct or improve any roads or clear any drilling sites, without prior approval from District Forester*, who shall set forth the type and grade of roads and area to be cleared. Access roads shall be held to a maximum grade of ten percent (10%). However, if steeper grades are necessary, written approval must be obtained from District Forester prior to their construction.

2. Location

- 2.01 Lease access roads, including all installations which Lessee shall complete at his expense prior to the start of drilling operations, shall be located and designated on the ground by District Forester, and on a topographic map having a scale of 1 inch = 2,000 feet, or any road construction map, of larger scale, which Lessee has provided. A copy of said map must be provided to District Forester prior to construction.
- 2.02 Where possible, the lease access road locations will follow existing roads or old abandoned roads or pipeline rights-of-way. In such instances, these roads shall be improved and maintained to conform with the specifications for the location, construction, and maintenance of lease access roads.
- 2.03 When the lease access road is to be located in an area where no road exists and access to the road and drill site will open onto a state or township highway, Lessee shall obtain the necessary permits and approval from the Pennsylvania Department of Transportation or township for said opening. On all lease tracts where the road opens onto a paved state or township highway, Lessee shall take

*Wherever the words District Forester are used, it shall be understood that they shall also apply to any staff forester whom the District Forester may appoint as his or her representative.

extra precaution to prevent mud and debris from being carried onto the paved highway especially during periods of heavy road use. In areas where a mud problem may be present, Lessee shall stabilize the paved road junction with native stone or washed gravel.

- 2.04 The District Forester must be notified five (5) working days prior to start of any road construction, improvement or maintenance so that the District Forester can make arrangements to be available when actual work begins in order to correct any misunderstanding regarding the road location or road work.

3. **Clearing**

- 3.01 Clearing for lease access roads shall be wide enough to allow the construction of a road having a minimum width of 18 feet including ditches (a 16-foot running surface). Where turnouts are required, additional width shall be cleared as designated by District Forester (see Sketch A). The right-of-way width must be a 24-foot minimum to allow prior drying action by the wind and sun.
- 3.02 Trees in the right-of-way must be cut and removed from cleared right-of-way. All stumps, roots, slash, and other debris must be disposed of as designated by the District Forester.

4. **Grading**

- 4.01 The lease access road shall be either insloped, outsloped, or crowned as specified by District Forester (see Sketch B). Ditches must be constructed on all roads except where they cross rock formations.
- 4.02 Cut slopes may be as steep as the soil formation or material will allow, as determined by District Forester during construction. Undercutting of slopes is prohibited. All cut slopes will be mulched and seeded as specified in Lessee's Erosion and Sedimentation Plan to stabilize the cut slope as soon as possible after disturbance unless this requirement is waived by District Forester.
- 4.03 As needed, Lessee may use without charge road shale and/or borrow materials from State Forest land. Extracting such material shall be restricted to locations designated by District Forester. All disturbed areas shall be restored to the satisfaction of the District Forester and treated with lime, fertilizer, and planted with seed as outlined in Lessee's Erosion and Sedimentation Plan.

5. **Drainage**

- 5.01 Underground culverts (metal or plastic) and intercepting dips (see Sketch C) of sizes and types specified by District Forester shall be installed or constructed by Lessee at locations designated on the ground by District Forester.

- 5.02 When any cross drainage or intercepting dip is within 100 feet of a stream crossing on a general watershed or within 200 feet of a stream crossing on a public or domestic watershed, Lessee shall install a sump at the discharge end to receive water before it is discharged into the forest.
- 5.03 Lessee shall break the berm on the outside of the road at strategic locations to allow drainage of the road surface. Such breaks may be made with a bulldozer and shall be located by District Forester. As a guiding rule these breaks shall be located a maximum of 50 feet apart.
- 5.04 If soil erosion takes place at the discharge end of culverts, intercepting dips, water bars, or breaks in the berms, a floor of hand-placed rock shall be provided. At discharge ends, tail ditches will be of sufficient length and depth to ensure that drainage does not back up to road surface.
- 5.05 Sections of lease access roads located in poorly drained areas must be built up with suitable material above natural grade with suitable material approved by District Forester. Synthetic road fabric must be used in these situations.

6. **Bridges, Culverts, and Fords**

- 6.01 Bridges, as specified by District Forester and permitted and approved by the Department of Environmental Protection's Bureau of Dams, Waterways and Wetlands, must be installed where roads cross intermittent or permanent stream channels in accordance with the provisions of the Encroachment Permit. Any bridge design must be approved by the Department prior to construction.
- 6.02 Culverts, as specified by District Forester and approved by the Department of Environmental Protection's Bureau of Dams, Waterways and Wetlands, shall be placed in the bottom of the stream channel and covered with appropriate fill material. All culverts shall be installed in accordance with the provisions of the Encroachment Permit.
- 6.03 Fords, as permitted and approved by District Forester and approved by the Division of State Forest Management, the Pennsylvania Fish and Boat Commission's local Waterways Patrolman and the Department of Environmental Protection's Bureau of Dams, Waterways and Wetlands, are permissible only when it is not feasible to install a bridge or culvert. Fords are prohibited on all trout streams and on the watersheds of municipalities, institutions and private users. Fords must have solid bottoms and approaches that contain rock, stone or gravel. Fords must always be located at right angles to the stream channel. DRAGGING MATERIAL ACROSS FORDS IS PROHIBITED. Stream banks must be stabilized with stone to prohibit sedimentation.

7. **Maintenance**

- 7.01 Drainage structures shall be kept open and functioning at all times.
- 7.02 Gravel or shale shall be spread on intercepting dips that become subject to erosion.
- 7.03 Road surfaces shall be maintained so as to allow water to be drained from the roadway.
- 7.04 Loose boulders and slide material shall be removed from roadway and side ditches.

8. **Retirement and Abandonment**

- 8.01 Surface of roads shall be graded to eliminate any wheel ruts. Fenders and high outside shoulders shall be removed.
- 8.02 All bridges, drain pipes, and culvert pipes installed by Lessee shall be removed at Lessee's expense when no longer needed unless Lessee is notified otherwise by the District Forester.
- 8.03 When culverts are removed, they shall be replaced by earth or log water bars (see Sketch E).
- 8.04 All drainage ways shall be opened and deepened so as to handle storm waters. Seeding to a grade cover for an immediate erosion control shall be completed as required herein.
- 8.05 Additional water bars shall be installed if required by District Forester.
- 8.06 The above-listed provisions shall be carried out as each lease access road or portions thereof are abandoned rather than waiting until all development operations have been completed. If well is temporarily abandoned awaiting completion operations (i.e., fracking, acidizing, perforating, drilling deeper), the road should be retired in a manner and at a time as specified by the District Forester.

9. **Gates**

- 9.01 All lease access roads must be gated with an approved type of gate (see Sketch F). Authorized gates must be installed during lease operations, and remain after Lease termination. District Forester shall be consulted as to location and time of construction of all gates.

10. **Highway Occupancy Permits**

10.01 All terms, conditions, and specifications of such permits applicable to this Lease shall be followed.

11. **Seeding**

11.01 All roads on the Lease are to be limed, fertilized, and seeded to a grass cover as per the requirements of this Lease as outlined in Lessee's Erosion and Sedimentation Plan.

12. **Use of Existing State Forest Roads**

12.01 Lessee, in its operations, is hereby granted the right to use all State Forest roads, both on or off the leased premises, provided that Lessee agrees to obtain prior written approval from District Forester and to repair any damage to all State Forest roads, on or off the leased premises, when such damage is caused by Lessee's operations; provided, however, if in the opinion of the District Forester in charge, the roads or portions thereof are used by others sufficiently to warrant the apportionment of the maintenance costs, then Lessee may be relieved of the burden of sole maintenance and be required to provide only Lessee's proportionate share as decided by Department through District Forester.

12.02 Where roads built by Lessee cross any fence, Lessee shall construct a gate and keep it closed except when the passageway is in use. Lessee shall keep all said roads free at all times from obstruction by logs, brush, or debris resulting from Lessee's operation. District Forester may require Lessee to temporarily discontinue the use of said roads whenever, in his opinion, such action is necessary to prevent their serious damage.

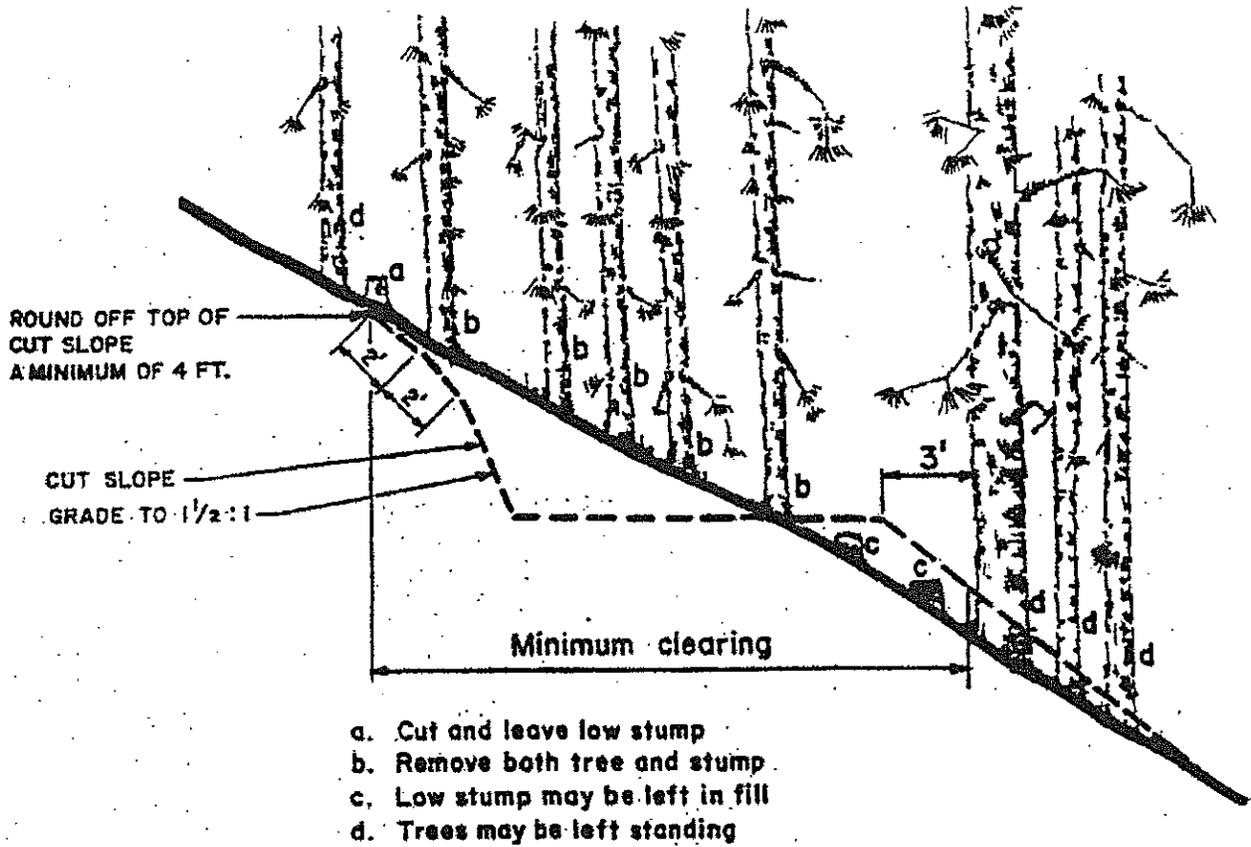

12.03 Upon termination of this Lease, Lessee shall repair said roads and leave them in as good condition as at the beginning of this Lease of which condition District Forester shall be the sole judge. In addition, Lessee shall make any repairs to said roads deemed necessary to District Forester to insure adequate and proper drainage, road surface conditions, horizontal alignment, and cross slope.

12.04 It is understood that the bond required, under the terms of this Lease, shall cover the use and repair of all State Forest roads and bridges on and off the leased premises used by Lessee. Any roads built at the expense of Lessee in its operations shall not be removed or destroyed and shall become a part of the road system of Department.

HAUL ROAD CONSTRUCTION

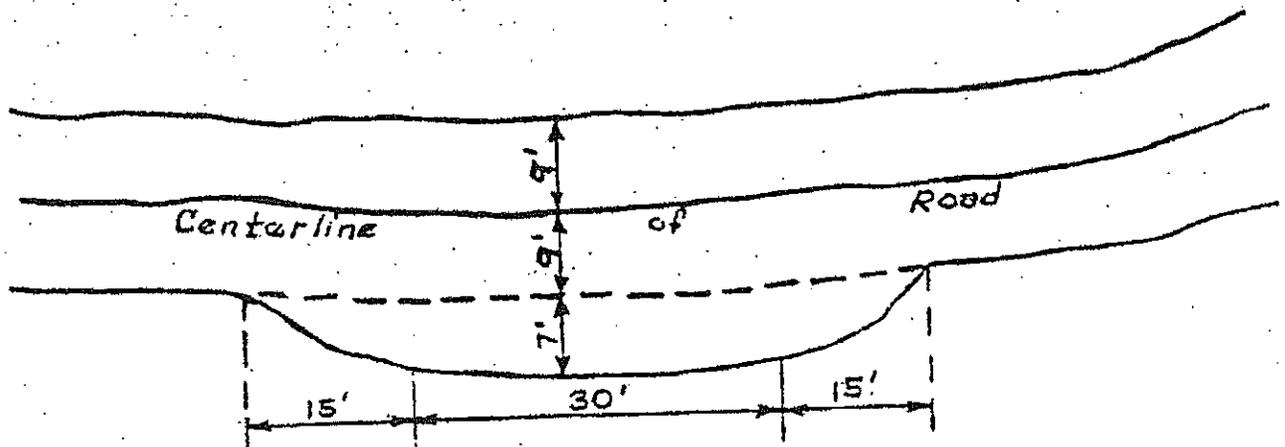

SKETCH A

CLEARING FOR CUT AND FILL ROAD

1. Construct road so that hauling will be on solid ground, not on fill.
2. Inslope from fill to cut shall have a fall of not less than 1/4" and not more than 3/8" per foot.
3. Drainage water shall be carried across road to fill slope by intercepting dips or culverts.

TURNOUT FOR HAUL ROAD

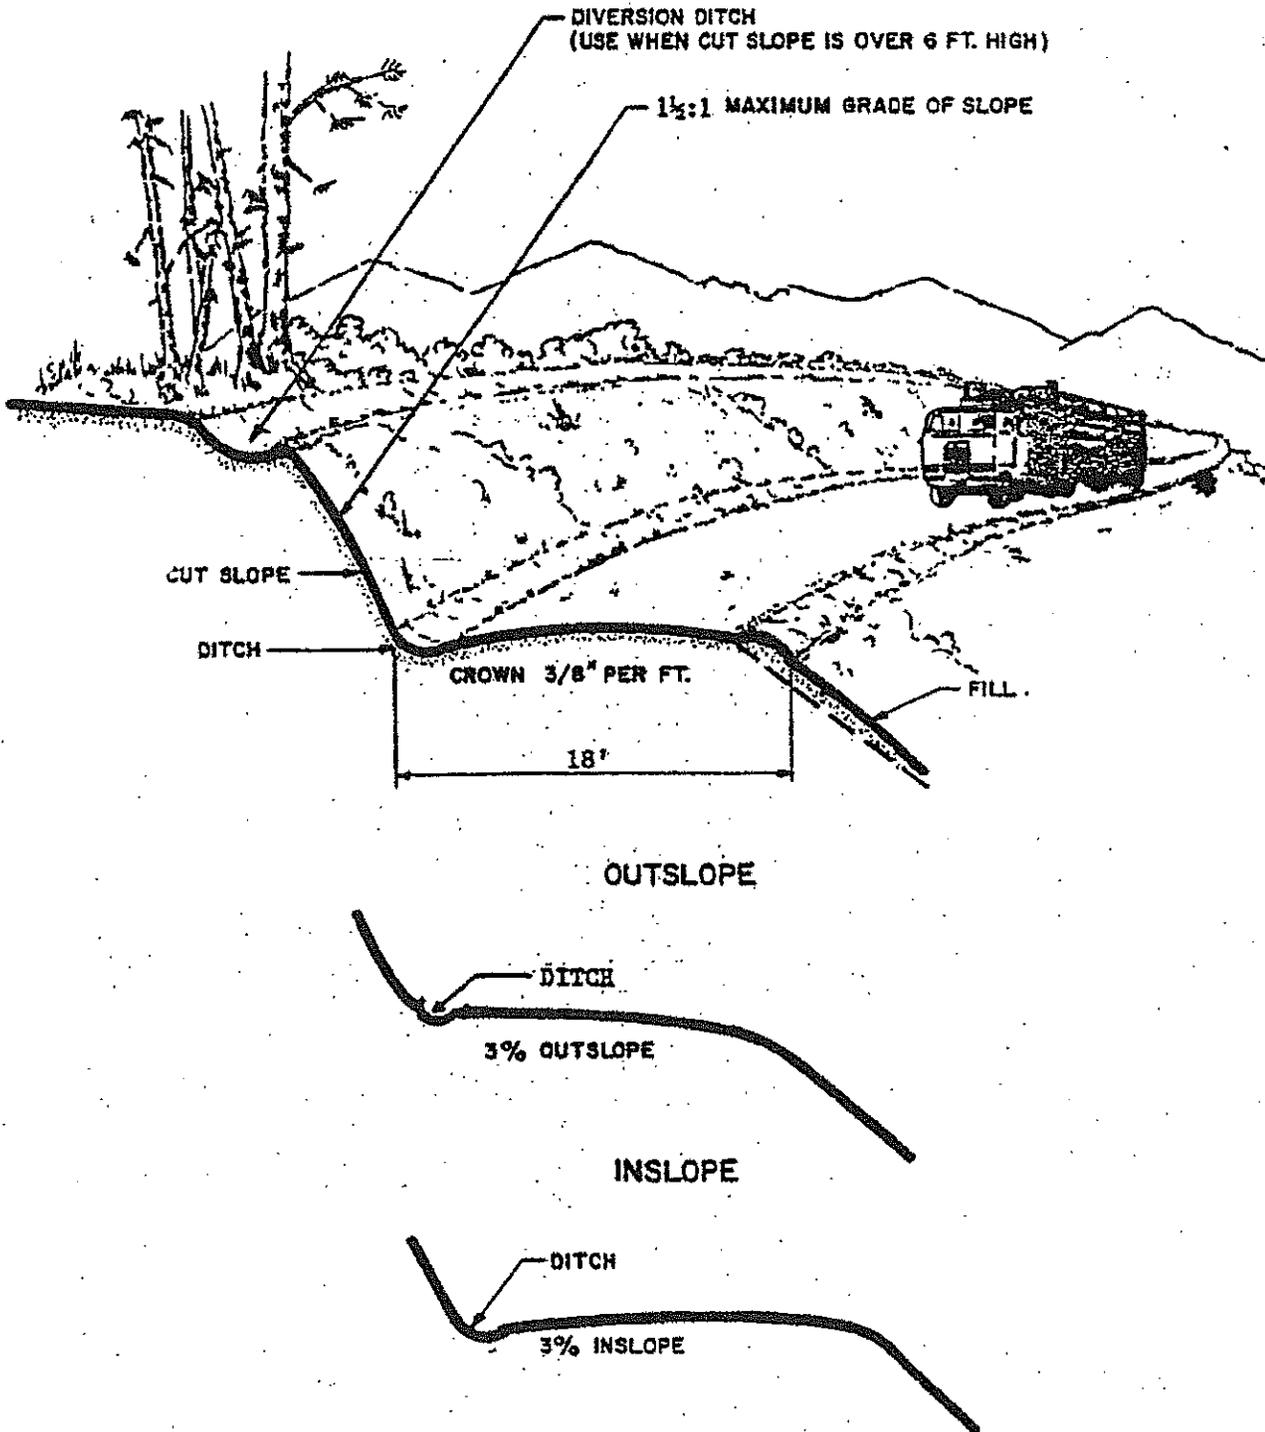

SKETCH A

ROADWAY DRAINAGE

SKETCH B

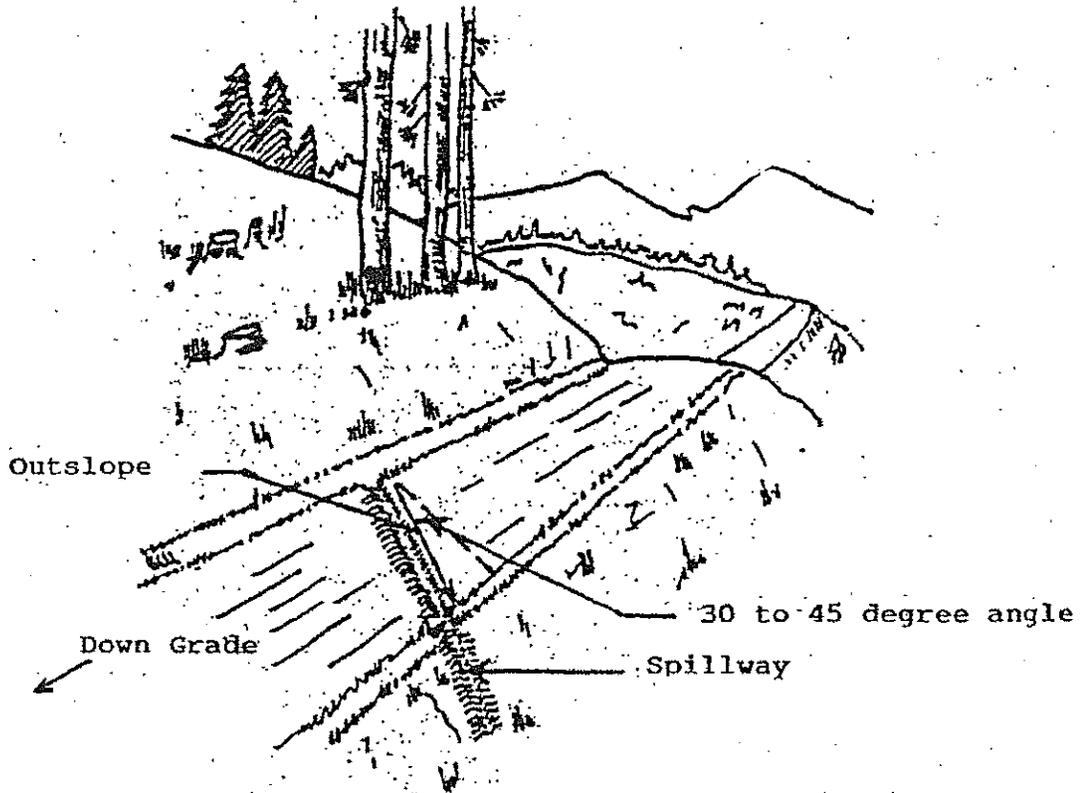

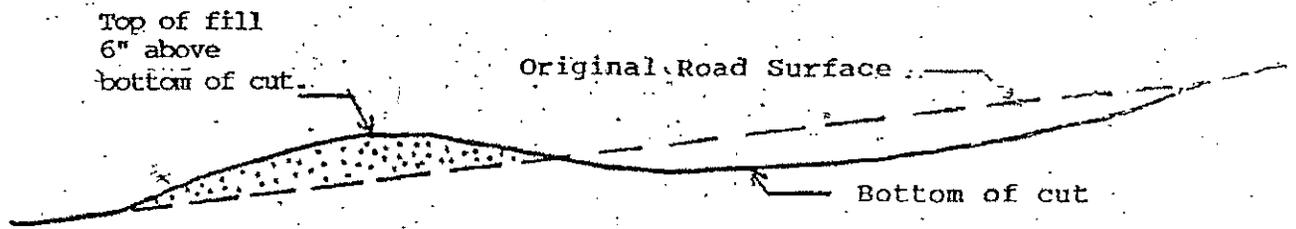

CROWNED ROADWAY

SKETCH B

INTERCEPTING DIP

SKETCH C

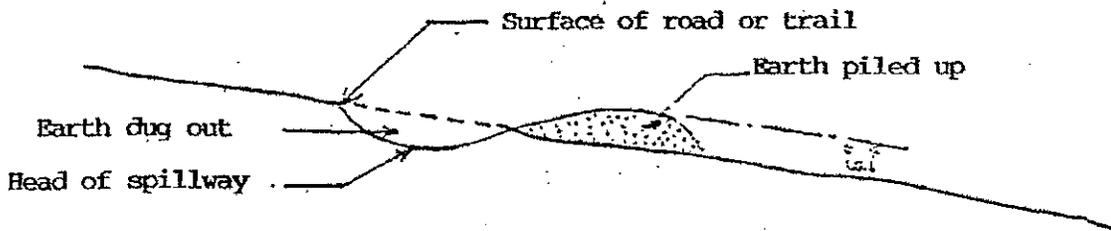

1. Dip to be below outcurves, above incurves, and elsewhere as required by Forester.
2. Horizontal distance from top of fill to bottom of cut is 15' for all Roads. Horizontal distance from bottom of cut to original road surface (upslope from dip) is as follows: Grade to 5% - 50'; grades over 5% - add 5' for each % over 5.
3. Dip shall be outsloped. Spillway from dip shall be protected from erosion.
4. Dip should be placed at an angle of 30 to 45 degrees across road.
5. Dip shall have a fall of 1/8" to 1/4" per foot.
6. If spillway erodes, provide a floor of 2" plank or hand-placed rock.
7. Intercepting dips shall not be used for grades over 10%. An approved culvert is used for grades exceeding 10%.

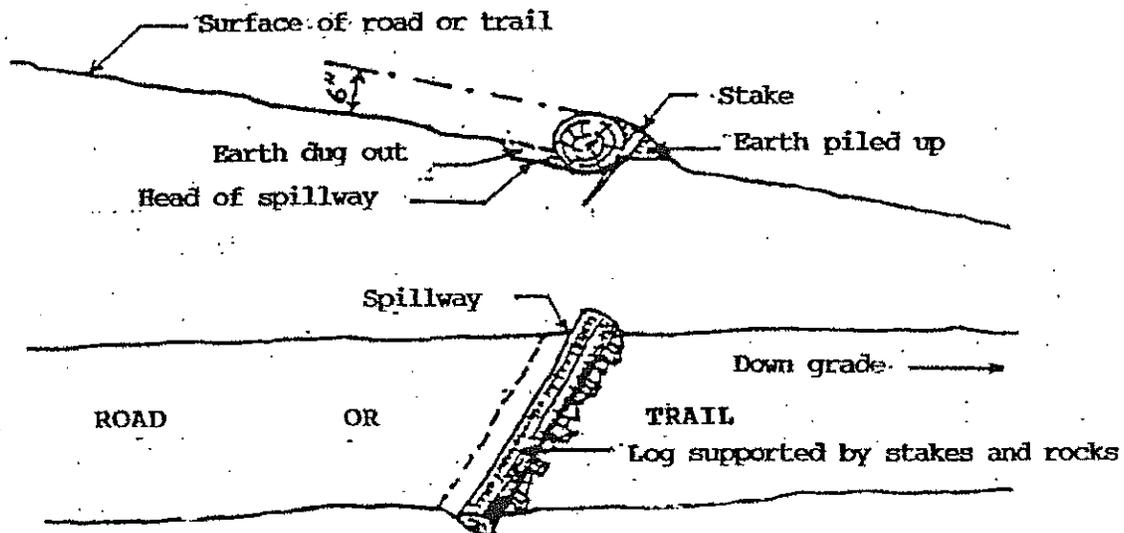

SKETCH C

EARTH WATER BAR

SKETCH E

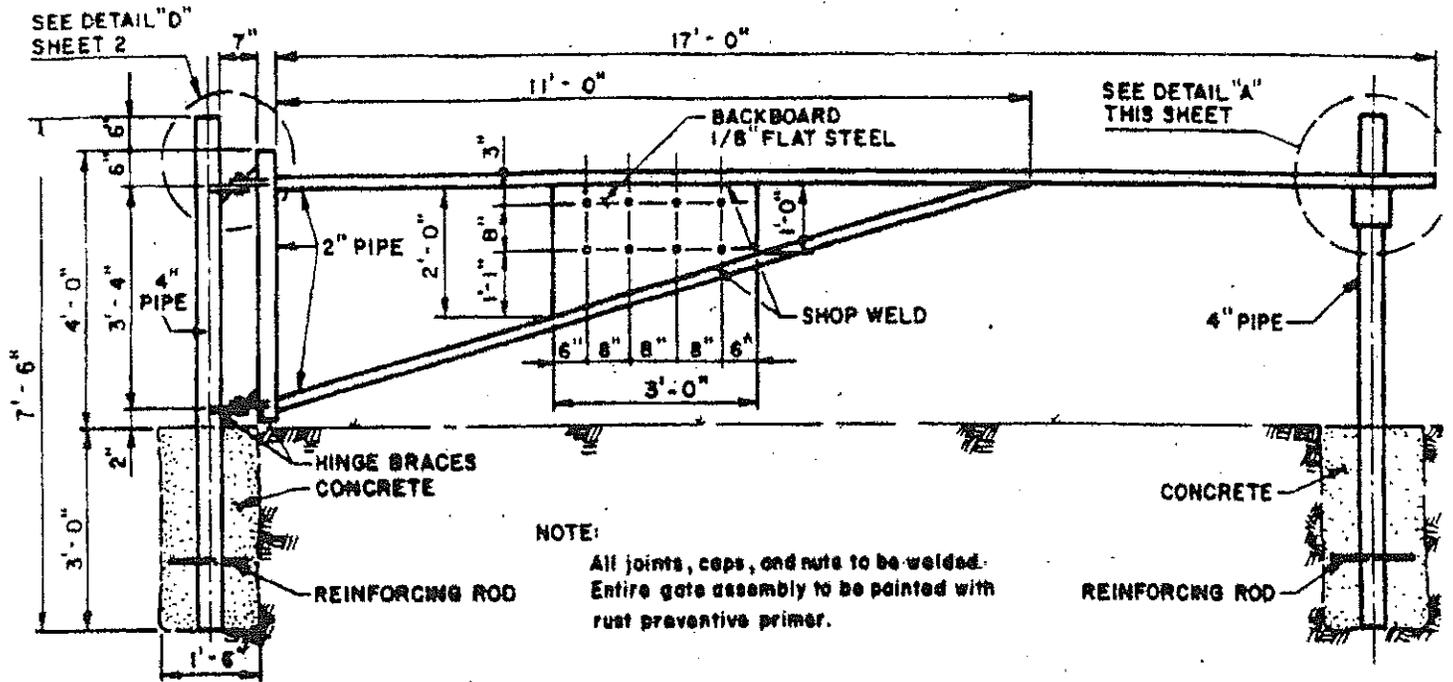

LOG WATER BAR

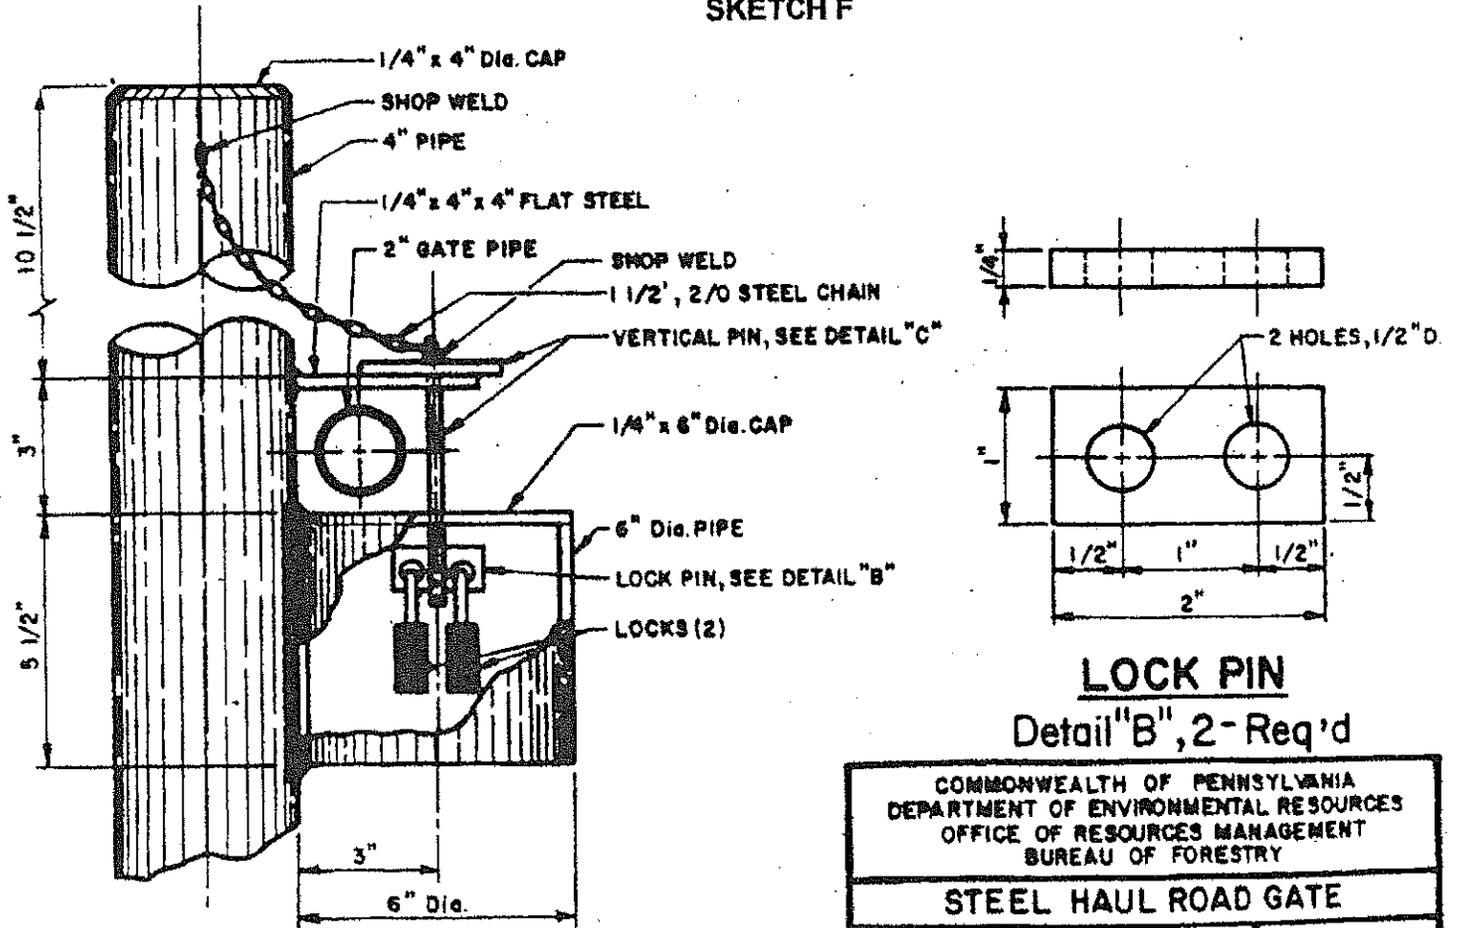

1. Dig trench with mattock at slight angle to road or trail. Fall across road or trail to head of spillway should be no less than 1/8" nor more than 3/8" per foot.
2. Cut log 8" in diameter for water bar. Recommend use of crooked, damaged or broken-top tree. Fender logs also make good water bars.
3. Place log in trench. Make sure trench is deep enough to keep water from running under log.
4. Place stakes and rocks on down hill side to hold log in trench.

VERTICAL PIN
Detail "C", 2-Req'd

Vertical Pin may be made from any suitable material either round or flat. Case hardened steel should be used. After the length of the pin has been determined, the lower end should be drilled or burned to accommodate the shackle of the lock. Keep the pin short enough to insure complete projection to the locks within the can.

CONTRACTOR INTEGRITY PROVISIONS FOR COMMONWEALTH CONTRACTS
FOR STATE FOREST LANDS

CONTRACTOR INTEGRITY PROVISIONS

For purposes of this clause only, the words "confidential information," "consent," "contractor," "financial interest," and "gratuity" shall have the following definitions:

- 1) **Confidential information** means information that is not public knowledge, or available to the public on request, disclosure of which would give an unfair, unethical, or illegal advantage to another desiring to contract with the Commonwealth.
- 2) **Consent** means written permission signed by a duly authorized officer or employee of the Commonwealth, provided that where the material facts have been disclosed, in writing, by prequalification, bid, proposal, or contractual terms, the Commonwealth shall be deemed to have consented by virtue of execution of this agreement.
- 3) **Contractor** means the individual or entity that has entered into the Contract with the Commonwealth, including directors, officers, partners, managers, key employees and owners of more than a five percent interest.
- 4) **Financial interest** means:
 - a) Ownership of more than a five percent interest in any business; or
 - b) Holding a position as an officer, director, trustee, partner, employee, or the like, or holding any position of management.
- 5) **Gratuity** means any payment of more than nominal monetary value in the form of cash, travel, entertainment, gifts, meals, lodging, loans, subscriptions, advances, deposits of money, services, employment, or contracts of any kind.

The Contractor shall maintain the highest standards of integrity in the performance of the Contract and shall take no action in violation of state or federal laws, regulations, or other requirements that govern contracting with the Commonwealth.

The Contractor shall not disclose to others any confidential information gained by virtue of the Contract.

The Contractor shall not, in connection with this or any other agreement with the Commonwealth, directly, or indirectly, offer, confer, or agree to confer any pecuniary benefit on anyone as consideration for the decision, opinion, recommendation, vote, other exercise of discretion, or violation of a known legal duty by any officer or employee of the Commonwealth.

The Contractor shall not, in connection with this or any other agreement with the Commonwealth, directly or indirectly, offer, give, or agree or promise to give to anyone any gratuity for the benefit of or at the direction or request of any officer or employee of the Commonwealth.

Except with the consent of the Commonwealth, neither the Contractor nor anyone in privity with him or her shall accept or agree to accept from, or give or agree to give to, any person, any gratuity from any person in connection with the performance of work under the Contract except as provided therein.

The Contractor, upon being informed that any violation of these provisions has occurred or may occur, shall immediately notify the Commonwealth in writing.

The Contractor, by execution of the Contract and by the submission of any bills or invoices for payment pursuant thereto, certifies, and represents that he or she has not violated any of these provisions.

The Contractor, upon the inquiry or request of the Inspector General of the Commonwealth or any of that official's agents or representatives, shall provide, or if appropriate, make promptly available for inspection or copying, any information of any type or form deemed relevant by the Inspector General to the Contractor's integrity or responsibility, as those terms are defined by the Commonwealth's statutes, regulations, or management directives. Such information may include, but shall not be limited to, the Contractor's business or financial records, documents or files of any type or form which refers to or concern the Contract. Such information shall be retained by the Contractor for a period of three years beyond the termination of the Contract unless otherwise provided by law.

For violation of any of the above provisions, the Commonwealth may terminate this and any other agreement with the Contractor, claim liquidated damages in an amount equal to the value of anything received in breach of these provisions, claim damages for all expenses incurred in obtaining another Contractor to complete performance hereunder, and debar and suspend the Contractor from doing business with the Commonwealth. These rights and remedies are cumulative, and the use or nonuse of anyone shall not preclude the use of all or any other. These rights and remedies are in addition to those the Commonwealth may have under law, statute, regulation, or otherwise.

CONTRACTOR RESPONSIBILITY PROVISIONS

For the purpose of these provisions, the term contractor is defined as any person, including, but not limited to, a bidder, offeror; loan recipient, grantee, or subgrantee, who has furnished or seeks to furnish goods, supplies, services, or leased space, or who has performed or seeks to perform construction activity under contract, subcontract, grant, or subgrant with the Commonwealth, or with a person under contract, subcontract, grant, or subgrant with the Commonwealth or its state-affiliated entities, and state-related institutions. The term contractor may include a permittee, licensee, lessee or any agency, political subdivision, instrumentality, public authority, or other entity of the Commonwealth.

1. The Contractor certifies, for itself and all its subcontractors, that as of the date of its execution of this Bid/Contract, that neither the Contractor, nor any subcontractors, nor any suppliers are under suspension or debarment by the Commonwealth or any governmental entity, instrumentality, or authority and, if the Contractor cannot so certify, then it agrees to submit, along with its Bid, a written explanation of why such certification cannot be made.

2. The Contractor also certifies, that as of the date of its execution of this Bid/Contract, it has no tax liabilities or other Commonwealth obligations.

3. The Contractor's obligations pursuant to these provisions are ongoing from and after the effective date of the contract through the termination date thereof. Accordingly, the Contractor shall have an obligation to inform the Commonwealth if, at any time during the term of the Contract, it becomes delinquent in the payment of taxes, or other Commonwealth obligations, or if it or any of its subcontractors are suspended or debarred by the Commonwealth, the federal government, or any other state or governmental entity. Such notification shall be made within 15 days of the date of suspension or debarment.

4. The failure of the Contractor to notify the Commonwealth of its suspension or debarment by the Commonwealth, any other state, or the Federal government shall constitute an event of default of the Contract with the Commonwealth.

5. The Contractor agrees to reimburse the Commonwealth for the reasonable costs of investigation incurred by the Office of State Inspector General for investigations of the Contractor's compliance with the terms of this or any other agreement between the Contractor and the Commonwealth, which results in the suspension or debarment of the Contractor. Such costs shall include, but shall not be limited to, salaries of investigators, including overtime, travel and lodging expenses, and expert witness and documentary fees. The Contractor shall not be responsible for investigative costs for investigations that do not result in the Contractor's suspension or debarment.

6. The Contractor may obtain a current list of suspended and debarred Commonwealth contractors by either searching the Internet at <http://www.dgs.state.pa.us/debarment.htm> or contacting the:

Department of General Services
Office of Chief Counsel
603 North Office Building
Harrisburg, PA 17125

Telephone No: (717) 783-6472
FAX No: (717) 787-9138

AMERICANS WITH DISABILITIES ACT

a. Pursuant to federal regulations promulgated under the authority of The Americans With Disabilities Act, 28 C.F.R. § 35.101 et seq., the Contractor understands and agrees that it shall not cause any individual with a disability to be excluded from participation in this Contract or from activities provided for under this Contract on the basis of the disability. As a condition of accepting this contract, the Contractor agrees to comply with the "General Prohibitions Against Discrimination," 28 C.F.R. § 35.130, and all other regulations promulgated under Title II of The Americans With Disabilities Act, which are applicable to all benefits, services, programs, and activities provided by the Commonwealth of Pennsylvania through contracts with outside contractors.

b. The Contractor shall be responsible for and agrees to indemnify and hold harmless the Commonwealth of Pennsylvania from all losses, damages, expenses, claims, demands, suits, and actions brought by any party against the Commonwealth of Pennsylvania as a result of the Contractor's failure to comply with the provisions of subparagraph a above.

OFFSET PROVISION

The Contractor agrees that the Commonwealth may set off the amount of any state tax liability or other obligation of the Contractor or its subsidiaries to the Commonwealth against any payments due the Contractor under any contract with the Commonwealth.

DEPARTMENT OF CONSERVATION AND NATURAL RESOURCES**

EXHIBIT "G"

**NONDISCRIMINATION/SEXUAL HARASSMENT PROVISIONS FOR
COMMONWEALTH CONTRACTS FOR STATE FOREST LANDS**

During the term of the Contract, the Contractor agrees as follows:

- a. In the hiring of any employees for the manufacture of supplies, performance of work, or any other activity required under the Contract or any subcontract, the Contractor, subcontractor or any person acting on behalf of the Contractor or subcontractor shall not by reason of gender, race, creed, or color discriminate against any citizen of this Commonwealth who is qualified and available to perform the work to which the employment relates.
- b. Neither the Contractor nor any subcontractor nor any person on their behalf shall in any manner discriminate against or intimidate any employee involved in the manufacture of supplies, the performance of work or any other activity required under the Contract on account of gender, race, creed, or color.
- c. The Contractor and any subcontractors shall establish and maintain a written sexual harassment policy and shall inform their employees of the policy. The policy must contain a notice that sexual harassment will not be tolerated and employees who practice it will be disciplined.
- d. The Contractor shall not discriminate by reason of gender, race, creed, or color against any subcontractor or supplier who is qualified to perform the work to which the contract relates.
- e. The Contractor and each subcontractor shall furnish all necessary employment documents and records to and permit access to its books, records, and accounts by the contracting officer and the Department of General Services' Bureau of Contract Administration and Business Development for purposes of investigation to ascertain compliance with the provisions of this Nondiscrimination/Sexual Harassment Clause. If the Contractor or any subcontractor does not possess documents or records reflecting the necessary information requested, it shall furnish such information on reporting forms supplied by the contracting officer or the Bureau of Contract Administration and Business Development.
- f. The Contractor shall include the provisions of this Nondiscrimination/Sexual Harassment Clause in every subcontract so that such provisions will be binding upon each subcontractor.
- g. The Commonwealth may cancel or terminate the Contract, and all money due or to become due under the Contract may be forfeited for a violation of the terms and conditions of this Nondiscrimination/Sexual Harassment Clause. In addition, the agency may proceed with debarment or suspension and may place the Contractor in the Contractor Responsibility File.
